survey report on:

Property address	22 Swallow Brae, Eliburn, LIVINGSTON, West Lothian, EH54 6GZ
Customer	Ms A Luque
Customer address	C/O Sneddon Morrison, 36-46 North Bridge Street, Bathgate, West Lothian, EH48 4PP
Prepared by	Allied Surveyors Scotland Ltd
Date of inspection	13th November 2025

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

Х

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether
 or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.²

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.1 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise a purpose-built flat located on the top/third floor of a four storey building containing twelve flats in total. There is no lift.
Accommodation	Third floor:- Entrance hall, living room, two bedrooms, kitchen and bathroom.
Gross internal floor area (m²)	Circa 61 sq. metres
Neighbourhood and location	The property is located in the Ladywell district of Livingston in a modern residential estate built by Muir Homes Ltd. Local amenities and facilities are within a fairly easy travelling distance.
Age	The property was built circa 2003 and therefore is approximately 22 years old.
Weather	There were light rain showers during the course of the inspection.
Chimney stacks	There are no chimney stacks.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.
	If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
	Our inspection of the roof was from ground floor level only and from a distance from the front elevation. The roof coverings were not fully visible. The roof is pitched and covered with tiles.
	The roof space can be accessed via an attic hatch on the hallway ceiling. The roof space is partially floored with some stored items

Г	
Roofing including roof space	which restricted our inspection and is insulated between the ceiling joists.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	Visually inspected from ground level, these were seen to be of PVC.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The main walls are believed to be of load bearing timber frame construction with the outer walls having a brick cladding. Some metal cladding was noted to some sections of the walls, particularly below the living room windows.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	The front entrance door into the property is of timber construction whilst the windows are of PVC double-glazed units which appear to be original.
External decorations	Visually inspected.
	The eaves/soffits appear to be of timber construction and have a paint finish.
Conservatories / porches	Not applicable.
Communal areas	Circulation areas visually inspected.
	Communal areas including the entrance passage, stairwell, parking and the grounds surrounding the building. There is also an entry phone system which gives access to the building.
Garages and permanent outbuildings	There are no garages or any permanent outbuildings.
Outside areas and boundaries	Visually inspected.
	The property benefits from communal landscape gardens and allocated residents' parking.

Ceilings	Visually inspected from floor level.
	Visually inspected from floor level, these were seen to be of plasterboard lined.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	The internal walls are mainly plasterboard lined.
Element de la Company	
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.
	The flooring throughout the property appears to be of suspended timber construction.
	No inspection of any sub-floor area has been undertaken. There were fitted floor coverings throughout the property at the time of our inspection.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal joinery consists of timber doors/skirtings/facings etc.
	The kitchen has fitted floor/wall units.
Chimney breasts and fireplaces	Not applicable.
Internal decorations	Visually inspected
internal decorations	Visually inspected.
	Decorated areas include walls/ceilings.
Cellars	Not applicable
Ochars	Not applicable.

Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. There is a mains electricity supply. The circuit breaker unit and meter are located in the hallway cupboard.
Gas	There is no gas on the premises.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	There is a mains cold water supply with pipework, where seen, being mainly of copper/plastic.
	The bathroom has a white three piece suite with an electric shower above the bath. The electric shower has not been tested.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	Central heating is provided by a electric storage and panel radiators. There is a fan heater in the bathroom. The heating system has not been tested.
	Hot water is supplied by the electric immersion heater which is fitted to a modern hot water tank located in the hallway cupboard. The hot water system has not been tested.
Drainage	Drainage covers etc were not lifted.
	Neither drains nor drainage systems were tested.
	Drainage is understood to be to the public sewer.
Fire, smoke and burglar alarms	Visually inspected.
	No tests whatsoever were carried out to the system or appliances.
	We will not pass any comment with regards to a burglar alarm for security reasons.
	There are smoke alarms within the property.
	There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space

Fire, smoke and burglar alarms

on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.

The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.

Any additional limits to inspection

For flats / maisonettes

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

It was not possible to inspect floor surfaces due to fitted floor coverings/heavy furniture.

No inspection of any sub-floor area has been undertaken.

Our inspection of the roof space was only a head and shoulders inspection.

Our inspection of the roof was from ground floor level only and therefore the roof coverings were not fully visible.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to controlled regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists, removal must be undertaken in a controlled manner by a specialist contractor. This can prove to be expensive.

Some materials used in the building and maintenance industry until 1999 contain asbestos. Asbestos fibres released into the air, and which are breathed in, are dangerous to health. Decorative finishes in common use in the period from about 1950 to about 1985 included artex, used as a coating on ceilings and sometimes walls. Older artex can contain asbestos and if sanding or removal of this material is intended, then appropriate precautions should be taken, if necessary, with advice from the Environmental Health Department of the Local Authority.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category	1
Notes	There was no evidence of any significant structural movement during the course of our inspection.

Dampness, rot and infestation	
Repair category	1
Notes	No significant defects noted.

Chimney stacks	
Repair category	-
Notes	Not applicable.

Roofing including roof space	
Repair category	1
Notes	Areas where visible appeared to be in a condition consistent with age. As our inspection was restricted, ongoing maintenance/repair works should be anticipated. A roofing contractor or the factors can advise further. Roofs are prone to water penetration during adverse weather but it is not always possible for surveyors to identify this likelihood in good or dry weather. All roofs should be inspected and repaired by reputable tradesmen on an annual basis and especially after storms.

Rainwater fittings	
Repair category	2
Notes	It was raining at the time of our inspection and the rainwater gutters were leaking. Vegetation growth was also noted. Repair works should be anticipated.

Main walls	
Repair category	1
Notes	Some stained areas were noted to brickwork including efflorescence.

Windows, external doors and joinery	
Repair category	2
Notes	The windows appear to be original, therefore ongoing maintenance/repair works should be anticipated. The bathroom window jams when opening and closing, and will require some attention. The seal around one of the windows requires attention.
	Whilst there was no obvious defect on the date of our inspection, it should be appreciated that double-glazed sealed units do have a limited life expectancy and defective seals can lead to condensation between the panes, necessitating in replacement of the units. This can sometimes only be obvious during adverse weather conditions.

External decorations	
Repair category	2
Notes	Timber decay was noted to the soffits/eaves and a number of areas are stained. Repair works should be anticipated.

Conservatories/porches	
Repair category	-
Notes	Not applicable.

Communal areas	
Repair category	2
Notes	A window pane is cracked to one of the internal doors within the communal stairwell. Some stained areas were noted to the top floor ceiling, and there was also evidence of slight mould. The carpet to some internal steps in loose and

Communal areas	
Repair category	2
Notes	requires attention. Repair/maintenance work should be anticipated.

Garages and permanent outbuildings	
Repair category	-
Notes	Not applicable.

Outside areas and boundaries	
Repair category	1
Notes	The outside areas and boundaries are in satisfactory condition.

Ceilings	
Repair category	1
Notes	There was no evidence of any significant defects at the time of our inspection.

Internal walls	
Repair category	1
Notes	No significant defects noted.

Floors including sub-floors	
Repair category	1
Notes	There was no evidence of any significant defects at the time of our inspection.

Internal joinery and kitchen fittings	
Repair category	1
Notes	Normal wear and tear noted.

Chimney breasts and fireplaces	
Repair category	-
Notes	Not applicable.

Internal decorations	
Repair category	1
Notes	The internal decoration is to a satisfactory standard but routine maintenance work should be anticipated.

Cellars	
Repair category	-
Notes	None.

Electricity		
Repair category	1	
Notes	The trade bodies governing electrical installations currently advise that these should be tested prior to a change of occupancy and, thereafter, at least once every five years, by a competent Electrician.	
	The electrical wiring system should therefore be checked, tested and upgraded if necessary by an NIC/EIC Registered electrician. Any recommendations made with regard to the safety of the installation should be undertaken.	

Gas	
Repair category	-
Notes	Not applicable.

Water, plumbing and bathroom fittings				
Repair category	1			
Notes	The seal around the bathtub should be regularly checked/maintained. The flooring below the bathtub has not been inspected and therefore it has been assumed it is free from any defects.			

Heating and hot water				
Repair category	-			
Notes	The heating/hot water system has not been tested and therefore we are unable to comment on the condition. A heating engineer can advise further.			
	It has been assumed that the heating installation has been regularly serviced and that recent service history records will be made available. This should be checked by the conveyancer.			

Drainage	
Repair category	1
Notes	At the time of our inspection, we did not lift any drainage inspection covers or carry out any drainage tests and we cannot therefore comment with any authority on the condition of the drainage system. We would add that there was no evidence on the surface to suggest any major problems in this connection, but if you wish further investigations undertaken, then a competent plumber should be instructed.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	1
Chimney stacks	-

Gas	-
Water, plumbing and bathroom fittings	1
Heating and hot water	-
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Top/third		
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X		
3. Is there a lift to the main entrance door of the property?	Yes No X		
4. Are all door openings greater than 750mm?	Yes No X		
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No		
6. Is there a toilet on the same level as a bedroom?	Yes X No		
7. Are all rooms on the same level with no internal steps or stairs?	Yes X No		
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No		

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

All boundaries, rights of way and maintenance liability with regards to this property should be checked.

It is our understanding that Ross & Liddell are the factors for the building. This should be verified.

The property lies in an area where mineral extraction has taken place in the past.

The property appears to retain its original layout.

Estimated reinstatement cost for insurance purposes

The estimated reinstatement cost for insurance purposes is £205,000 (Two Hundred and Five Thousand Pounds Sterling).

This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction, on a reinstatement basis, assuming reconstruction of the property in its existing design and materials. Finishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during reconstruction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers are advised.

Valuation and market comments

The market value of the property described in the report is £125,000 (One Hundred and Twenty- Five Thousand Pounds Sterling).

This figure assumes vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights.

General Remarks
The property is located in the Ladywell district of Livingston in a modern residential estate built by Muir Homes Ltd. Local amenities and facilities are within a fairly easy travelling distance.
Externally, some repair/maintenance works are required as sections of rainwater gutters were leaking. We were unable to fully view the roof coverings, but visible areas appeared to be in satisfactory condition. Internally, the property has been kept in a condition consistent with age and type of construction.
Some maintenance/repair works are required and these items have been reflected within our valuation figure provided.
All boundaries, rights of way and maintenance liability with regards to this property should be checked.
It is our understanding that Ross & Liddell are the factors for the building. This should be verified.
The property lies in an area where mineral extraction has taken place in the past.
The property appears to retain its original layout.

Energy Performance Certificate (EPC)

Dwellings

Scotland

22 SWALLOW BRAE, ELIBURN, LIVINGSTON, EH54 6GZ

Dwelling type: Top-floor flat
Date of assessment: 13 November 2025
Date of certificate: 20 November 2025

Total floor area: 61 m²

Primary Energy Indicator: 165 kWh/m²/year

Reference number: 9175-1900-2209-8175-2200 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

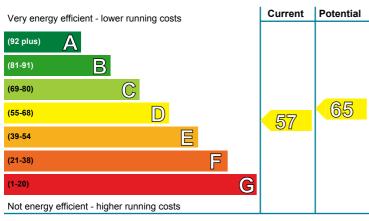

Main heating and fuel: Electric storage heaters

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£5,541	See your recommendations
Over 3 years you could save*	£1,071	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

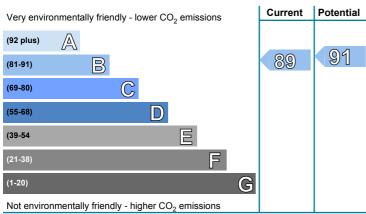

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (57)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is band B (89)

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Increase loft insulation to 270 mm	£900 - £1,200	£615.00
2 High heat retention storage heaters	£1,200 - £2,400	£456.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Timber frame, as built, insulated (assumed)	****	★★★★ ☆
Roof	Pitched, 125 mm loft insulation	***	★★★☆☆
Floor	(another dwelling below)	_	_
Windows	Fully double glazed	***	★★★☆☆
Main heating	Electric storage heaters	***	****
Main heating controls	Manual charge control	***	***
Secondary heating	Room heaters, electric	_	_
Hot water	Electric immersion, standard tariff	***	****
Lighting	Good lighting efficiency	****	★★★★ ☆

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 16 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 1.0 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 0.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,759 over 3 years	£2,568 over 3 years	
Hot water	£1,650 over 3 years	£1,770 over 3 years	You could
Lighting	£132 over 3 years	£132 over 3 years	save £1,071
Totals	£5,541	£4,470	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Indicative aget Typical saving		Rating after improvement		
		Indicative cost per year		Energy	Environment		
1	Increase loft insulation to 270 mm	£900 - £1,200	£205	D 62	B 90		
2	High heat retention storage heaters and dual immersion cylinder	£1,200 - £2,400	£152	D 65	B 91		

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Loft insulation

Loft insulation laid in the loft space or between roof rafters to a depth of at least 270 mm will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation should not be placed below any cold water storage tank, any such tank should also be insulated on its sides and top, and there should be boarding on battens over the insulation to provide safe access between the loft hatch and the cold water tank. The insulation can be installed by professional contractors but also by a capable DIY enthusiast. Loose granules may be used instead of insulation quilt; this form of loft insulation can be blown into place and can be useful where access is difficult. The loft space must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about loft insulation and details of local contractors can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk).

2 High heat retention storage heaters

Modern storage heaters have better insulation and are easier to control than the older type in this property. Ask for a quotation for new, high heat retention heaters with automatic charge and output controls. A dual-immersion cylinder, which can be installed at the same time, will provide cheaper hot water than the system currently installed. Installations should be in accordance with the current regulations covering electrical wiring. Ask the heating engineer to explain the options, which might also include switching to other forms of electric heating.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	4,408.91	N/A	N/A	N/A
Water heating (kWh per year)	1,935.52			•

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Miss Aisha Akram Assessor membership number: EES/008214

Company name/trading name: Allied Surveyors Scotland Ltd

Address: 22 Walker Street

Edinburgh EH3 7HR

Phone number: 01312266518

Email address: edinburgh.central@alliedsurveyorsscotland.com

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property? If you have answered yes, please answer the three questions below:	NO
	(i) Were the replacements the same shape and type as the ones you replaced?	N/A
	(ii) Did this work involve any changes to the window or door openings?	N/A
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):	
	Please give any guarantees which you received for this work to your solicitor or estate agent.	
7.	Central heating	

a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property – the main living room, the bedroom(s), the hall and the bathroom). If you have answered yes/partial – what kind of central heating is there? Electric night storage and convestor system If you have answered yes, please answer the 3 questions below: When was your central heating system or partial central	Partial
J.	heating system installed?	
C.	Do you have a maintenance contract for the central heating system? If you have answered yes, please give details of the company with which you have a maintenance agreement:	N/A
d.	When was your maintenance agreement last renewed? (Please provide the month and year).	
8.	Energy Performance Certificate	

	Does your property have an Energy Performance Certificate which is less than 10 years old?	YES
9.	Issues that may have affected your property	
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it? If you have answered yes, is the damage the subject of any outstanding insurance claim?	NO
b.	Are you aware of the existence of asbestos in your property? If you have answered yes, please give details:	NO
10	Sarvicas	

10. Services

a. Please tick which services are connected to your property and give details of the supplier:

Services	Connected	Supplier
Gas / liquid petroleum gas		n/a
Water mains / private water supply		Scottish Water
Electricity		EON
Mains drainage		Scottish Water
Telephone		n/a
Cable TV / satellite		n/a
Broadband		Virgin

b.	Is there a septic tank system at your property?	NO
	If you have answered yes, please answer the two questions below:	
C.	Do you have appropriate consents for the discharge from your septic tank?	n/a
d.	Do you have a maintenance contract for your septic tank?	n/a
	If you have answered yes, please give details of the company with which you have a maintenance contract:	
11.	Responsibilities for Shared or Common Areas	

a.	Are you aware of any responsibility to contribute to the cost of anything used jointly, such as the repair of a shared drive, private road, boundary, or garden area? If you have answered yes, please give details: Factors with Ross and Liddell - 75 pounds per moth	yes
b.	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas? If you have answered yes, please give details:	yes
C.	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?	NO

d.	Do you have the right to walk over any of your neighbours' property - for example to put out your rubbish bin or to maintain your boundaries? If you have answered yes, please give details:	NO
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries? If you have answered yes, please give details:	NO
f.	As far as you are aware, is there a Public Right of Way across any part of your property? (A Public Right of Way is a way over which the public has a right to pass, whether or not the land is privately-owned.) If you have answered yes, please give details:	NO
12.	Charges associated with your property	
a.	Is there a factor or property manager for your property? If you have answered yes, please provide the name and address and give details of any deposit held and approximate charges:	YES

b.	Is there a common buildings insurance policy?	YES
	If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges? Included	YES
C.	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, e.g. to a Residents' Association, or maintenance or stair fund.	
13.	Specialist Works	
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	NO
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property	
b.	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	NO

C.	If you have answered yes any guarantees relating to			ou have	N/A
