KELVEDON HATCH | BRENTWOOD

Stonebond.

Where modern luxury meets a rural setting

Discover Myleswood, an exclusive collection of detached three, four and five-bedroom homes nestled in the historic village of Kelvedon Hatch, Brentwood. Within easy reach of London and surrounded by countryside, this is the perfect place for families, professionals, and those seeking a peaceful yet well-connected location.

Where history is written in the landscape

With a fascinating history that can be traced to the Domesday Book and the historic St Nicholas Church which dates to 1254, Kelvedon Hatch is a village with an impressive pedigree.

This lovely countryside was once scattered with grand estates and a lineage dating back centuries, that defined the area's aristocratic character. Kelvedon Hatch was home to Great Myles, a magnificent manor house with a rich history dating back to medieval times.

The house, gardens and orchards covered six acres and included Miles

Wood, no doubt a prized part of the country estate of Miles de Munteny. The building was later converted into a Georgian manor house.

Kelvedon Hatch's 20th century history included the construction of a unique secret Cold War bunker which stood ready to provide sanctuary for up to 600 people.

Where sustainability is at the heart

At Stonebond, we take pride in our sustainable approach to housebuilding, and at Myleswood, we want wildlife and plants to thrive so everyone can benefit.

Contributing over £242,000 in local community payments, supporting education, libraries, and both indoor and outdoor sports.

Sustainable transport is easy. Buses run from Kelvedon Hatch to both Brentwood and Ongar, or you can hop on a bike. There are numerous footpaths and cycle routes in the area.

Myleswood will include 5,323 new trees and shrubs to further enhance the neighbourhood and protect wildlife habitats.

49 bird and bat boxes will be installed across the development, as well as numerous hedgehog ramps and access points to allow these precious species to flourish.

New homes are more energy-efficient, cutting heating, hot water, and lighting costs by up to 50% compared to older houses. Below are some of the sustainability features showcased in the homes at Myleswood.

Advanced Insulation: High-quality insulation minimises heat loss, keeping homes warmer in winter and cooler in summer.

Energy-Efficient Windows: Double-glazed windows help maintain indoor temperatures and reduce energy loss.

Efficient Heating Systems: Air source heat pumps are installed on each home, along with underfloor heating systems, which are more energy-efficient.

LED Lighting: Energy-saving LED lights are used throughout to consume less electricity and last longer than traditional bulbs.

Smart Home Technology: Smart thermostats and energy monitoring systems allow homeowners to optimise energy usage.

Eco-Friendly Materials: In suitable areas, we have used recycled and sustainable materials to reduce the carbon footprint.

Water-Saving Devices: Features like aerated taps and dual-flush toilets conserve water and reduce energy used for heating water.

Electric Vehicle Charging Points: Included with every home, making it easier to go green.

Where young minds flourish

A first-class selection of local state and independent schools make Myleswood an ideal choice for families.
