Grandstand Ocean Views

Purchased new in 1996 by the present owner, this single level ocean view apartment has never to be built out ocean views stretching up and down the coastline. The elevated beachfront avenue has seen the development of a small number of boutique apartments over the last several years. Here is a great opportunity to secure a fabulous position in a small complex of just three ocean view apartments. A side driveway runs up to a lock up garage and out of your car one level living facing the ocean. Twin pandanus frame coastal gardens and an outdoor after beach shower. Terracotta tiles run up the central hall to an open living room and the deep terraces that turn to the north to link with the ensuited main bedroom. The view draws you straight to a strategically placed picture window, while an updated kitchen featuring granite and stainless benches has a porthole view to the sea. Door height cedar louvres filter light and sea breezes.
