Energy performance certificate (EPC)			
Flat 1 Nelson House Nelson Road SALISBURY SP1 3LT	Energy rating	Valid until: 13 February 2029 Certificate number: 8100-1846-8229-5197-6213	
Property type	Mid-floor flat		
Total floor area		45 square metres	

### Rules on letting this property

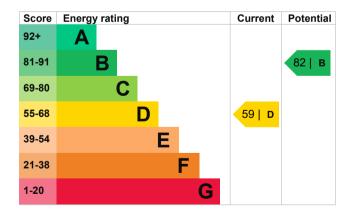

Properties can be rented if they have an energy rating from A to E.

If the property is rated F or G, it cannot be let, unless an exemption has been registered. You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

# Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy</u> performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Window	Fully double glazed	Average
Main heating	Electric storage heaters	Average
Main heating control	Manual charge control	Poor
Hot water	Electric immersion, off-peak	Very poor
Lighting	Low energy lighting in all fixed outlets	Very good
Roof	(another dwelling above)	N/A
Floor	(another dwelling below)	N/A
Secondary heating	Portable electric heaters (assumed)	N/A

#### Primary energy use

The primary energy use for this property per year is 483 kilowatt hours per square metre (kWh/m2).

Environmental impa property	ict of this	This property produces	3.7 tonnes of CO2
This property's current envi rating is E. It has the potent	•	This property's potential production	1.9 tonnes of CO2
Properties are rated in a sca based on how much carbor produce.		By making the <u>recommend</u> could reduce this property's 1.8 tonnes per year. This w environment.	s CO2 emissions by
Properties with an A rating	produce less CO2		
than G rated properties.		Environmental impact rating assumptions about average	
An average household produces	6 tonnes of CO2	energy use. They may not consumed by the people live	

# Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from D (59) to B (82).

Step	Typical installation cost	Typical yearly saving
1. Internal or external wall insulation	£4,000 - £14,000	£319
2. High heat retention storage heaters	£800 - £1,200	£141

#### Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

Estimated energy use and potential savings		(https://www.simpleenergyadvice.org.uk/).	
		Heating use in thi	s property
Estimated yearly energy cost for this property	£800	Heating a property us majority of energy co	•
Potential saving	£461	Estimated energ property	y used to heat this
The estimated cost shows how much the		Type of heating	Estimated energy used
average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.		Space heating	5286 kWh per year
		Water heating	1626 kWh per year
The potential saving shows how much money you could save if you <u>complete each</u>		Potential energy savings by installing insulation	
recommended step in order.		Type of insulation	Amount of energy saved
For advice on how to reduce your energy bills visit Simple Energy Advice		Solid wall insulation	3294 kWh per year

## Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
