

Carpenters Cottage

Situated in the middle of a large established plot approaching half an acre sits this deceptively spacious period cottage. The former home years ago of Carpenter Green, the property has many character features typical of an old cottage such as beams to the walls and ceilings, old latch doors and open fires. Whilst the property would benefit from a programme of cosmetic updating, it does benefit from uPVC windows throughout and an oil fired central heating system and the seller advises that the property had a damp proof course in 2021.

Carpenters Cottage has several reception rooms to include a lounge, dining room and sitting room / study. As there are bathrooms to both the first floor and the ground floor, a fourth reception room off the conservatory to the rear has a view over the garden and has made a great additional bedroom for older relatives. The cottage kitchen has space for a dining table and cooking range and has a Butler style sink with a utility room off. To the first floor there are three generous double bedrooms and a smaller room or dressing room, which due to the restricted head height, has not been officially classed as a bedroom but does provide very useful storage space.

Outside a driveway to the side of the property provides off road parking which opens up to the front of the property and provides access to a single garage. Extensive gardens to the front and rear are filled with a host of flowering plants, shrubs and bushes in addition to a range of mature fruit trees to include pear, plum and apple.
