A creative community

Boutique and with a solid sense of place, Muro offers a warm and inviting environment.

The on-site café opens onto a pedestrianised piazza and a private tenth-floor terrace provides plenty of opportunities to collaborate with colleagues.

Designed to spark
chance encounters
and new ideas.

Our ambition was to bring an interconnectedness to the spaces, where a critical mass of talent interacts through chance encounters and the architecture provides a platform to support their distinct needs.

Nathaniel Lee
Architect, Apt

Let there be light

Muro's open-plan, interconnected spaces encourage connection and collaboration, while floor-to-ceiling windows flood the workspace with natural light, boosting productivity and enhancing wellbeing.

Natural light study

Muro boasts first-class levels of natural light penetration on all floorplates. 100% of the space is rated either primary or secondary on the KKS natural light index, which exceeds the 90% most buildings aspire to achieve.

With this access to high-quality daylight from top to bottom, Muro is one of the brightest schemes in London.

The KKS Index* score is based on dividing a floorplate into 3 grades of space: Prime, Secondary and Deep, each with decreasing proximity from a natural light source.

- Prime, the most desirable, is anything within 6 m.
- Whereas Secondary is anything between 6-12 m.
- Once you pass the 12 m threshold, you enter deep space.

*KKS Index- empirical evaluation method of building efficiency, by KKS Savills.
