

DESCRIPTION

Having undergone a comprehensive refurbishment by the current owners, this late Victorian residence, built circa 1889 and formerly a Methodist Chapel, boasts ample internal space and retains a wealth of original charm and features. The current layout includes a ground floor living/dining kitchen, a fitted bathroom, and two bedrooms on the first floor. The impressive 'Nave' presents abundant potential. Currently, the Nave and the first floor have approved planning permission for change of use of storage area to form cafe including the installation of mezzanine floor, internal and external alterations including the installation of mezzanine floor to enlarge existing property and installation of roof lights to existing roof. The property is ideal for those buyers seeking a ready-made living accommodation with potential for further enhancement, while wanting to run a local small business with potential earning income; perfect for buyers wanting a "work from home" balance. The central location on the High Street in Rocester further enhances the earning income for the potential business. The property has had a new roof, making maintenance hassle free. Furthermore, all rooms except the bedrooms have underfloor heating.

The property benefits from mains services, including gas, water, and electric, with certain areas of the refurbished dwelling enjoying underfloor heating. Ideally situated in the heart of Rocester village, residents will find numerous local amenities within easy reach, along with convenient access to major road links such as the A50, M1, and M6. The Peak District, Alton Towers are situated within close driving proximity, while the Rocester JCB lakes provide a scenic walking distance retreat.

Viewings on this property are highly recommended to appreciate the scope of accommodation on offer.

DIRECTIONS

Directions - From the A50 at Uttoxeter take the B5030 towards Rocester, Denstone and Alton Towers. As you approach JCB on your left, take the right hand turn into the village of Rocester where the Chapel is then situated on your left hand side after approximately 150 yards.

ENTRANCE VESTIBULE

NAVE

41'1" x 27'7"

The project entails converting a 'nave' area into a cafe, which will include the addition of a mezzanine floor.
