PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

Х

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether
 or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.²

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.1 **DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein

the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

| Description | Detached bungalow. |
|--------------------------------|--|
| | |
| Accommodation | The Accommodation comprises - Entrance Hall , Lounge , Dining Room with Kitchen off , Two Bedrooms & Shower Room ((with WC). |
| | |
| Gross internal floor area (m²) | 78 |
| | |
| Neighbourhood and location | The property forms part of a mixed residential/commercial area which lies on the periphery of the town centre, where all local amenities are readily available. Nearby non-residential uses comprise a doctors surgery and the local superstore. |
| | |
| Age | 45 years. |
| | |
| Weather | It was raining at the time of the inspection. Preceding the inspection the weather was changeable. |
| | |
| Chimney stacks | None. |

| Roofing including roof space | Sloping roofs were visually inspected with the aid of binoculars where appropriate. |
|-------------------------------------|--|
| | Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. |
| | Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. |
| | If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so. |
| | The roof is pitched, timber supported and clad externally in concrete interlocking tiles, topped in concrete ridging and finished in cement verging. |
| | Access to the roof space is via the hatch in the hallway. This area has been partially floored for light storage and glasswool insulation has been laid over the ceilings/joists. |
| Rainwater fittings | Visually inspected with the aid of binoculars where |
| Namwater mungs | appropriate. |
| | Rainwater discharge is via uPVC gutters and downpipes. |
| Main walls | Visually inspected with the aid of binoculars where appropriate. |
| | Foundations and concealed parts were not exposed or inspected. |
| | The main walls of the property are of modern timber framed construction, measuring approximately 300mm in thickness, finished externally in render, incorporating fresh air ventilators at base course level, all plasterboard dry lined internally. |
| Windows, external doors and joinery | Internal and external doors were opened and closed where keys were available. |
| | Random windows were opened and closed where possible. |
| | Doors and windows were not forced open. |
| | Access to the property is by means of a timber and glazed door to the entrance hall, and a timber door to the kitchen. |
| | The subjects are double glazed throughout, being fitted with what appear to be the original timber framed casement units. |
| | Fascia/soffit boards are formed in timber. |
| External decorations | Visually inspected. |
| | The external joinery is painted. |
| | |

None.

Conservatories / porches

| Communal areas | None. |
|---------------------------------------|--|
| Garages and permanent outbuildings | Visually inspected. |
| | There is a detached block built, rendered and alloy roofed single garage, with adjoining rear storage area adjacent to the property. |
| Outside areas and boundaries | Visually inspected. |
| | There are garden grounds to the front, side and rear, with driveway parking. Boundaries are formed by stone and concrete block walls and timber fencing. |
| Ceilings | Visually inspected from floor level. |
| | Ceilings throughout the property are of plasterboard materials. Small sections are finished in polystyrene tiling and textured plaster. The shower room ceiling is finished in timber panelling. |
| Internal walls | Visually inspected from floor level. |
| | Using a moisture meter, walls were randomly tested for dampness where considered appropriate. |
| | Internal partitions are of timber stud design, plasterboard lined on both faces. |
| Floors including sub floors | Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. |
| | Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point. |
| | Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch. |
| | Flooring throughout the property is of suspended timber design, overlaid in chipboard sheeting, all of which have fully fitted floor coverings. |
| | Access to the sub-floor area is by means of a small hatch in the boiler cupboard. An inverted 'head and shoulders' inspection of the sub-floor area in the vicinity of the hatch was possible. The solum is laid in concrete. |
| Internal joinery and kitchen fittings | Built-in cupboards were looked into but no stored items were |
| | moved. |
| | Kitchen units were visually inspected excluding appliances. Timber skirtings, door facings and door surrounds and timber |
| | internal pass doors, some of which have glazed panels. Kitchen fittings comprise a range of wall and base units and work surfaces |

6 New Road, Forfar, DD8 2AE 31st March 2023 Leanne Carling fittings comprise a range of wall and base units and work surfaces.

| None. |
|---|
| Visually inspected. |
| Papered and painted walls and ceilings, and painted woodwork. There are tiled areas in the kitchen and shower room, with small sections of polystyrene tiling and textured finishes to the ceilings. Timber panelling is also fitted to walls and ceilings. |
| None. |
| Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. A mains supply of electricity is connected to the property, the circuit breaker consumer unit is located in the hall cupboard and serving 13 Amp square pin sockets throughout. The meter is located within an external box. Wiring, where visible, is sheathed in uPVC. |
| Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. A mains supply of gas is connected, the gas meter is located externally in a uPVC housing. |
| Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or |
| appliances. Cold water is from the mains supply. Visible plumbing comprises copper and uPVC supply pipework. There is a water shut off valve beneath the kitchen sink. The shower room comprises a tiled cubicle with electric shower unit , low level WC and wash hand basin. |
| |

Heating and hot water Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances. The property is centrally heated by means of a gas fired system, comprising a condensing combination boiler located in the hall cupboard. Heating to the rooms is provided by water filled radiators. The system is of a type designed to provide instantaneous hot water upon demand. **Drainage** Drainage covers etc were not lifted. Neither drains nor drainage systems were tested. Mains drainage is understood to be connected. Fire, smoke and burglar alarms Visually inspected. No tests whatsoever were carried out to the system or appliances. The property has smoke detectors. Scottish government regulations came into effect on 1st February 2022 which requires each property to have linked smoke and heat detectors and if gas/carbon burning appliances are present then a carbon monoxide alarm fitted. Upgrading may be required to comply with these regulations. Purchasers should satisfy themselves with

regards to compliance.

Any additional limits to inspection

For flats / maisonettes

Only the subject flat and internal communal areas giving access to the flat were inspected.

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

It will be appreciated that parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.

This report does not constitute a full and detailed description of the property and a structural investigation was not carried out. No inspection was undertaken of woodwork or other parts of the structure which are covered, unexposed or otherwise inaccessible and as a result no guarantee can be given that such parts of the structure are free from rot, beetle or other defects.

No removal of internal linings has been carried out in order to ascertain the condition of hidden parts and no warranty can be given regarding the areas not specifically referred to in this report.

The external building fabric has been inspected from ground level only from the subjects grounds and where possible from adjoining public property. Exposure work has not been carried out.

The roof structure has been examined from within the roof space. Stored items and insulation have not been moved.

The report does not include an asbestos inspection. However, asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor.

The sub-floor inspection was restricted to that area immediately adjacent to the hatch.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- 1) Chimney pots
- 2) Coping stone

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

| Category 3 | Category 2 | Category 1 |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

| Structural movement | |
|---------------------|--|
| Repair category | 1 |
| Notes | No obvious significant structural movement noted, on the basis of a single inspection. |

| Dampness, rot and infestation | |
|-------------------------------|--|
| Repair category | 1 |
| Notes | An electronic moisture meter was used to measure levels of dampness, at random locations, to lower wall surfaces and floors, where accessible and without moving furniture or lifting floor coverings, if present. No obvious significant dampness, timber decay or infestation noted, within the limitations imposed on the inspection. |

| Chimney stacks | |
|-----------------|-----------------|
| Repair category | - |
| Notes | Not applicable. |

| Roofing including roof space | |
|------------------------------|---|
| Repair category | 2 |
| Notes | The roof coverings appear consistent with age and nature of construction, allowing for normal weathering, consistent with age. However, an accumulation of moss growth was noted on tiling, and vegetation of this type has been known to retain moisture which could subsequently be directed back into the building fabric. |

| Rainwater fittings | |
|--------------------|---|
| Repair category | 1 |
| Notes | The system appeared watertight, with no apparent evidence of leakage or staining to the external faces of the building. |

| Main walls | |
|-----------------|--|
| Repair category | 1 |
| Notes | No obvious significant defects were noted to accessible wall surfaces. |

| Windows, external doors and joinery | |
|-------------------------------------|--|
| Repair category | 2 |
| Notes | Condensation and black spot mould was noted around window frames, attributable to inadequate heating and ventilation. Window timbers show signs of weathering and deterioration. Whilst there was no obvious defect on the date of inspection, it should be appreciated that double glazed sealed units do have a limited life expectancy, and defective seals can lead to condensation between the panes, necessitating in the replacement of the unit. This can sometimes only be obvious during adverse weather conditions. Eaves timbers show signs of weathering and deterioration. |

| External decorations | |
|----------------------|---|
| Repair category | 2 |
| Notes | The external decorations are in poor condition. |

| Conservatories/porches | |
|------------------------|-----------------|
| Repair category | - |
| Notes | Not applicable. |

| Communal areas | |
|-----------------|-----------------|
| Repair category | - |
| Notes | Not applicable. |

| Garages and permanent outbuildings | |
|------------------------------------|--|
| Repair category | 2 |
| Notes | The garage is in reasonable condition having regard to its the age and intended purpose. Flooring within the rear storage area has however deteriorated. |

| Outside areas and boundaries | |
|------------------------------|--|
| Repair category | 2 |
| Notes | Outside areas and boundaries appear adequate for purpose, however, a degree of maintenance and repair is required to boundary walls and fencing. |

| Ceilings | |
|-----------------|---|
| Repair category | 2 |
| Notes | Shrinkage cracking has occurred to plasterboard joints, with surface blemishing also apparent, typical of a property of this age and type. |
| | Polystyrene ceiling tiles have been used in the rear bedroom. These are now considered a fire hazard. Damage to underlying plasterwork is inevitable, and replastering should be anticipated. |
| | The timber panelled ceiling within the shower room presents a potential fire hazard. Ideally, this should be removed or treated with a fire retardant paint/varnish. |
| | The textured ceiling finish may contain asbestos fibres. This can only be determined by taking a sample for analysis. Even if the ceiling finish does contain asbestos fibres, it is not normally considered to be a health hazard provided it is not disturbed. If removal is contemplated, this should only be carried out by a licensed asbestos removal contractor. |

| Internal walls | |
|-----------------|--|
| Repair category | 2 |
| Notes | Plaster finishes are uneven in places, with surface damage/blemishing evident, the removal of wallpaper is likely to result in the necessity for plaster repairs. There is timber panelling present to sections of lower walls. There is the potential for further defects to be concealed behind these finishes. |

| Floors including sub-floors | |
|-----------------------------|---|
| Repair category | 2 |
| Notes | Areas of loose and uneven flooring were noted, consistent with age and assumed to be related to poor workmanship and not timber defect. Care should be taken during any intended re-fixing works to ensure that existing services are not disturbed. The floor has also been damaged where the access hatch in the boiler cupboard has been formed. Patching repairs will be required. From the sub-floor inspection, staining was noted beneath the shower tray. |

| Internal joinery and kitchen fittings | |
|---------------------------------------|--|
| Repair category | 2 |
| Notes | There is a degree of general wear and tear to internal joinery fixtures and finishes , commensurate with the age , use and occupation of the property. Kitchen fittings are heavily worn and nearing the end of their useful life. |

| Chimney breasts and fireplaces | |
|--------------------------------|-----------------|
| Repair category | - |
| Notes | Not applicable. |

| Internal decorations | |
|----------------------|--|
| Repair category | 2 |
| Notes | The internal decorations are in poor condition. The ceiling finishes may contain asbestos fibres. This can only be determined by taking a sample for analysis. Even if the ceiling finish does contain asbestos fibres it is not normally considered to be a health hazard provided it is not disturbed, for example it should not be rubbed down during redecoration. Polystyrene ceiling tiles and timber panelling are considered a fire hazard. Damage to underlying plasterwork is inevitable, and re-plastering should be anticipated. |

| Cellars | |
|-----------------|-----------------|
| Repair category | - |
| Notes | Not applicable. |

| Electricity | |
|-----------------|---|
| Repair category | 1 |
| Notes | No obvious significant defects noted, however, only the most recently constructed or re-wired properties have installations which fully comply with current regulations. It is good practice to have electrical systems fully tested upon a change in ownership, where upgrading may be identified by the contractor. |

| Gas | |
|-----------------|--|
| Repair category | 1 |
| Notes | No obvious significant defects noted. All gas appliances should be tested and thereafter regularly maintained by a Gas Safe registered contractor. The outer casing to the meter box is damaged. |

| F Water, plumbing and bathroom fittings | | | |
|---|---|--|--|
| Repair category | 2 | | |
| Notes | The sanitary fitments are suffering from wear and tear. The seal and tile grouting around the tray are soiled/defective, and may have led to damp penetration to concealed areas beneath. It will be fully appreciated that areas not inspected cannot be guaranteed to be free from defect, and that where dampness is present, there is an attendant risk of decay. Floor tiling in the shower room is in poor condition. | | |

| Heating and hot water | | | |
|-----------------------|---|--|--|
| Repair category | 1 | | |
| Notes | No obvious significant defects were noted to the heating system or hot water system, although these have not been tested. It is recommended good practice that gas boilers are serviced on an annual basis by an appropriately qualified person. The boiler's service history should be checked by referring to the service records. If there is no record of a recent service, the boiler should be checked by an appropriately qualified person. | | |

| Drainage | |
|-----------------|---|
| Repair category | 1 |
| Notes | No obvious significant defects were noted to the drainage system, within the limitations of the inspection. |

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

| Structural movement | 1 |
|---------------------------------------|---|
| Dampness, rot and infestation | 1 |
| Chimney stacks | - |
| Roofing including roof space | 2 |
| Rainwater fittings | 1 |
| Main walls | 1 |
| Windows, external doors and joinery | 2 |
| External decorations | 2 |
| Conservatories/porches | - |
| Communal areas | - |
| Garages and permanent outbuildings | 2 |
| Outside areas and boundaries | 2 |
| Ceilings | 2 |
| Internal walls | 2 |
| Floors including sub-floors | 2 |
| Internal joinery and kitchen fittings | 2 |
| Chimney breasts and fireplaces | - |
| Internal decorations | 2 |
| Cellars | - |
| Electricity | 1 |
| Gas | 1 |
| Water, plumbing and bathroom fittings | 2 |
| Heating and hot water | 1 |
| Drainage | 1 |

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

| 1. Which floor(s) is the living accommodation on? | Ground floor | | |
|--|--------------|--|--|
| 2. Are there three steps or fewer to a main entrance door of the property? | Yes X No | | |
| 3. Is there a lift to the main entrance door of the property? | Yes No X | | |
| 4. Are all door openings greater than 750mm? | Yes No X | | |
| 5. Is there a toilet on the same level as the living room and kitchen? | Yes X No | | |
| 6. Is there a toilet on the same level as a bedroom? | Yes X No | | |
| 7. Are all rooms on the same level with no internal steps or stairs? | Yes X No | | |
| 8. Is there unrestricted parking within 25 metres of an entrance door to the building? | Yes X No | | |

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The tenure is understood to be Outright Ownership.

In line with our normal practice, it is specifically assumed that the property and its value are unaffected by any matters which would or should be revealed to a competent Completing Solicitor by a local search and replies to the usual enquiries, or by any statutory notice and planning proposal.

Where defects or repairs have been identified within this report, or where access was not possible to significant parts of the structure, it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialists or contractors advice and estimates must be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

Scottish government regulations came into effect on 1st February 2022 which requires each property to have linked smoke and heat detectors and if gas/carbon burning appliances are present then a carbon monoxide alarm fitted. Upgrading may be required to comply with these regulations. Purchasers should satisfy themselves with regards to compliance.

Estimated reinstatement cost for insurance purposes

£252,000 (Two hundred and fifty two thousand pounds).

Building costs are currently increasing significantly above inflation due to material and labour shortages. It is recommended that you update this figure regularly to ensure that you have adequate cover or alternatively seek specialist advice from your insurer.

Valuation and market comments

In its present condition the opinion of valuation for the Outright Ownership interest with vacant possession on 31st March 2023 is £140,000 (One Hundred and Forty Thousand Pounds Sterling)

Energy Performance Certificate (EPC)

Dwellings

Scotland

6 NEW ROAD, FORFAR, DD8 2AE

Dwelling type:Detached bungalowDate of assessment:31 March 2023Date of certificate:03 April 2023

Total floor area: 78 m²

Primary Energy Indicator: 240 kWh/m²/year

Reference number: 0100-2479-8270-2677-1575 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

Main heating and fuel: Boiler and radiators, mains

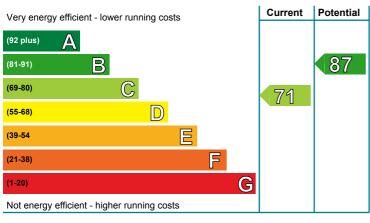

gas

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

| Estimated energy costs for your home for 3 years* | £4,968 | See your recommendations |
|---|--------|-----------------------------|
| Over 3 years you could save* | £903 | report for more information |

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

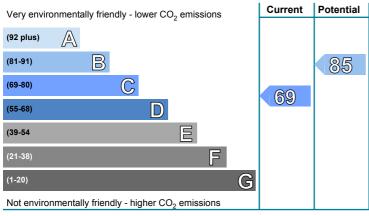

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band C (71)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band C (69)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

| Recommended measures | Indicative cost | Typical savings over 3 years |
|--------------------------------------|-----------------|------------------------------|
| 1 Floor insulation (suspended floor) | £800 - £1,200 | £693.00 |
| 2 Solar water heating | £4,000 - £6,000 | £213.00 |
| 3 Solar photovoltaic (PV) panels | £3,500 - £5,500 | £1806.00 |

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

| Element | Description | Energy Efficiency | Environmental |
|-----------------------|---|-------------------|---------------|
| Walls | Timber frame, as built, insulated (assumed) | ★★★★☆ | ★★★★ ☆ |
| Roof | Pitched, 250 mm loft insulation | ★★★★☆ | ★★★★ ☆ |
| Floor | Suspended, no insulation (assumed) | _ | _ |
| Windows | Fully double glazed | *** | ★★★☆☆ |
| Main heating | Boiler and radiators, mains gas | **** | ★★★★ ☆ |
| Main heating controls | Programmer, room thermostat and TRVs | **** | ★★★★ ☆ |
| Secondary heating | None | _ | _ |
| Hot water | From main system | **** | ★★★★ ☆ |
| Lighting | Low energy lighting in all fixed outlets | **** | **** |

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 42 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 3.3 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

| | Current energy costs | Potential energy costs | Potential future savings |
|-----------|----------------------|------------------------|--------------------------|
| Heating | £3,981 over 3 years | £3,288 over 3 years | |
| Hot water | £609 over 3 years | £399 over 3 years | You could |
| Lighting | £378 over 3 years | £378 over 3 years | save £903 |
| | Totals £4,968 | £4,065 | over 3 years |

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

| December ded massives | Indicative cost | Typical saving | Rating after improvement | | |
|--------------------------------------|-----------------|----------------|--------------------------|-------------|--|
| Recommended measures | indicative cost | per year | Energy | Environment | |
| 1 Floor insulation (suspended floor) | £800 - £1,200 | £231 | C 75 | C 74 | |
| 2 Solar water heating | £4,000 - £6,000 | £71 | C 76 | C 76 | |
| 3 Solar photovoltaic panels, 2.5 kWp | £3,500 - £5,500 | £602 | B 87 | B 85 | |

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

| Heat demand | Existing dwelling | Impact of loft insulation | Impact of cavity wall insulation | Impact of solid wall insulation |
|------------------------------|-------------------|---------------------------|----------------------------------|---------------------------------|
| Space heating (kWh per year) | 11,073 | N/A | N/A | N/A |
| Water heating (kWh per year) | 1,858 | | | |

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Joseph Dowie
Assessor membership number: EES/009364

Company name/trading name: Harvey Donaldson & Gibson Chartered Surveyors

Address: Suite 14 Castlecroft Business Centre Tom Johnston Road

Dundee DD4 8XD

Phone number: 01382774753

Email address: frances.wilson@hdg.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

| Property address | 6 new road Forfar dd82ae |
|---|--------------------------|
| | |
| Seller(s) | Leanne Carling |
| | |
| Completion date of property questionnaire | 30 March 2023 |

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

| 1. | Length of ownership | | |
|----|--|-------------------------|---|
| | How long have you owned the property? 15 years | | |
| 2. | Council tax | | |
| | Which Council Tax band is your property in? (Please tick) | | |
| | A B C D E F G H | | |
| 3. | Parking | | |
| | What are the arrangements for parking at your property? (Please tick all that apply) | | |
| | • Garage | | |
| | Allocated parking space | | |
| | • Driveway | | |
| | Shared parking | | |
| | On street | | |
| | Resident permit | | |
| | Metered parking | | |
| | Other (please specify): Drive | | |
| 4. | Conservation area | | |
| | Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)? | Yes No Don't know | X |
| 5. | Listed buildings | | |
| | Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)? | Yes No | |
| 6. | Alterations/additions/extensions | | |
| a. | (i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)? | Yes No | X |

| | If you have answered yes, please describe below the changes which you have made: | | |
|----|--|----------------------|--------|
| | (ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking. If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them: | Yes No | X |
| b. | Have you had replacement windows, doors, patio doors or double glazing installed in your property? If you have answered yes, please answer the three questions below: | Yes No | |
| | (i) Were the replacements the same shape and type as the ones you replaced? | Yes No | |
| | (ii) Did this work involve any changes to the window or door openings? | Yes No | |
