Primary energy use

The primary energy use for this property per year is 249 kilowatt hours per square metre (kWh/m²).

How this affects your energy bills

An average household would need to spend **£2,480 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £777 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2022** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 43,964 kWh per year for heating
 - 2,066 kWh per year for hot water

This property produces 13.0 tonnes of CO₂

This property's potential production 8.0 tonnes of CO₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Increase loft insulation to 270 mm	£100 - £350	£142
2. Internal wall insulation	£4,000 - £14,000	£425
3. Floor insulation (suspended floor)	£800 - £1,200	£126
4. Low energy lighting	£95	£83
