AGENTS NOTES

Buyers are advised the outbuildings in the garden are former commercial buildings. The current owners have had informal conversations with the local planning department over the possibility of building a completely separate dwelling in the garden in place of the outbuildings, something which has been given the indication would be highly likely, however buyers must make their own enquiries. There are solar panels to the south facing roof. The property is adjacent to a small village commercial vehicle garage.

THE GREAT OUTDOORS

The outside space on offer is extensive and split into various sections. Initially you will find an impressive hard standing driveway providing ample off road parking. This area doubles as a pleasant space for table and chairs also, as well as providing access to the garage to the right of the driveway and to the building on the left. Behind the wall you will then find formal garden areas with mature trees, mostly fruit, with a small fence which backs onto the stream at the bottom of the garden. The other section of garden is somewhat hidden and enclosed and is found behind the property, a private courtyard with paving and lawn as well as mature shrubs and trees as well as gated side access to the front. Also found within the gardens are extensive range of outbuildings totalling in excess of 1800 Sq. ft (stms). These buildings have in the main seen better days but are very useful for a number of purposes, not least as offering building potential whether that be for a detached annexe or separate dwelling (subject to the correct planning of course).
