survey report on:

Property address	CREESIDE COTTAGE, NEWTON STEWART, DG8 6RB
Customer	EMMA MURRAY
Customer address	
Prepared by	DM Hall LLP
Date of inspection	3rd September 2024

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

Х

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether
 or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.²

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.1 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Detached and extended cottage with ground floor and first floor accommodation.
Accommodation	GROUND FLOOR: Entrance Hall, Kitchen, Shower Room with Toilet, Sun Room/Utility Room, Four Reception/Public Rooms, Sun Lounge.
	FIRST FLOOR:
	Accessed from the Dining Room - One Bedroom with En Suite Shower Room and Toilet.
	Accessed from the Front Reception/Public Room - Bedroom with En Suite Bathroom and Toilet.
	Accessed from Rear Reception/Public Room - Bedroom with En Suite Shower Room and Toilet.
Gross internal floor area (m²)	169 SQM approximately.
Neighbourhood and location	The property is situated in a rural location. Main amenities are available in Newton Stewart. The property is surrounded by agricultural land.
Age	Built around 1850 with later extensions and reconfiguration. The property was extended in around 1998 and the annexe created from the garage in around 2000.
Weather	The property was inspected during dry weather conditions following a period of heavy rain.

Chimney stacks	Visually inspected with the aid of binoculars where appropriate.
	There are two chimney stacks of stone construction with lead flashings in place and chimney pots.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.
	If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
	The main roof is pitched and clad in slates with stone ridges. Valley gutters are formed and lined in metal material. There are dormers from the main roof areas with pitched slate roofs. Over the kitchen and sun lounge and ground floor shower room there is a flat roof clad in bitumen felt, with a pitched slate edge detail.
	The internal structure of the roof could not be inspected in detail as the rooms are constructed within the roof void.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.
	Roof gutters are of PVC construction discharging into gullies.
Main walls	Visually inspected with the aid of binoculars where appropriate.
	Foundations and concealed parts were not exposed or inspected.
	The main walls are mainly of stone construction and externally partly rendered. Walls to the kitchen and ground floor shower room area appear to be of cavity construction.
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.
	Random windows were opened and closed where possible.
	Doors and windows were not forced open.
	Main external windows are of uPVC construction with sealed unit double glazing. Some windows at first floor level are of a Velux type.
	External doors are of uPVC and some of these are glazed. There are PVC fascia boards.

Establish to a section of	
External decorations	None.
Conservatories / porches	Visually inspected.
	There is a sun lounge addition with stone walls and a uPVC frame with sealed unit double glazed under a pitched slate roof.
Communal areas	None.
	INOTIE.
Garages and permanent outbuildings	Visually inspected.
	There is a detached garage building incorporating a two car garage with up and over doors in addition to accommodation providing kitchen at ground level and bedroom/living room at upper floor level with en suite shower room.
	In addition there are external wood sheds, a range of timber sheds, a timber garden room and workshop.
Outside areas and boundaries	Visually inspected.
	The property occupies an irregularly shaped plot which is laid partly to lawn with a gravel surfaced driveway. There is a pond feature in the garden area. External boundaries are formed in timber fencing and stone wall. Water course passes through the garden area.
	The site area is understood to extend to around 2.5 acres (1.02Ha).
	The site includes Lingree Bridge, which is understood to be a Category C listed structure.
Ceilings	Visually inspected from floor level.
	Ceilings are of plasterboard construction where noted with decorative finishes applied and ceilings are sloping at upper floor level.
Internal walls	Visually inspected from floor level.
monai wano	
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal walls are a combination of masonry and timber studded construction with decorative finishes applied.
Floors including sub floors	Floors are of solid construction at ground floor level and suspended timber at upper floor level. Fitted floor coverings limited the
	inspection.

Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	In the kitchen there is a range of wall and base units with worktops. There are timber skirting boards and architraves. Internal doors are timber. There are timber staircases.
Chimney breasts and fireplaces	Visually inspected.
	No testing of the flues or fittings was carried out.
	There are solid fuel stoves installed in the property.
Internal decorations	Visually inspected.
	Mainly paint finishes.
Cellars	None.
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
	There is a mains electrical connection with distribution where noted in PVC. There are miniature circuit breakers fitted.
Gas	None.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	There is a mains water connection with distribution to sanitary fittings in copper and plastic. Sanitary fittings comprise in the kitchen a sink unit and in the ground floor wet room/shower room a flush toilet, wash hand basin and walk in shower with mixer fitting. In two of the en suites at first floor level there are flush toilets, wash hand basins and shower cubicles with mixer shower fittings and in the en suite bathroom there is a flush toilet, wash hand basin and panelled bath with separate shower cubicle and mixer shower fitting.

Heating and hot water

Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.

No tests whatsoever were carried out to the system or appliances.

There is an oil fired central heating system to a Worcester boiler with distribution to underfloor heating units and radiators.

Hot water is provided from the central heating system and there is a hot water storage tank incorporating foam insulating layer.

Drainage

Drainage covers etc were not lifted.

Neither drains nor drainage systems were tested.

There is a septic tank drainage system serving the subject property only.

No manholes were lifted on site.

Fire, smoke and burglar alarms

Visually inspected.

No tests whatsoever were carried out to the system or appliances.

There are smoke detectors, heat detectors and Carbon Monoxide detectors installed.

Legislation by the Scottish Government, which took effect from February 2022, requires all residential properties to have a system of inter-linked smoke alarms and heat detectors. Carbon monoxide detectors are also required where appropriate. Purchasers should appraise themselves of the requirements of this legislation, and engage with appropriately accredited contractors to ensure compliance.

Any additional limits to inspection

Parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.

I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation I have assumed that there is no Japanese Knotweed or other invasive plants within the boundaries of the property or in neighbouring properties.

The report does not include an asbestos inspection. However asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor. Any such materials should not be drilled or disturbed without prior advice from a licensed specialist.

Random testing for dampness was undertaken internally with the use of a moisture meter where accessible and considered appropriate.

The property was occupied, fully furnished and all floors were covered. Floor coverings restricted my inspection of flooring.

In accordance with Health and Safety guidelines I have not

Any additional limits to inspection

disturbed insulation, furniture or personal effects (particularly in cupboards). Floor coverings have not been moved.

Personal effects in cupboards and fitted wardrobes were not moved and restricted my inspection.

My physical inspection of the roof void was limited as rooms as constructed within the roof void with no eaves access available.

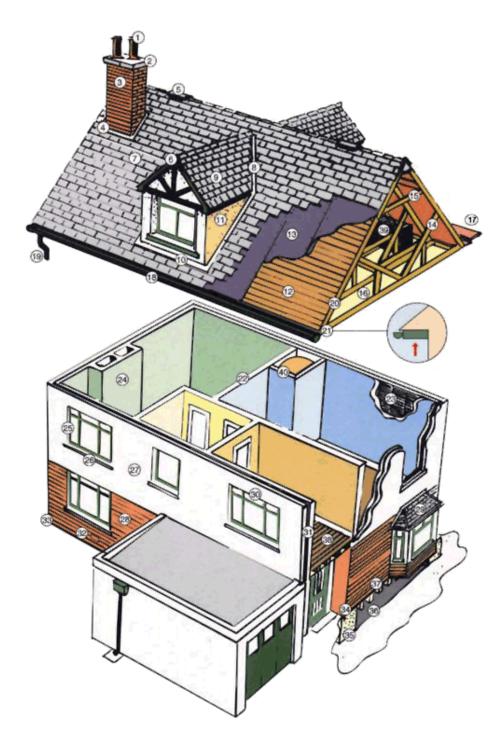

My inspection of the roof covering was restricted from ground level and some parts were not visible. The flat roof coverings were not fully visible from ground level.

Concealed areas beneath and around bath/shower trays were not visible. Water spillage in these areas can often be discovered unexpectedly with resultant damage to concealed parts of the fabric.

The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.

Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is out with the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1) Chimney pots
- 2) Coping stone
- 3) Chimney head

- 40 Hot water tank

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement		
Repair category	1	
Notes	No obvious evidence of significant movement noted within the limitations of my inspection.	

Dampness, rot and infestation	
Repair category	1
Notes	No obvious evidence of significant dampness, rot or wood boring insect infestation
	There is evidence of condensation in various locations. This may be alleviated by a proper balance of heating and ventilation. This should be monitored. Further advice can be obtained from a specialist contractor.

Chimney stacks	
Repair category	1
Notes	No significant defects evident.

Roofing including roof space		
Repair category	2	
Notes	Sections of roof are uneven suggesting deflection of the supporting timbers. A roofing contractor should inspect and carry out any remedial work required.	
	There are valley gutters. These can be problematic (especially within older buildings), and maintenance should be undertaken regularly. Some debris was noted in valley gutters.	
	There are a small number of dislodged slates. A licensed roofing contractor can inspect and advise further. Inspection at close quarters may reveal further deterioration/damage to roofing materials, especially where these are original.	

Roofing including roof space		
Repair category	2	
Notes	The flat bitumen felt covering over the kitchen and wet room will have a a limited life expectancy and can fail without warning. Inspection at close quarters may reveal further deterioration/damage to roofing materials, especially where these are original. A reputable roofing contractor will be able to provide further advice. It is understood that the flat roof was resealed in July 2024. Details should be transferred.	
	Natural slates have an expected lifespan of up to 100 years or more depending on slate quality, source, thickness and cutting skill of the slate. Slates will deteriorate over time; nail fixings will corrode and loosen resulting in on-going maintenance requirements. Close quarter and disruptive inspections may reveal damage to roofing materials, especially where these are original. Regular maintenance should be anticipated particularly after adverse weather conditions.	
	Inspection of the eaves was not possible as the bedroom and bathroom accommodation is constructed within the roof structure.	
	It is understood that since our inspection, gutters and rainwater fittings have been cleaned of debris. It is understood a roofing contractor has inspected the property in late Summer and details should be transferred.	

Rainwater fittings	
Repair category	1
Notes	No significant defects evident.

Main walls	
Repair category	1
Notes	No significant defects evident.
	Some sections of pointing are weathered.
	Door openings are fitted with floodgates.

Windows, external doors and joinery	
Repair category	2
Notes	The window units are of an older type. The seals to older double glazed units often fail resulting in condensation between the panes of glass. Failed sealed units can go undetected in certain weather/daylighting conditions and such failings are not considered to be significant because the window remains functional albeit not as double glazing. This can occur without warning and may only be seen in certain weather conditions The seals to a number of the double glazed window units have failed resulting in condensation between the panes of glass.

Windows, external doors and joinery	
Repair category	2
Notes	Windows and doors have been replaced in the past. Random windows and doors are opened but not all and inspections can be restricted by window blinds, curtains, ornaments etc.
	Handles, locks and opening mechanisms can deteriorate through usage and repair or replacement can be anticipated on an ad hoc basis. No assurances can be provided that all window fitments are functional.
	Door openings are fitted with floodgates.

External decorations	
Repair category	-
Notes	None.

Conservatories/porches	
Repair category	2
Notes	The seals to a number of the double glazed window units have failed resulting in condensation between the panes of glass.

Communal areas	Communal areas	
Repair category	-	
Notes	None.	

Garages and permanent outbuildings	
Repair category	2
Notes	The flat roof to the rear of the garage building will have a limited life.
	External permanent outbuildings appear in fair order for their current use.

Outside areas and boundaries	
Repair category	1
Notes	There is a water feature in the garden grounds and a watercourse passes through the site which may represent a health and safety issue.
	Some steps on site are uneven. Timber walkways may represent a slip hazard

Outside areas and boundaries	
Repair category	1
Notes	from time to time.

Ceilings	
Repair category	1
Notes	No significant defects evident.
	There is minor, non-structural plaster cracking to ceilings.

Internal walls	
Repair category	1
Notes	No significant defects evident.

Floors including sub-floors	
Repair category	1
Notes	No significant defects evident. It is not unusual to discover areas of past water spillage when floor coverings are removed in kitchen and bathroom compartments, revealing the need for further repair and maintenance work.

Internal joinery and kitchen fittings	
Repair category	1
Notes	No significant defects evident.
	The staircases may not meet current Building Standards.

Chimney breasts and fireplaces	
Repair category	1
Notes	No significant defects evident.
	Flues we understand, are swept and tested on an annual basis.
	Wood burning stoves stove has been installed in ground floor accommodation. It is assumed that the installations comply with the Building Standards.

Internal decorations	
Repair category	1
Notes	No significant defects evident.

Cellars	
Repair category	-
Notes	None.

Electricity	
Repair category	1
Notes	It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC/ SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IET regulations.

Gas	
Repair category	-
Notes	None.

Water, plumbing and bathroom fittings	
Repair category	1
Notes	No significant defects evident. Seals to baths and showers should be checked regularly and replaced when worn or split.

Heating and hot water	
Repair category	1
Notes	It is assumed that the heating and hot water systems have been properly serviced and maintained on a regular basis and installed in accordance with the relevant regulations.
	Boilers and central heating systems should be tested and serviced by an Oftec oil registered engineer on an annual basis to ensure their safe and efficient

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground and first
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

Usual enquiries should be made of the local authority. A Property Enquiry Certificate should be obtained.

The property is assumed to be held in 'Absolute Ownership' and free from any onerous restrictions or obligations.

The property has been altered and extended in the past. It is assumed all necessary Local Authority and other consents have been obtained for alterations and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent then it is assumed they meet the standards required by the Building Regulations or are exempt.

Drainage is to a septic tank. It is assumed that the tank is registered with SEPA. The position regarding age, location, condition and maintenance history should be clarified.

The property is identified by SEPA as being in an area of potential flood risk. The Market Valuation reported assumes that the property has not been affected by flooding. The purchasers should satisfy themselves in this regard. Further information can be obtained from SEPA.

The site includes Lingree Bridge, which is understood to be a Category C listed structure.

The site area is understood to extend to around 2.5 acres (1.02 Ha). The solicitor should confirm the position of and responsibility for external boundaries.

Estimated reinstatement cost for insurance purposes

£645,000 (Six Hundred and Forty Five Thousand Pounds) to include the cost of demolition, site clearance, rebuilding, fees and VAT where applicable.

It should be noted this sum is an estimate calculated by using a rate per square metre based on information provided by Building Cost Information Service (BCIS).

Valuation and market comments

The Market Value of the property is considered to be £380,000 (Three Hundred and Eighty Thousand Pounds). This reflects current market conditions.

Against a backdrop of changing economic circumstances and changing interest rates, it is not possible to predict how the market will perform in the coming months although market conditions continue to be stable at present.

General Remarks

An extended, detached cottage in a rural location.

The general condition of the property appears consistent with its age and type of construction.

The property is assumed to be held in 'Absolute Ownership' and free from any onerous restrictions or obligations.

The property has been altered and extended in the past. It is assumed all necessary Local Authority and other consents have been obtained for alterations and the appropriate documentation, including Building Warrants and Completion Certificates issued. If any works did not require consent then it is assumed they meet the standards required by the Building Regulations or are exempt.

Drainage is to a septic tank. It is assumed that the tank is registered with SEPA. The position regarding age, location, condition and maintenance history should be clarified.

The property is identified by SEPA as being in an area of potential flood risk. The Market Valuation reported assumes that the property has not been affected by flooding. The purchasers should satisfy themselves in this regard. Further information can be obtained from SEPA.

The site includes Lingree Bridge, which is understood to be a Category C listed structure.

The site area is understood to extend to around 2.5 acres (1.02 Ha). The solicitor should confirm the position of and responsibility for external boundaries.
