AT A GLANCE

JUST SOME OF THE REASONS WHY ONE FRIARY IS AN EXCEPTIONAL PLACE TO WORK...

EPC A and BREEAM Outstanding

Well and Active Score Gold

Double-height entrance lobby with high-quality finishes and contemporary art installation from local artist, Frea Buckler

78 secure cycle spaces, and bike-maintenance area

Reusing 85% of the existing concrete frame

Charging for e-bikes and electric cars

Generous proportions and flexible floorspace

High-quality showers, toilets, secure lockers and changing rooms

Floor-to-ceiling triple glazing throughout to maximise natural light

Roof terrace demised to the sixth level with uninterrupted views across historic Temple Meads station and the Mendip Hills

Ideal location in a well-connected, flourishing commercial district

11 car-park spaces (5 disabled) and two motorbike spaces

A DESTINATION STATION

One Friary is just one minute's walk from Temple Meads railway station. So you're off the train and into the office in no time. Straight past the taxi queues.

If you need to use a car, this part of the city offers easy access to the M4 and M5, and beyond to the national motorway network. Plus, the regeneration of the area is making public transport, walking and cycling much easier.

AN AREA REIMAGINED

POSITIONED TO PROSPER

Temple Quay is an area being reimagined and rejuvenated. Creating a hub for enterprise and expansion, designed to launch new ventures and revitalise established ones.

Temple Meads station is undergoing a £96 million

transformation, with passenger numbers due to double from 11 million to 22 million a year by 2040. The refurbishments will strengthen the station's role as the region's largest transport hub, making it more efficient and fully accessible for all passengers.

Right next to vital rail and road links, One Friary places you in and among the burgeoning business community of Temple Quay.

AN ENTRANCE WITH IMPACT

The reception area of One Friary is designed as a double-height atrium, with superb-quality finishes, and imaginative planting that brings a feeling of nature indoors. Floor-to-ceiling windows provide wall-to-wall light as you're passing through, with aromas of the coffee bar completing the sensory experience.

Looking up, you'll notice a huge colourful sculpture above your head – and from the outside, it seems to burst through the wall, hugging the building. This stunning commissioned installation, from local artist Frea Buckler, is part of our investment in Bristol's future.

Freya Buckler's brief was to create an artwork that would connect visitors and users of the building to their surroundings, the vibrant Temple Quay area.

A PLACE FOR

View of facilities

PEOPLE

One Friary offers all the facilities you need after your journey to the office – whether you're walking, jogging, cycling or driving.

The showers and changing rooms are spa quality, and there's plenty of secure cycle storage, and a bike-maintenance area. You can also charge your e-bike or electric vehicle while you work, and there's parking for cars and motorbikes.

UPLIFTING ENVIRONMENT

WHERE WORK IS AN EXPERIENCE

View of sixth-level terrace

For a refreshing break from the office, the demised sixth-level terrace opens up spectacular views over Temple Meads station to the Mendip Hills beyond. You can also see the brightly coloured Totterdown terraces – one of the most ‘Bristol’ views imaginable.

During Construction

- By retaining the existing structure, **1,730 t CO2e of embodied carbon is captured.**
- **57% of total embodied carbon is saved** by reusing the structure. Meeting the LETI 2030 target for embodied carbon.
- The steel frame and precast GRC façade both have a **very long-life span** of 100+ years.
- As part of our BREEAM 'Outstanding' target we are minimising waste and increasing material efficiency – **targeting zero waste to landfill.**
- We are **saving over 50 tonnes of high-quality reclaimed flooring.**

In Operation

- **100% electric building.** Each floor sub-metered.
- **400W peak output photovoltaic panels** on roof.
- **Electric vehicle charging.**
- Automatic **LED lighting** controls with passive infrared sensors.
- VRF serving heating and cooling loads results in **31% reduction in energy consumption and 23% reduction in carbon emissions** when compared to alternative systems.
- **Mechanical heat recovery ventilation** to each floor.
- **Low water use appliances** on all floors.
- **Exposed concrete soffits** designed to act as a heat sink - reducing cooling or heating loads.
- **Enhanced indoor air quality** through improved air ventilation and filtration systems.
- Connected to **Bristol's District Heat Network.**
- Bee hotel and bird boxes **promoting biodiversity.**
