## Testimonial 1

We predominately dealt with Shelly at the Frome branch through the process of buying and selling our house. Over the last 18 months Shelly has been pretty much the only agent in town who has bothered to keep me up to date with what was coming on the market etc. Not only did we sell through C&T but when it came to purchasing (also through them) they really worked hard to make the deal work for everyone. A very positive experience.

## Testimonial 2

Cooper and Tanner in Frome were highly recommended to us – and we are delighted that we listened! We have found them to be experts in their field with excellent local knowledge and a very clear understanding of the market. Adam and his team have been professional, helpful and supportive throughout the process – far above and beyond the call of duty - and a real pleasure to deal with.

## Testimonial 3

In the last 2 years or so we have bought twice and sold once with Cooper and Tanner in Frome. Adam Scott and his entire team have been really great throughout. All three transaction had complications that needed to be sorted out, especially the last one that took 6 months to complete with many twists and turns. Adam has been so patient and energetic and on the ball, on top of the situation throughout. He builds a great rapport with both buyer and seller.

## Testimonial 4

We had a sale agreed on our property early in 2023 after only being available for a few days. Throughout the selling process Cooper & Tanner in Frome were consistently helpful and supportive. Furthermore, they demonstrated that they had a very clear understanding of the market. They were a pleasure to deal with and in particular, Adam Scott (Branch Manager) & Ross Bowers (Senior Negotiator) were always on hand if we had any problems or worries.

## Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

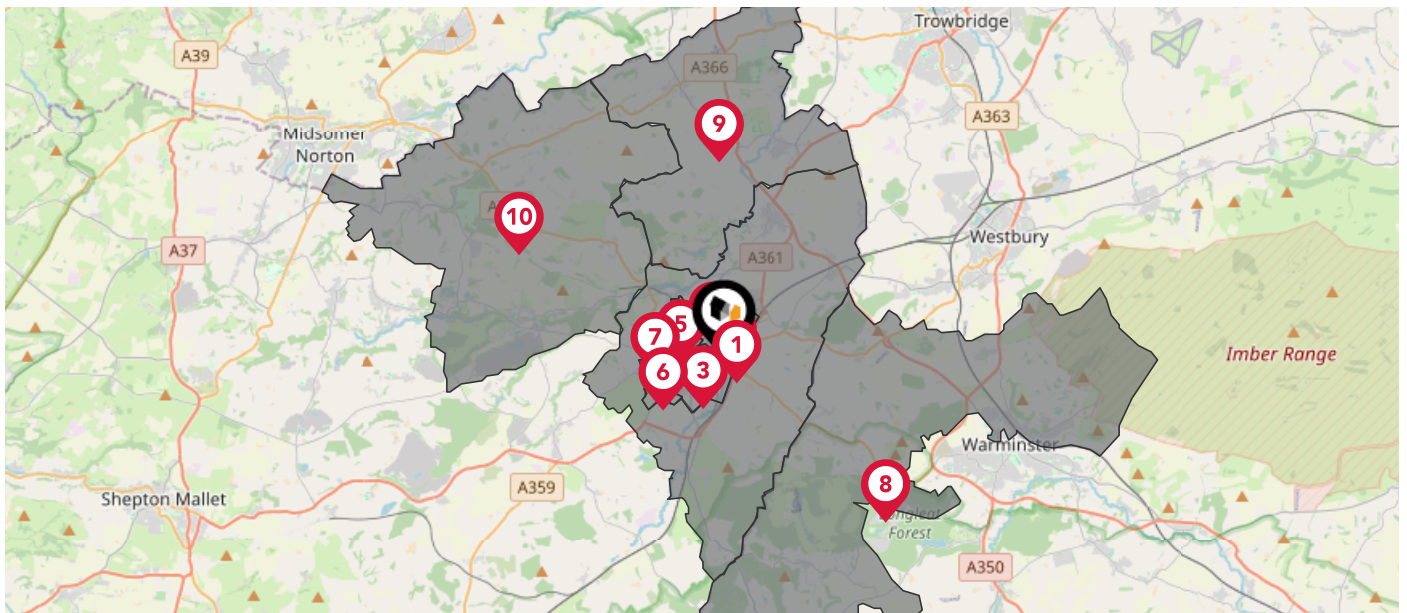

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. # Local Area Road Noise

COOPER  
AND  
TANNER

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB
