KFB: Key Facts For Buyers

A Guide to This Property & the Local Area

Wednesday 26th March 2025

109, KESTEVEN ROAD, STAMFORD, PE9 1SS

Ellie Hinton-Bardwell Powered by eXp

01780431202

ellie.hinton-bardwell@exp.uk.com

www.elliehintonbardwell.exp.uk.com/

This three-bedroom semi-detached home on Kesteven Road is bursting with potential, ready for a complete transformation. A spacious front garden welcomes you, offering scope for off-road parking or a beautifully landscaped approach.

Inside, the traditional layout is waiting for modern touches. The well-proportioned lounge is ideal for creating a cosy retreat, while the kitchen and utility area offer exciting possibilities for an open-plan redesign. Upstairs, three generous bedrooms provide space to shape into peaceful havens, and the bathroom presents an opportunity for a stylish update.

The highlight? A fantastic rear garden backing onto school fields, offering both privacy and potential to extend. Imagine summer evenings outdoors, entertaining or simply enjoying the space.

Internal photographs are available upon request however viewing is highly recommended to appreciate the potential of this fantastic property.

Property Overview

Property

Type:	Semi-Detached
Bedrooms:	3
Floor Area:	871 ft ² / 81 m ²
Plot Area:	0.09 acres
Council Tax :	Band B
Annual Estimate:	£1,645
Title Number:	LL30972

This map displays nearby coal mine entrances and their classifications.

Mine Entry

- ✖ Adit
- ✖ Gutter Pit
- ✖ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

Nearby Conservation Areas

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- **High Risk** - an area which has a chance of flooding of greater than **1 in 30 (3.3%)** in any one year.
- **Medium Risk** - an area which has a chance of flooding of greater than **1 in 100 (1.0%)** in any one year.
- **Low Risk** - an area which has a chance of flooding of greater than **1 in 1000 (0.25%)** in any one year.
- **Very Low Risk** - an area in which the risk is below **1 in 1000 (0.25%)** in any one year.

Chance of flooding to the following depths at this property:

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- █ **High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- █ **Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- █ **Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- █ **Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Chance of flooding to the following depths at this property:

This map shows the chance of flooding where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas.

Risk Rating: Low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- █ **High Risk** - an area which has a chance of flooding of greater than **1 in 30 (3.3%)** in any one year.
- █ **Medium Risk** - an area which has a chance of flooding of greater than **1 in 100 (1.0%)** in any one year.
- █ **Low Risk** - an area which has a chance of flooding of greater than **1 in 1000 (0.25%)** in any one year.
- █ **Very Low Risk** - an area in which the risk is below **1 in 1000 (0.25%)** in any one year.

Chance of flooding to the following depths at this property:

Surface Water - Climate Change

This map shows the future chance of flooding **between 2040 and 2060** where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- █ **High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- █ 75.0+ dB
- █ 70.0-74.9 dB
- █ 65.0-69.9 dB
- █ 60.0-64.9 dB
- █ 55.0-59.9 dB

My Estate Agency evolved after years of being in the industry in various roles, with various companies and compiling a list of mental notes on how I could be better. How I could offer more support, for less?

"My goal is not to have the biggest market portfolio. In fact, my goal is to have the biggest impact on people. I want you to remember me and my services long term and by doing this, I realised that I need a smaller amount of the market, offering a boutique service within the Estate Agency world where I create impactful relationships with those in the local community."

I offer a new and unique experience when it comes to selling your home. I will encourage, be your confidant and expose you to the support you never knew you needed.

I am not your average Estate Agent. Let's meet for a coffee and I'll show you why.
