Introduction

Our Comments

Seller's comments...

We experienced that feel good factor the moment we stepped in this lovely bungalow nearly 20 yrs ago. We knew then we wanted to make this a special home.

Enjoying the privacy overlooking the green . The interior is very spacious and relaxing, the gardens are enjoyable and I've always grown vegetables and things in the back garden , however the front is very much an old feel, stepping directly on to the green scattered with tree makes it nice just to sit on my bench on a nice day., We enjoy a lovely community spirit amongst the neighbours.

We keep in touch on a group chat, and have an annual garden party. We have had many happy times, forever friends and wonderful family memories .

The no through road out the back makes parking easy and limited traffic.

It's convenient we are only a walk away from a local shop and indeed the town.

It will be very hard to uproot but times change and a new life beckons

Agent's comments...

Coal Mining

This map displays nearby coal mine entrances and their classifications.

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

4		70.0-74.9 dB	
3		65.0-69.9 dB

Radon Gas

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

Avocado Property Testimonials

Testimonial 1

I was on the market with a local agent for nearly 10 weeks, I was recommended Alistair by a work colleague, He sold my property close to the asking price in less then 2 weeks. If you want a personal professional service, Alistair is definitely the guy to call, would highly recommended - Christine Corcoran

Testimonial 2

We decided to sell our property and chose to use Alistair and Avocado as they offered a different type of approach to selling. Alistair provided a far more personal and hands on service than we had experienced with high street agents previously. He steered us through a difficult chain and gave us sound advice on a daily basis, with real time facts. We would highly recommend him for his commitment throughout the journey - Maggi Wells

Testimonial 3

We moved our house sale from a high street estate agent to Alistair after he was highly recommended. We decided to move agent as we felt our house was not being seen as much as had hoped for. Alistair was great through the whole process. We couldn't recommend him any more, he made what could be a very stressful time very easy. Thank you - Emily Parker

Testimonial 4

We have recently bought a property through Alistair. His service was a breath of fresh air in comparison to many of the high street brands that we had bought and sold properties through in the past. He was efficient, reliable and trustworthy. We would recommend him without hesitation. - Holly
