This well-maintained three-bedroom home offers a practical layout, updated interiors, and a garden that connects directly to green space beyond. With thoughtful improvements throughout — including new flooring, appliances, and electrics — it's ready for everyday life without fuss. You enter through a small porch and into a hallway that leads straight through to the main living spaces. The living room sits at the front, with a wide double-glazed window overlooking the garden and new grey carpet underfoot, fitted in 2025. To the rear, the kitchen and dining area form a sociable, open space fitted with cream wall and base units, wooden worktops, and a mosaic tile splashback. Integrated appliances include a fridge freezer (2018), a Bosch dishwasher (2023), a gas hob and a newly installed Beko oven (2025). A chrome sink sits beneath a double-glazed window, and glazed doors open directly onto the patio. Spotlights, a radiator, and grey wood-effect laminate flooring (which was new in 2022) continue the clean, neutral look. Off the kitchen is a practical utility room with matching cabinetry and worktops, additional chrome sink, and space for a washing machine and tumble dryer. There's also direct access out to the garden from here. The boiler was replaced with an Alpha model in 2022. Upstairs, a central landing with white painted balustrades and grey carpet leads to three bedrooms. The main bedroom is a good-sized double with built-in shelving and views to the front. The second is another double, looking over the back garden. The third is a single bedroom, also facing the front. All three rooms have radiators, double-glazed windows, and were re-carpeted in 2025. The bathroom has a white suite with a P-shaped bath and overhead shower, chrome fittings, a heated towel rail, and partly tiled walls with a metallic feature strip. New floor 2022 Outside, the rear garden is a mix of paving and planting, with an Egyptian sandstone patio, lawned section, and a raised decked area at the far end. A summer house with power sits at the back — useful as a workspace, hobby room, or for storage. There's also a shed tucked neatly at the side of the property, ideal for tools or garden equipment, and a side gate providing direct access to the front. The front garden is tiered and landscaped with mature shrubs, steps leading down to the entrance, and enclosed hedging. A footpath beside the house leads directly to nearby fields, with a recreation ground and park just behind.

Additional updates include a new fuse board fitted in 2025, white internal doors with chrome handles, and a smart meter installation due in June.
