### Additional EPC Data

Property Type:	House
Build Form:	Mid-Terrace
Transaction Type:	Rental
Energy Tariff:	Single
Main Fuel:	Mains gas (not community)
Main Gas:	Yes
Flat Top Storey:	No
Top Storey:	0
Glazing Type:	Double glazing installed during or after 2002
Previous Extension:	0
Open Fireplace:	0
Ventilation:	Natural
Walls:	Cavity wall, as built, insulated (assumed)
Walls Energy:	Good
Roof:	Pitched, 100 mm loft insulation
Roof Energy:	Average
Main Heating:	Boiler and radiators, mains gas
Main Heating Controls:	Programmer, room thermostat and TRVs
Hot Water System:	From main system
Hot Water Energy Efficiency:	Good
Lighting:	Low energy lighting in 89% of fixed outlets
Floors:	Solid, insulated (assumed)
Total Floor Area:	57 m <sup>2</sup>

# Material Information

#### **Building Safety**

At the time of marketing we have not been made aware of any building safety issues.

#### Accessibility / Adaptations

The property is accessed via a small step into the front door.

#### **Restrictive Covenants**

At the time of marketing we have not been made aware of any restrictive covenants.

### Rights of Way (Public & Private)

At the time of marketing we have not been made aware of any rights of way.

#### **Construction Type**

To our knowledge the build is standard construction.

# Cooper and Tanner **About Us**

COOPER and TANNER

#### **Cooper and Tanner**

We are estate and letting agents, auctioneers and surveyors. Providing specialist advice on residential, agricultural and commercial property as well as livestock, agricultural machinery and antiques. We are proudly a multidiscipline practice that covers a diverse range of services. The firm has been established for over 100 years, and we continue to evolve and adapt our business to meet the needs of our clients while honouring our rich history. We operate from twelve locations throughout Somerset and Wiltshire. Within the towns and nearby villages of Bridgwater, Castle Cary, Cheddar, Frome, Glastonbury, Midsomer Norton, Shepton Mallet, Standerwick, Street, Warminster, Wedmore and Wells. Covering some beautiful areas such as the Mendip Hills, Somerset Levels, Wiltshire Downs, Chew Valley, Cam Valley and the Blackmore Vale. Our professional and valuation services stretch beyond and cover some of the larger conurbations of Bristol, Bath, Salisbury, Yeovil, Taunton, and Trowbridge. We are regulated by the Royal Institution of Chartered Surveyors (RICS) and Property Mark (NAEA). If you have any queries, please contact any of our offices – you will receive a warm and professional welcome.

### Cooper and Tanner **Testimonials**

#### **Testimonial 1**

We predominately dealt with Shelly at the Frome branch through the process of buying and selling our house. Over the last 18 months Shelly has been pretty much the only agent in town who has bothered to keep me up to date with what was coming on the market etc. Not only did we sell through C&T but when it came to purchasing (also through them) they really worked hard to make the deal work for everyone. A very positive experience.

#### **Testimonial 2**

Cooper and Tanner in Frome were highly recommended to us – and we are delighted that we listened! We have found them to be experts in their field with excellent local knowledge and a very clear understanding of the market. Adam and his team have been professional, helpful and supportive throughout the process – far above and beyond the call of duty - and a real pleasure to deal with.

#### **Testimonial 3**

In the last 2 years or so we have bought twice and sold once with Cooper and Tanner in Frome. Adam Scott and his entire team have been really great throughout. All three transaction had complications that needed to be sorted out, especially the last one that took 6 months to complete with many twists and turns. Adam has been so patient and energetic and on the ball, on top of the situation throughout. He builds a great rapport with both buyer and seller.

#### **Testimonial 4**

We had a sale agreed on our property early in 2023 after only being available for a few days. Throughout the selling process Cooper & Tanner in Frome were consistently helpful and supportive. Furthermore, they demonstrated that they had a very clear understanding of the market. They were a pleasure to deal with and in particular, Adam Scott (Branch Manager) & Ross Bowers (Senior Negotiator) were always on hand if we had any problems or worries.

# Flood Risk Surface Water - Flood Risk

This map shows the chance of flooding where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas.

#### Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk an area which has a chance of flooding of greater than 1 in 1000 (0.25%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.25%) in any one year.

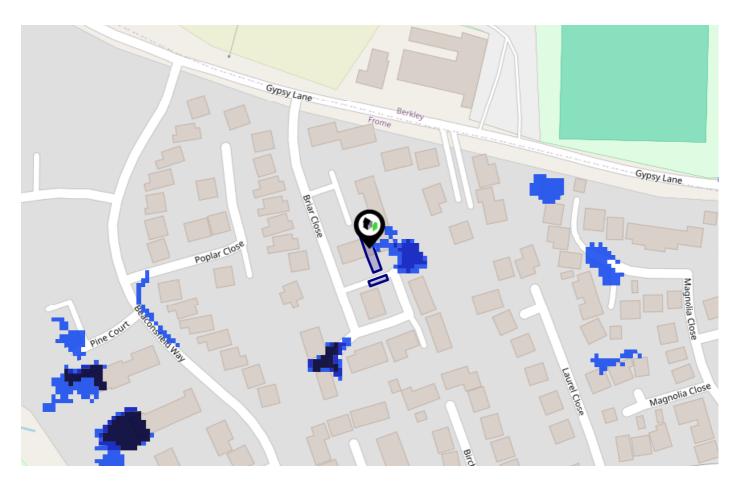

# Flood Risk Surface Water - Climate Change

This map shows the future chance of flooding **between 2040 and 2060** where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

COOPER

TANNER

#### Risk Rating: Very low

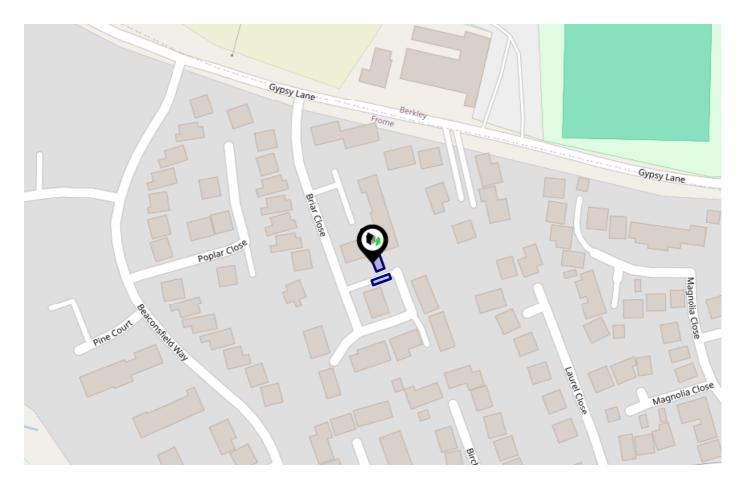

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.1%) in any one year.

# Flood Risk **Rivers & Seas - Flood Risk**

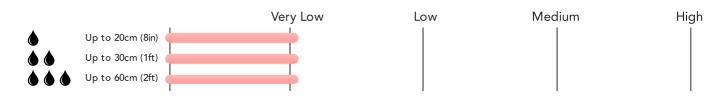

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

#### Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk an area which has a chance of flooding of greater than 1 in 1000 (0.25%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.25%) in any one year.

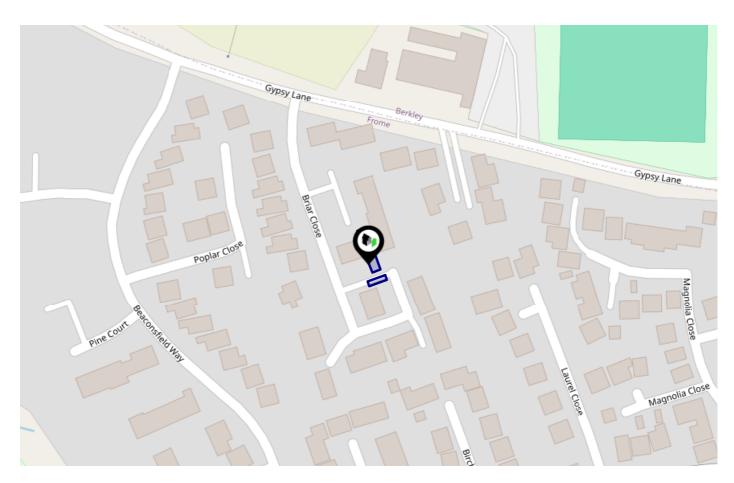

# Flood Risk Rivers & Seas - Climate Change

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.1%) in any one year.

### Maps Conservation Areas

### COOPER <sup>and</sup> TANNER

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

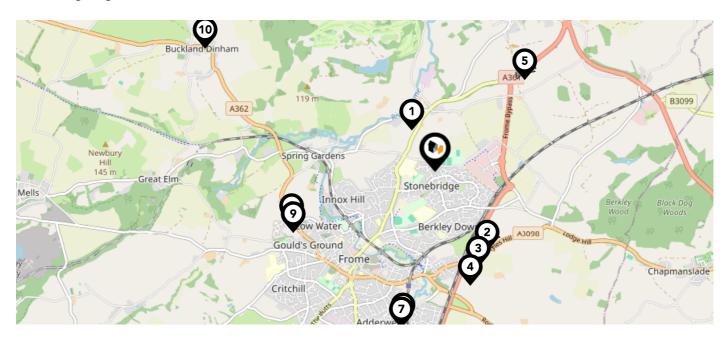

Nearby Cons	ervation Areas
1	Lullington and Orchardleigh
2	Frome
3	Beckington
4	Buckland Dinham
5	Rode
6	Mells
7	Nunney
8	Westbury
9	Warminster
10	Kilmersdon

### Maps Landfill Sites

This map displays the location of known landfill sites. Historic sites are where there is no environmental permit in force. Active sites are currently authorised by the Environment Agency under Environmental Permitting Regulations.

10	Buckland Dinham-Frome, Somerset	Historic Landfill	

# Maps Coal Mining

This map displays nearby coal mine entrances and their classifications.

#### Mine Entry

- × Adit
- × Gutter Pit
- × Shaft

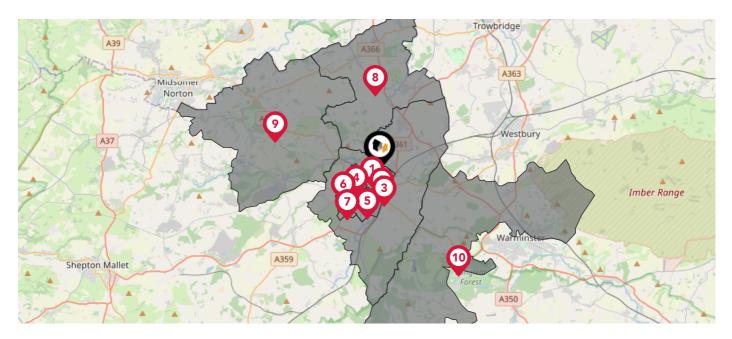

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

# Maps Council Wards

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

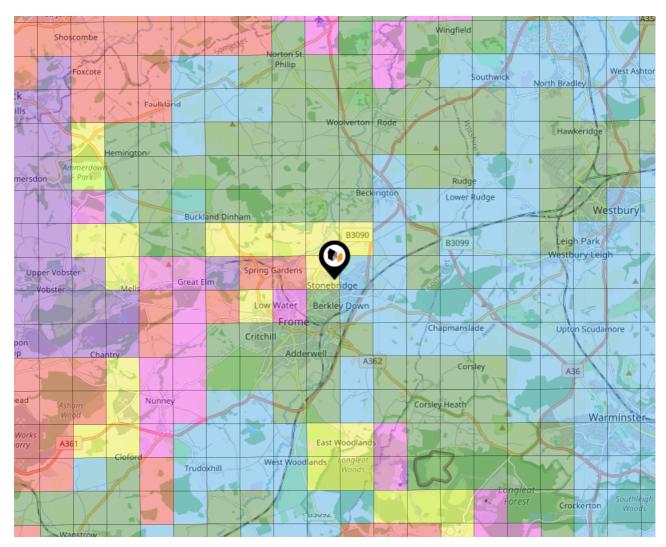

Nearby Cou	Nearby Council Wards

# Environment Radon Gas

#### What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m3).

# Environment Soils & Clay

# Local Area Road Noise

### COOPER and TANNER

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:
