Looking after the things we love and care about

FreemanHomes

Sustainable materials

We adopt a fabric-first approach to design, partnering with market-leading brands and local suppliers to maximise the property energy performance. Herefordshire-based Taylor Lane's timber frame construction utilises timber sourced from certified managed forests, offering the lowest CO₂ cost and heightened thermal efficiencies.

Zero Carbon Living

In addition to our sustainable designs, NIBE air source heat pumps and Viridian roof-integrated solar PV panels enable us to present zero-carbon, EPC A-rated properties with significantly lower running costs.

Ecology

Wildlife-friendly features such as hedgehog-friendly fencing, bird and bat nesting boxes, and bee bricks provide a place for people and nature. Ecology landscaping and wildlife buffer zones boost biodiversity.

Protecting our environment

Three Willows creates a place for people and nature. In addition to our sustainable design, materials selection, renewable technologies and wildlife-friendly features, we support The Wye Valley Society's Dark Skies Project. This reduces light pollution, but also makes for spectacular star-gazing on a clear night.

We align ourselves and our homes with 7 of the United Nations' Sustainable Development Goals to ensure we have a positive impact locally, and worldwide
