Stanley House

Works Road, Letchworth SG6 1JY

LETCHWORTH

Letchworth is a major commercial centre in North Hertfordshire adjoining Junction 9 of the A1(M) approximately 39 miles north of Central London.

This famous town offers an attractive landscaped design and has a modern commercial area centred on the Business Park.

Communications are excellent with an addition to the A1M, the A405 providing an east west link between the M1 and Luton and the M11 and Cambridge. There is a fast train service to London King's Cross / St. Pancras and Cambridge and the north.

The adjoining centres of Stevenage, Hitchin and Baldock are easily accessible.

LOCATION

The property is centrally located in the main commercial area within a convenient distance of the town centre and station.

It fronts onto Works Road with vehicular access at the side from Arden Press Way.

DESCRIPTION

A high quality, self-contained, detached warehouse and office facility.

Originally purpose built for an owner occupier it has been fitted out to a high specification throughout.

It comprises a 2-storey office building with a high specification warehouse / workshop area linked via a single storey office / service area.

It stands in a fully self-contained site with visitor / staff car parking and separate gated secure yard.

As currently configured the ground floor comprises an attractive entrance, a large open-plan office, 2 meeting rooms and 2 small offices. The first floor provides open plan office accommodation.

There are toilets on both floors and a shower on the ground floor.

The offices have recently been recarpeted and refitted with new LED lighting and air conditioning.

The link section is fitted out in a similar way and includes a staff amenity area.

The warehouse / workshop is constructed of steel portal frame with an eaves height of approximately 7.6m. In addition to roof lights, there are high level windows to the perimeter walls which provides excellent natural light. All internal walls are blockwork.

There's an extensive range of existing services. To the rear there are 2 full height loading doors which provides access to a self-contained and gated yard area.

The building could be readily configured in a number of ways to provide an interesting mix of industrial, office, laboratory, service area and storage space according to individual requirements. It would provide an occupier with a strong individual identity.
