Description

The property comprises a purpose built warehouse constructed in the mid 1990's. The demise comprises a three bay steel portal framed warehouse with ancillary offices set on a rectangular site which incorporates car parking and yard areas. The external elevations comprise cavity brick/block walls to a height of approximately 12 ft with lined profile metal cladding above. The entire property benefits from the installation of a sprinkler system. At either end of the building there are concrete surfaced yard areas serving the 9 dock loading doors and 2 level loading doors. These areas are generally triangular in shape and provide efficient turning space for lorries loading to/from the property. To the front of the office accommodation is a substantial car park with 88 spaces benefiting from barrier access.
