WHERE EVERYTHING COMES TOGETHER

A photograph of a modern glass skyscraper, likely a hotel or office building, under a blue sky with light clouds. The building has a curved facade and is covered in glass windows. The number '101' is visible on the top corner of the building. In the foreground, there is a lower-level structure with a glass entrance and a sign that says 'Q PARK'. The overall scene is brightly lit, suggesting daytime.

As the world's first industrial city, Manchester has come full circle to once again be a powerhouse of economic progress. Voted the best overall choice for business in the UK outside London, the city is now attracting increasing national and international companies, all drawn by its competitiveness, its transport links and its highly motivated and skilled workforce.

With the expansion of the BBC at MediaCityUK in 2011 and plans for massive public transport investment, Manchester is now even better placed as a business destination for the future.

Manchester also leads the field in the sporting arena, being recently voted the world's best 'Sport City', for its successful hosting of major international events.
