Floors: Average thermal transmittance 0.15 W/m-¦K

Total Floor Area: 79 m^2

Maps Coal Mining

This map displays nearby coal mine entrances and their classifications.

Mine Entry

× Adit

X Gutter Pit

× Shaft

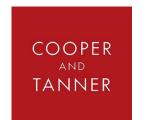

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Maps

Conservation Areas

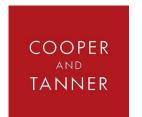

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

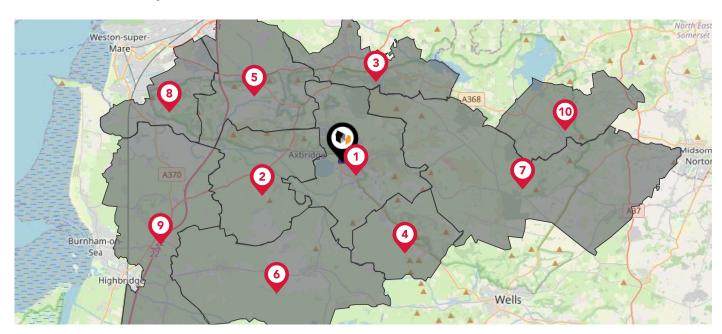

| Nearby Cons | servation Areas |

Maps

Council Wards

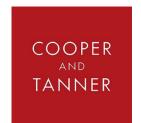

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

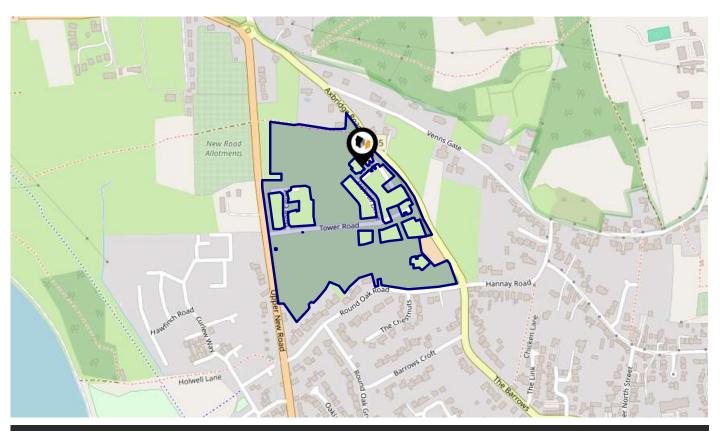

| Nearby Cour | ncil Wards |

| 10 | Mendip Ward |

Maps Rail Noise

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...

Rail Noise Data

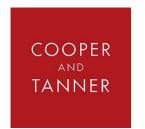

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

| 5 | 75.0+ dB | IJ |
|---------------|--------------|------------|
| $\overline{}$ | | _ |
| 4 | 70.0-74.9 dB | IJ |
| \equiv | | Ξ |
| 3 | 65.0-69.9 dB | U |
| \equiv | | $\bar{\ }$ |
| 2 | 60.0-64.9 dB | IJ |
| = | | _ |
| 1 | 55.0-59.9 dB | IJ |

Rivers & Seas - Flood Risk

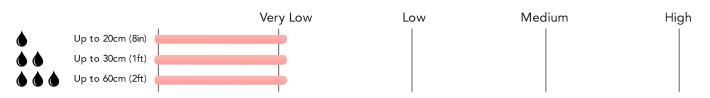

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

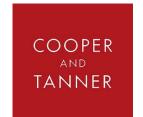

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- **High Risk -** an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- **Medium Risk -** an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- **Low Risk** an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.1%) in any one year.

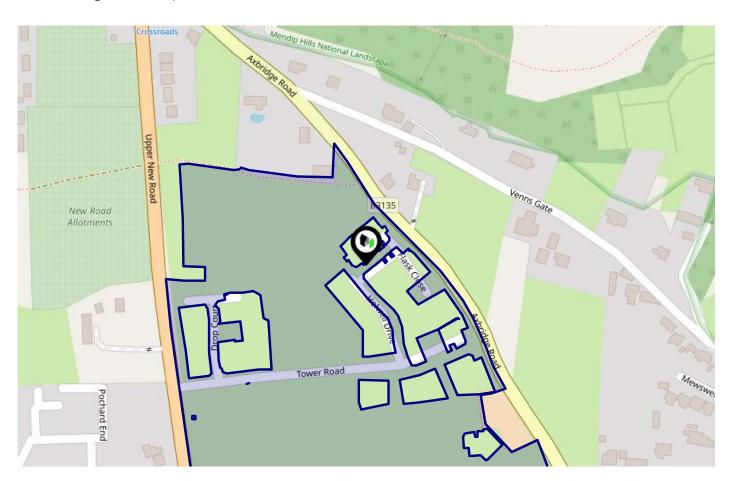

Rivers & Seas - Climate Change

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

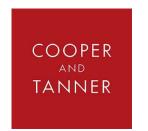

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

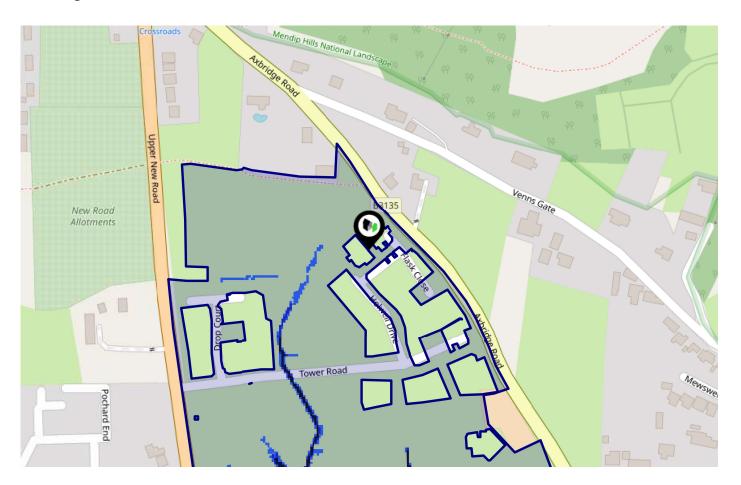

- **High Risk** an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- **Low Risk -** an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Surface Water - Flood Risk

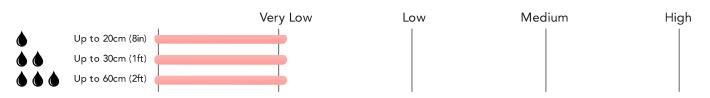

This map shows the chance of flooding where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas.

Risk Rating: Very low

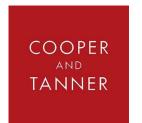

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- **High Risk -** an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- **Low Risk -** an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.1%) in any one year.

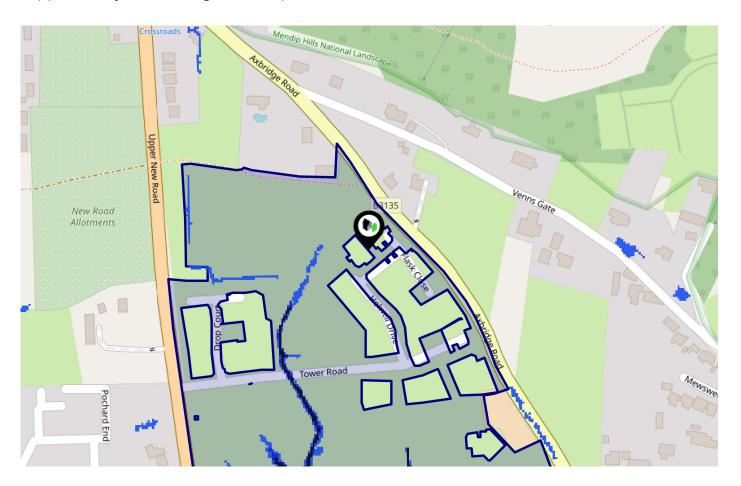

Surface Water - Climate Change

This map shows the future chance of flooding **between 2040 and 2060** where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

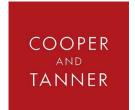

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

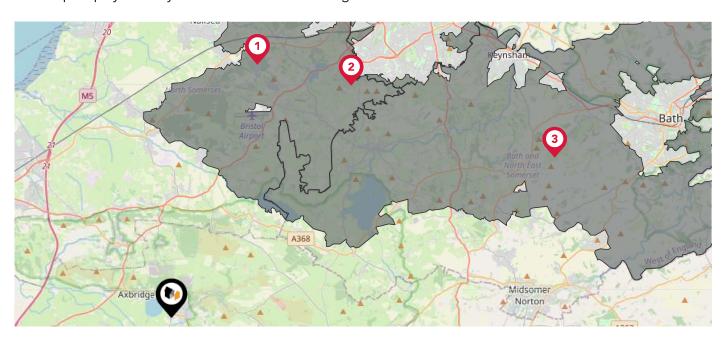

- **High Risk -** an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- **Low Risk -** an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- **Very Low Risk -** an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Environment

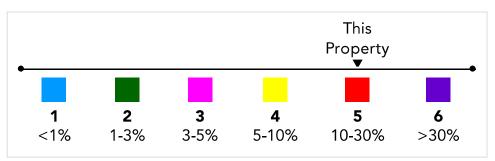

Radon Gas

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m3).

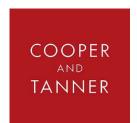

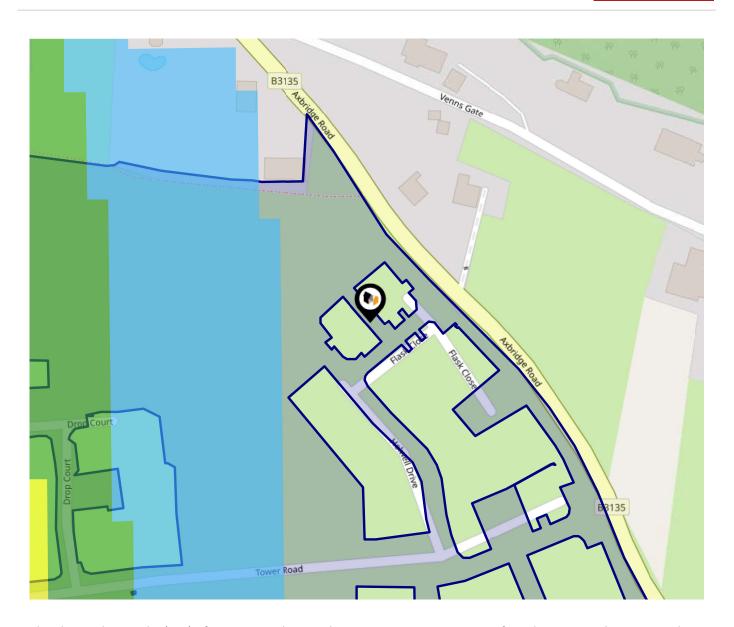

Local Area

Road Noise

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

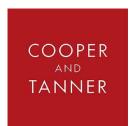

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB

Cooper and Tanner

About Us

COOPER AND TANNER

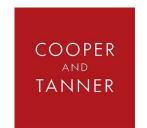

Cooper and Tanner

We are estate and letting agents, auctioneers and surveyors. Providing specialist advice on residential, agricultural and commercial property as well as livestock, agricultural machinery and antiques. We are proudly a multidiscipline practice that covers a diverse range of services. The firm has been established for over 100 years, and we continue to evolve and adapt our business to meet the needs of our clients while honouring our rich history. We operate from twelve locations throughout Somerset and Wiltshire. Within the towns and nearby villages of Bridgwater, Castle Cary, Cheddar, Frome, Glastonbury, Midsomer Norton, Shepton Mallet, Standerwick, Street, Warminster, Wedmore and Wells. Covering some beautiful areas such as the Mendip Hills, Somerset Levels, Wiltshire Downs, Chew Valley, Cam Valley and the Blackmore Vale. Our professional and valuation services stretch beyond and cover some of the larger conurbations of Bristol, Bath, Salisbury, Yeovil, Taunton, and Trowbridge. We are regulated by the Royal Institution of Chartered Surveyors (RICS) and Property Mark (NAEA). If you have any queries, please contact any of our offices - you will receive a warm and professional welcome.

Testimonials

Testimonial 1

We highly recommend Cooper and Tanner Cheddar. We had Mackenzie throughout our purchase, we also met Sally a couple of times. Even though we had to pull out of the first house; Mackenzie helped us with a knew place within the price and area of Cheddar that we were after. Communication was good throughout the process and on completion.

Testimonial 2

I would highly recommend Cooper & Tanner in Cheddar. The team were always very professional, friendly & helpful. They found us a property in Cheddar which was exactly what we were looking for. Christopher & Jackie were excellent, they answered all of our questions & queries. The purchase ran smoothly & the whole experience was great. Thank you so much to everyone at Cooper & Tanner Cheddar, we are very grateful for all your help & support.

Testimonial 3

What a fantastic agency! We recently bought a house and had a wonderful experience with these guys. A particular special mention to Jackie, Chris and Mackenzie who were incredibly efficient, understanding and just generally brilliant! Thank you so much for helping us purchase our beautiful home.

Testimonial 4

I bought a flat through Cooper and Tanner in Cheddar, and the whole experience was great. I had an early viewing on a property just about to go onto the market which was perfect for me. Carol handled my questions quickly, and when Carol wasn't in the office Chris picked them up and answered them. Professional, friendly, helpful. Would recommend.
