Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.**

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

SINGLE Survey

A report on the condition of the property, with categories being rated from 1 to 3.

Date of Inspection	12/09/2024
--------------------	------------

Prepared by	Keith Campbell, Assoc.RICS
	Inverness - Allied Surveyors Scotland Ltd

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. ¹

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 $\overline{\mathcal{M}}$

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

¹ Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 **DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

² Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 – DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 <u>Category 1</u>: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- *There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- *There are no particularly troublesome or unusual legal restrictions;
- *There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" *is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise an extended, end terraced two storey Dwellinghouse.
Accommodation	The accommodation may be summarised as follows:-
	Ground Floor - Vestibule, Hall, Livingroom with Dining area off, Kitchen and Showerroom.
	First Floor - Landing, 2 Bedrooms, Study and Office.
Gross internal floor area (m2)	Approximately 93m2.
Neighbourhood and location	The property forms part of an established, residential area within the Hill District of Inverness which lies within close proximity to the City centre. Local amenities can be found nearby.
	The property is located in a Conservation Area. It would appear that parking on this street requires a permit from the Local Authority.
Age	Approximately 80 years.
Weather	Weather conditions were dry and bright at the time of inspection. The report should be read in context of these weather conditions.
Chimney stacks	There is a mutual chimney stack constructed in concrete with a rendered coat externally and fitted with fireclay pots.
	Visually inspected with the aid of binoculars where required.

Roofing including roof space	The roof structure is of a traditional pitched/hipped design, clad externally with slates over timber trusses and timber sarking material.
	There is a small flat roof over the front bay at first floor level.
	The rear extension has a pitched roof clad in profiled metal sheeting over timber trusses.
	Internally, a head and shoulders inspection was available of the main roof space via a ceiling hatch in the rear Study and this found the area to be insulated with approximately 100mm thick glass wool quilting.
	Sloping roofs were visually inspected with the aid of binoculars where required.
	Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
Rainwater fittings	The rainwater goods comprise cast iron and PVC gutters and downpipes.
	Visually inspected with the aid of binoculars where required.
Main walls	The main outer walls are of a non-traditional construction, being of solid poured concrete, rendered externally and dry lined internally.
	The extension appears to be of cavity brick construction, rendered externally and dry lined internally.
	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.
Windows, external doors and joinery	Windows comprise a mixture of timber, sash and casement single glazed units, or timber framed double glazing.
	The main entrance door is of timber design with a single glazed hopper and the rear door is of a hollow core veneer style.
	External fascias are formed in white PVC.
	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
External decorations	As above, walls are rendered and fascias are formed in white PVC.
	Visually inspected.
Conservatories / porches	Not applicable.
Communal areas	Not applicable.
	1

Garages and permanent outbuildings	There is a detached single car Garage at the rear of the property which is constructed in timber with metal sheeting. This was locked at the time of inspection, therefore no internal access was available. <i>Visually inspected.</i>
Outside areas and boundaries	The property benefits from garden grounds to the front, side and rear. Boundaries are formed in timber post and panel fencing. <i>Visually inspected.</i>
Ceilings	Ceilings are plasterboard lined. Visually inspected from floor level.
Internal walls	Internal walls and partitions are plasterboard lined. Visually inspected from floor level. Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
Floors including sub floors	 Floors are of a suspended timber joist design, although there is a solid concrete floor in the Kitchen extension. At the time of inspection, the property was occupied, furnished and all floors had fitted coverings. The inspection was consequently restricted and there was no available access to any sub-floor areas. Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
Internal joinery and kitchen fittings	Internal joinery, notably that of skirtings and door surrounds, are formed in painted softwood finishes. Internal doors comprise hollow core veneered units. The Kitchen is fitted with older style wall and base units, together with associated worktops, stainless steel sink unit and gas cooker. Built-in cupboards were looked into but no stored items were moved. Kitchen units were visually inspected excluding appliances.
Chimney breasts and fireplaces	Original fireplaces have been blocked up. Visually inspected.
Internal decorations	Internally, walls and ceiling linings are generally painted, wallpapered, timber clad or finished with wet wall cladding. <i>Visually inspected.</i>
Cellars	Not applicable.

Electricity	The property is connected to the mains electricity supply.
	The circuitry is protected by a consumer board which is wall mounted in the Vesituble.
	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
Gas	The property is connected to the mains gas supply.
	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
Water, plumbing and	The property is connected to the mains water supply.
bathroom fittings	Where visible, distribution pipework is formed in copper and soil/waste pipes are formed in PVC.
	The Showerroom is fitted with a three piece suite which includes WC, wash hand basin and shower with Mira electric fitting.
	There is an external tap fitted at the rear of the property.
	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
Heating and hot water	Space heating is provided via the Intergas HRE combi boiler which is located in the dining area. This supplies a series of thermostatically controlled radiators throughout the main living accommodation and also provides domestic hot water.
	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
Drainage	Drainage is connected to the main public sewer.
	Drainage covers etc were not lifted.
	Neither drains nor drainage systems were tested.

Fire, smoke and burglar	Smoke alarms are fitted at both the ground and first floor levels. There is
alarms	a heat detector fitted in the Kitchen.
	Visually inspected.
	No test whatsoever were carried out to any systems or appliances.
	There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required. The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.
	We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will required to be installed prior to sale. This of course should be confirmed by your legal advisor.

Any additional limits to inspection	We did not inspect woodwork, services or other parts of the property which were covered, unexposed or inaccessible. This report cannot therefore comment that such parts of the property are free from defect.
	Random testing for dampness was undertaken internally with the use of a moisture meter to walls, ceilings and flooring where considered appropriate.
	The services, electrical circuits, plumbing installation, heating and drainage systems have not been specifically tested.
	No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report.
	All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns, then they should ask for a specialist to undertake appropriate tests. Asbestos is not harmful unless fibres are released into the air.
	An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.
	Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- (38) Floorboards
- (39) Water tank
- (40) Hot water tank

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movemen	t
Repair category:	
Notes:	There is evidence of settlement in the building noted both internally and externally but this is not inconsistent with a property of this age and type and on the basis of a single inspection appears to be longstanding.

Dampness, rot and infestation	
Repair category:	2
Notes:	There is evidence of movement to floor joists at ground floor level which suggests there is potential for hidden defects in the sub-floor area. It would therefore be prudent to have this checked as a precaution by a Timber and Damp Specialist.

Chimney stacks	
Repair category:	3
Notes:	There is defective render finishes to the mutual chimney stack.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Roofing including roof space	
Repair category:	2
Notes:	There is evidence of some undulation, together with a number of broken slates. A Roofing Contractor can advise on any necessary repair work.
	There is a small flat roof over the front bay at first floor level, which will have a limited life and require regular and ongoing maintenance.
	Internally, there is no evidence of underslate felt.
	It would appear that there is a gap in the party wall between the subject property and next door. This should be appropriately blocked off in order to comply with fire safety regulations.
	Insulation within the roof space is considered thin in comparison to modern standards.

Rainwater fittings	
Repair category:	
Notes:	At the time of our inspection there was no evidence of damp staining/water staining on wall surfaces which would indicate leakage. It should be noted that it was not raining at the time of our inspection.

Main walls	
Repair category:	2
Notes:	Some cracking was noted to the external render finish, together with some loose finishes.
	Cracking was also noted to the rear extension render and basecourse.

Windows, external doors and joinery	
Repair category:	2
Notes:	There are cracked panes of glass to some windows, together with some failed sealed unit double glazing.
	Externally, there are some window and door timbers which are showing signs of weathering and decay.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

External decorations	3
Repair category:	2
Notes:	External decorations would benefit from maintenance.

Conservatories / porches	
Repair category:	
Notes:	Not applicable.

Communal areas	
Repair category:	
Notes:	Not applicable.

Garages and permanent outbuildings	
Repair category:	
Notes:	From an external inspection only, the Garage outbuilding appeared to be in reasonable condition. Regular maintenance should be anticipated.

Outside areas and boundaries	
Repair category:	2
Notes:	There is a lean to the side shared fence at the rear.
	There are some sections of soft and loose timber fencing.

Ceilings	
Repair category:	2
Notes:	There are areas of plaster cracking. Repairs should be completed, prior to redecoration.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Internal walls	
Repair category:	
Notes:	There is evidence of staining to the gable wall above the stair, but this was tested and found to be dry.

Floors including sub-floors	
Repair category:	2
Notes:	There is evidence of movement to floor joists at ground floor level which suggests there is potential for hidden defects in the sub-floor area. It would therefore be prudent to have this checked as a precaution by a Timber and Damp Specialist.

Internal joinery and kitchen fittings	
Repair category:	2
Notes:	Wear and tear noted to the Kitchen units, consistent with age and type. It would appear that the glazed doors are not fitted with safety glass. Some door heads were noted to be off-level due to past movement in the building.

Chimney breasts and fireplaces	
Repair category:	2
Notes:	The original fireplaces have been blocked up. It would appear that these are not adequately ventilated.

Internal decorations	
Repair category:	2
Notes:	The property appears in fair decorative condition consistent with age (although it is recognised that on taking occupancy home owners may consider redecoration).

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacementRepairs or replacement requiring future attention, but estimates are still advised.No immediate action or repair is needed.

Repair category:	
Notes:	Not applicable.

Electricity	
Repair category:	2
Notes:	The electrical system within the property appeared of modern design, there being a circuit breaker type distribution board. It should be emphasised that the system was not tested at the time of our inspection. The Institution of Engineering and Technology recommends that inspections and testing are undertaken at least every ten years for owner- occupied properties and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations. We would recommend an Electrical Installation Condition Report (EICR) be obtained prior to purchase.

Gas	
Repair category:	
Notes:	Although not specifically tested, no visual defects were apparent.

Water, plumbing and	Water, plumbing and bathroom fittings			
Repair category:	Repair category:			
Notes:	Although not specifically tested, no visual defects were apparent.			

Heating and hot water				
Repair category:				
Notes:	Although not specifically tested, no visual defects were apparent.			
	The central heating boiler should be checked and serviced to ensure its safe and efficient operation.			

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Drainage	
Repair category:	
Notes:	There was no surface indication of any defect noted.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	3
Roofing including roof space	2
Rainwater fittings	1
Main walls	2
Windows, external doors and joinery	2
External decorations	2
Conservatories / porches	
Communal areas	
Garages and permanent outbuildings	1
Outside areas and boundaries	2
Ceilings	2
Internal walls	1
Floors including sub-floors	2
Internal joinery and kitchen fittings	2
Chimney breasts and fireplaces	2
Internal decorations	2
Cellars	
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground and first.
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES []NO
3. Is there a lift to the main entrance door of the property?	[]YES [x]NO
4. Are all door openings greater than 750mm?	[]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES []NO
6. Is there a toilet on the same level as a bedroom?	[]YES [x]NO
7. Are all rooms on the same level with no internal steps or stairs?	[]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES []NO

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

We have assumed that the property possesses a good and valid title and that the tenure is Standard or Absolute Ownership.

It is our experience that certain lending institutions are not prepared to advance mortgage finance on properties of this age and construction type. We have endeavoured to reflect this in arriving at our opinion of value below.

The property is located in a Conservation Area and as such the cost of repair or reinstatement works are likely to be higher than normal. Any works considered necessary will require to be carried out in consultation with the Local Authority Planning Office and Historical Scotland.

It would appear that parking on this street requires a permit from the Local Authority.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Estimated re-instatement cost (£) for insurance purposes

345,000 (Three Hundred and Forty Five Thousand Pounds).

We are of the opinion that the subjects should be insured for buildings reinstatement purposes for a sum of not less than the above noted figure. Building costs are currently increasing significantly above inflation due to material and labour shortages. It is recommended that you update this figure regularly to ensure that you have adequate cover or alternatively seek specialist advice from your insurer.

Valuation (£) and market comments

220,000 (Two Hundred and Twenty Thousand Pounds).

After full and careful consideration, we are of the opinion that the Current Open Market Value of the heritable subjects, as described and with the benefit of full vacant possession can be fairly stated at a figure of Two Hundred and Twenty Thousand Pounds.

We have endeavoured to reflect market conditions currently prevailing in arriving at our opinion of value.

PART 2.

MORTGAGE VALUATION **REPORT**

Includes a market valuation of the property.

Mortgage Valuation Report

Property:	56 Denny Street	Client: Mr. An	gus Mackenzie
	Crown Inverness IV2 3AP	Tenure: Scott	ish Ownership
Date of Inspection:	12/09/2024	Reference:	KC/JMB/I/24/09/054

This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

1.0 LOCATION

The property forms part of an established, residential area within the Hill District of Inverness which lies within close proximity to the City centre. Local amenities can be found nearby.

The property is located in a Conservation Area. It would appear that parking on this street requires a permit from the Local Authority.

2.0 DESCRIPTION 2.1 Age: Approximately 80 years. The subjects comprise an extended, end terraced two storey Dwellinghouse. 3.0 CONSTRUCTION 3.0 CONSTRUCTION Walls - the main walls are of solid non-traditional poured concrete construction, rendered externally and dry lined internally. 	Inverness - Allied Surveyors Scotland Ltd

Energy Performance Certificate (EPC)

Scotland

Dwellings

56 DENNY STREET, INVERNESS, IV2 3AP

Dwelling type:	End-terrace house
Date of assessment:	12 September 2024
Date of certificate:	18 September 2024
Total floor area:	93 m ²
Primary Energy Indicator:	299 kWh/m ² /year

Reference number: Type of assessment: Approved Organisation: Main heating and fuel:

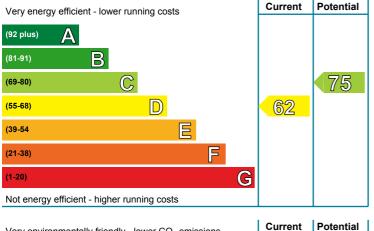

9825-1011-4201-7434-9200 RdSAP, existing dwelling Elmhurst Boiler and radiators, mains gas

You can use this document to:

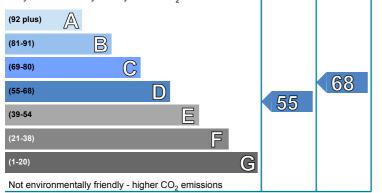

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£5,529	See your recommendations
Over 3 years you could save*	£390	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

Very environmentally friendly - lower CO₂ emissions

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is band D (62). The average rating for EPCs in Scotland is band D (61).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D** (55). The average rating for EPCs in Scotland is band D (59).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£800 - £1,200	£228.00
2 Solar water heating	£4,000 - £6,000	£162.00
3 Solar photovoltaic (PV) panels	£3,500 - £5,500	£1365.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE **DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

56 DENNY STREET, INVERNESS, IV2 3AP 18 September 2024 RRN: 9825-1011-4201-7434-9200

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	System built, as built, no insulation (assumed) Cavity wall, as built, partial insulation (assumed)	★☆☆☆☆ ★★★☆☆	★☆☆☆☆ ★★★☆☆
Roof	Pitched, 100 mm loft insulation Pitched, limited insulation (assumed)	★★★☆☆ ★★☆☆☆	★★★☆☆ ★★☆☆☆
Floor	Suspended, no insulation (assumed) Solid, no insulation (assumed)		
Windows	Partial double glazing	★★☆☆☆	*****
Main heating	Boiler and radiators, mains gas	★★★★☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	None	—	—
Hot water	From main system	★★★★☆	★★★★☆
Lighting	Low energy lighting in all fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 53 kg $CO_2/m^2/yr$.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 4.9 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.2 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

56 DENNY STREET, INVERNESS, IV2 3AP 18 September 2024 RRN: 9825-1011-4201-7434-9200

Estimated energy of	costs for this home		
	Current energy costs	Potential energy costs	Potential future savings
Heating	£4,689 over 3 years	£4,461 over 3 years	
Hot water	£507 over 3 years	£345 over 3 years	You could
Lighting	£333 over 3 years	£333 over 3 years	save £390
Total	s £5,529	£5,139	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

	Indiantive anot	Indicative cost Typical saving		Rating after improvement		
Recommended measures	indicative cost	per year	Energy	Environment		
1 Floor insulation (suspended floor)	£800 - £1,200	£76	D 64	D 58		
2 Solar water heating	£4,000 - £6,000	£54	D 65	D 59		
3 Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£455	C 75	D 68		

Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

• Cavity, internal or external wall insulation

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	17,123	(608)	(433)	N/A
Water heating (kWh per year)	2,033			

Addendum

This dwelling is a system built property or some of its walls are of non-conventional construction and requires further investigation to establish the type of construction, the type of wall insulation best suited (cavity insulation or internal/external insulation) and the savings it might deliver. Please contact the Home Energy Scotland hotline on 0808 808 2282 to find out more.

56 DENNY STREET, INVERNESS, IV2 3AP 18 September 2024 RRN: 9825-1011-4201-7434-9200

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Assessor membership number: Company name/trading name: Address:	Mr. Keith Campbell EES/010338 Allied Surveyors Scotland Ltd Lyle House, Pavilion 1 Fairways Business Park Invernesshire Inverness
Phone number: Email address: Related party disclosure:	IV2 6AA 01463 239 494 inverness@alliedsurveyorsscotland.com No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

PART 4.
