

Hawthorn Gardens

MINSTERWORTH • GLOUCESTERSHIRE

A DEVELOPMENT OF LUXURY 4 AND 5 BEDROOM FAMILY HOMES

Hawthorn Gardens

The village of Minsterworth is located on the A48 main road between Gloucester and Chepstow and is on the doorstep of the Royal Forest of Dean. It lies on the border of Gloucester on the north bank of the River Severn and is one of the best places to view the famous Severn Bore.

The small village of Minsterworth is claimed, by some, to be one of the longest as it stretches for several miles along the A48. The village also has a long history and was at one point owned by the rebellious Simon de Montfort 6th Earl of Leicester.

The existence of a church at Minsterworth dates back to medieval times with a list of incumbents displayed in the church going back as far as 1261. The present church of St Peter's lies between the A48 and the river and was built towards the end of the 19th century, replacing the previous building that had deteriorated. A carving in the church of three salmon caught in a fishing net depicts the salmon-fishing industry that was once a big part of the local economy - fishing for elvers remains an important activity today.

The river is at the heart of the community and Minsterworth is considered one of the best viewing points for the famous Severn Bore - an impressive tidal wave of water which works its way up the Severn Estuary over 25 miles between Awre and Gloucester - attracting hosts of spectators and extreme sports enthusiasts on a number of occasions every year.

However, if water is not your thing then there are plenty of other ways to enjoy the countryside with numerous trails available at nearby Forest of Dean to experience either on foot, by bike or on horseback. Meanwhile, more conventional entertainment and shopping options can be found in Gloucester at the ever-expanding Gloucester Quays which is less than 5 miles away.

GLOUCESTERSHIRE

Modern energy efficient homes

IN THE HEART OF THE COUNTRY

These beautiful family homes at Hawthorn Gardens enjoy superb outdoor space, with bi-fold doors opening out onto the rear gardens bringing the outdoors in, and benefit from fantastic tranquil views into the surrounding gardens and mature landscape.

Located on the A48, Hawthorn Gardens enjoys easy access east to Gloucester and west to Minsterworth just along the road with a butchers and also the Severn & Wye Smokery café, restaurant and foodstore further towards Westbury-on-Severn, while the nearest pub is the famous Severn Bore Inn – a popular spot to watch the waves of water come up the river.

There are three different housetypes available at Hawthorn Gardens each benefitting from fantastic living spaces and a high quality specification. These homes have been individually designed using the combined expertise and experience of architects,

interior designers, landscape designers and ecologists to deliver the very best in modern living. The homes here have been built using traditional methods and features that reflect the local environment in conjunction with today's standards of efficiency and luxury.

For your peace of mind, the properties also benefit from a 10-year warranty. Modern features such as smart meters and superfast broadband capability are in place as standard plus communal landscaping, street lighting, furniture and compost bins – all helping to give a community aspect to this private estate.

Sustainability and ecology

During the design process of the overall master plan for Hawthorn Gardens we worked closely with both Ecologists and Arboriculturalists with the aim of enhancing the already mature landscape with green spaces and habitats as well as considering the wider environmental issues.

Outdoor space enhancement

From initial evaluation of the open space surrounding the properties it was concluded that the area was suitable for the inclusion of various natural habitats improving the biodiversity of the surroundings and enhancing the homeowners experience.

Large parts of the mature landscape surrounding the private residence has been maintained and protected throughout construction to provide screening and protection for the existing wildlife on the development.

At the rear of the properties adjoining the gardens we have enhanced the arable land working closely with landscape designers and ecologists to deliver a space that can be enjoyed. This area provides natural ecological value that improves the environment and creates a green landscaped outlook for the homeowners.

Ecology considerations

Ecosystems can have a significant impact on mental health as exposure to natural environments has been shown to improve mental health as well as reduce stress, anxiety, and depression.

Protecting and restoring ecosystems is important not only for the environment, but also for the health and well-being of individuals and communities, which is why, as part of this development, we are incorporating native hedgerow and trees to encourage wildlife habitation.

During the design process we will always have sustainability and energy preservation at the forefront of the brief as we consider the existing environment and how our homes will impact on this.

Energy efficiency

Our homes are supplemented with renewable energy through the use of solar PV and air source heat pumps and the incorporation of SUDS drainage systems that reduce the impact on local infrastructure. Low energy lighting and reduced water consumption are incorporated into the specification as well as the use of efficient heating systems and smart meters. Furthermore, the availability of reliable public transport links are key to the promotion of sustainable living and we do also provide EV charging points to all new homes.

Solar PV panels

Air source heat pump
