Cooke Curtis & Co

We are small enough that we are able to care for each client personally, but large enough to provide exceptional marketing that achieves the best possible price in the least possible time.

We are a responsible business. We aim to be a low carbon company, to operate ethically and to be valuable members of the Cambridge community.

We are experienced in all aspects of residential property, including sales and lettings, planning, development and buy-to-let.

We are interested in you. We see Estate Agency as being as much about people as property. Our job is to work for you, to help you achieve the best possible outcome in your particular situation.

Testimonial 1

Great service from Cooke Curtis & co. We used them for the sale of our home as they were the agents for a property we wanted to buy. They quickly valued, took photos and put it on the market with viewings soon after. Them handling both sides of the deal was a huge help with one complexity of the epic process of house purchasing removed. The agents were particularly calm, reasonable and responsive by email and telephone. Thanks you!

Testimonial 2

Since purchasing our house from Cooke Curtis and Co in 2017, we knew that if ever we were to sell, it would be with them. Of the various estate agents we asked to value the property, Cooke Curtis and Co were the *only* company that didn't need chasing and returned our calls promptly, and kept us up-to-date on progress of the sale. I have no hesitation in recommending Cooke Curtis and Co, as indeed I have done to friends thinking of selling in the area.

Testimonial 3

Being from Cambridge we have rented, bought and sold through many different estate agents over the years, and I can safely say that Cooke Curtis & Co have been by far the best we have come across. After failing to sell our house with another agent, we made the switch and didn't regret our decision. Cooke Curtis & Co clearly care about their reputation and make sure to look after their clients. We found the team to be trustworthy, professional and reliable.

Testimonial 4

We bought a property sold by Cooke Curtis and Co. They were helpful and responded swiftly to our enquiries. It seems buying a house always takes a long time but I got the impression the estate agents did all they could to speed things along. Very happy.

Flood Risk

Surface Water - Flood Risk

This map shows the chance of flooding where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Chance of flooding to the following depths at this property:

Flood Risk

Surface Water - Climate Change

This map shows the future chance of flooding **between 2040 and 2060** where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.

This map displays nearby coal mine entrances and their classifications.

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

Ground Composition for this Address (Surrounding square kilometer zone around property)

Carbon Content:	HIGH	Soil Texture:	CHALKY CLAY TO CHALKY

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB
