Newly refurbished
warehouse unit to let

SEGRO

EV charging points

PV panels producing annual energy of 114 MWh

Creating 93.5kg of oxygen per year

Extracting 71.5kg of carbon per year

Situated on the established and successful Slough Trading Estate, 160 Edinburgh Avenue is perfect for occupiers demanding the best from sustainability and sustainable technology.

The unit boasts excellent sustainability credentials, including BREEAM 'Excellent' rating and has been certified as operationally net zero carbon.

In addition to this, the refurbishment benefits from the use of sophisticated green technology and materials throughout.

GREEN WITHOUT COMPROMISE

Mechanical ventilation with heat recovery

Improves wellbeing

A BREATH OF FRESH IDEAS

We know that green walls look beautiful, but their performance goes way beyond aesthetics. They can help reduce the amount of heat lost through a building's structure by more than 30%*, whilst also soaking up rainfall that would usually run off the walls, absorb carbon, produce oxygen and significantly reduce noise levels.

Exposure to green walls has also led to increases in efficiency, creativity and memory recall whilst also enhancing physiological and psychological wellbeing.

-  Reduces energy consumption
-  Absorbs carbon
-  Produces oxygen
-  Reduces noise
-  Improves wellbeing

Photo-catalytic paint

A WORKING ENVIRONMENT THAT WORKS FOR EVERYBODY

Air source heat pump for heating and cooling

On-premise renewable energy production

Reclaimed and reused building materials

EVERYTHING CONSIDERED

At 160 Edinburgh Avenue, the very best considerations have been made for the needs of a modern business. From the reuse of materials to the creation of comfortable environments for both occupiers and local wildlife.

Water reducing measures

Full accessibility for all

Insect habitats

DRIVEN BY DATA

160 Edinburgh Avenue is equipped with our SMART Core package, which features smart building technology and dedicated sensors to give real-time information about how the building is running and how it can become more efficient, reduce costs, and create a better working environment.

SMART Core will measure environmental data, energy use, motion, air quality and water consumption, among other variables.

Energy use

Energy and gas consumption reported on an hourly basis

Environmental data

Measuring temperature, humidity and lighting levels

Motion and space

Identifying how people move and interact with the space

Water consumption

Measuring water usage and trends

Indoor air quality

Measuring CO² and Total Volatile Organic Compounds (TVOCs)

IDEAL LOCATION

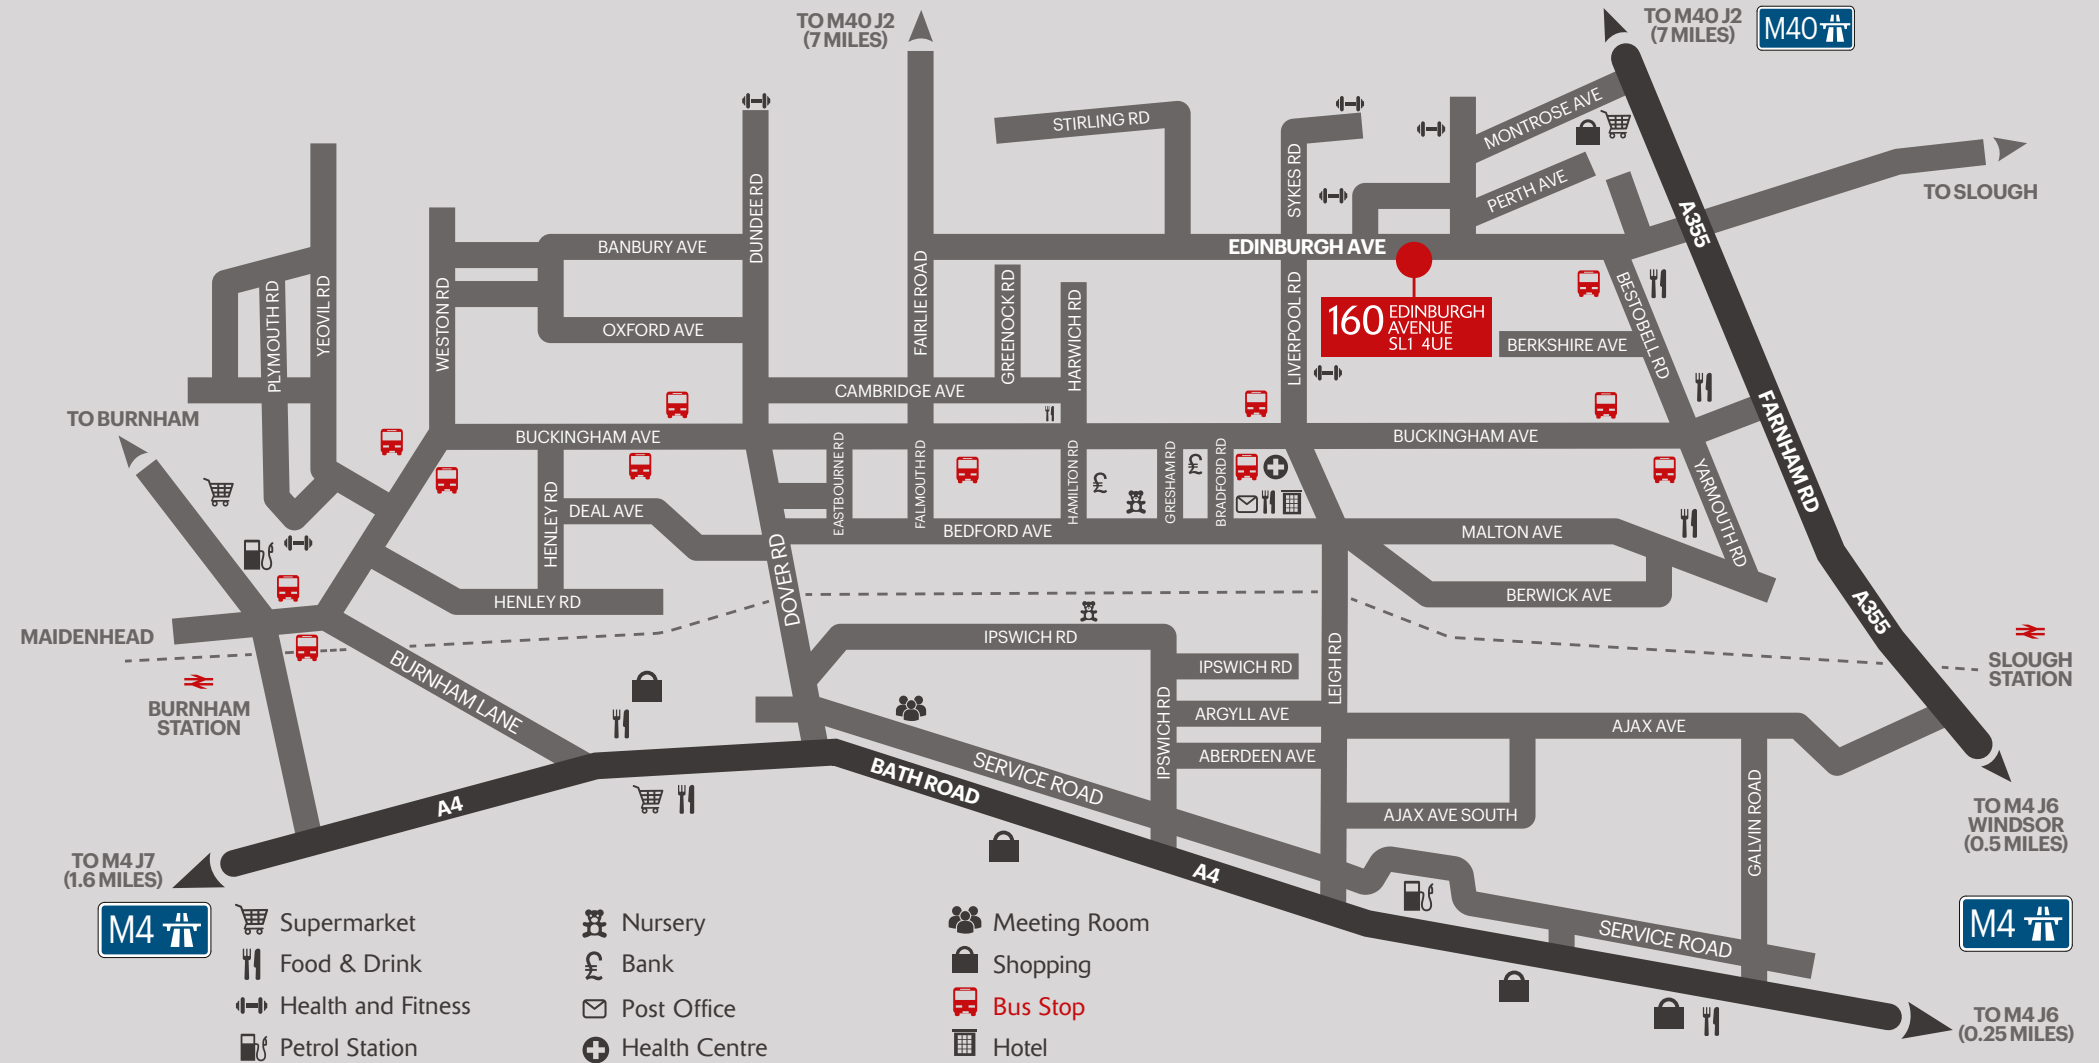

With an unrivalled location at the heart of the Thames Valley, 160 Edinburgh Avenue also benefits from everything the Slough Trading Estate has to offer. Home to many of the world's most successful companies, the estate has developed a reputation as a world class location for business.

ON THE ROAD

Less than 2 miles from Junctions 6 & 7 of the M4, to the south, and 6 miles from Junction 2 of the M40, which provide excellent access to the M25, Heathrow Airport & the wider national motorway network.

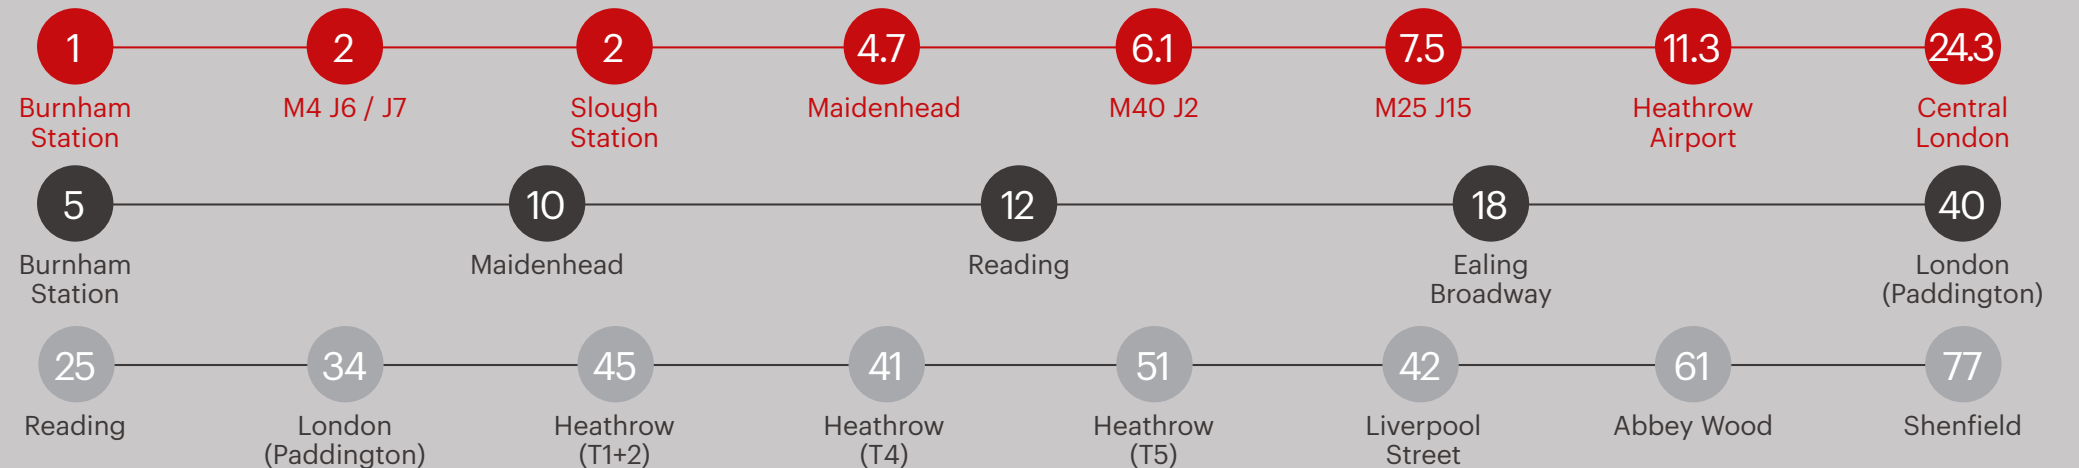

CONNECTED BY RAIL

Slough and Burnham Railway stations within 3 miles, providing fast and direct rail access.

DISTANCE & TIMES

Source: Google maps. road distances are based on departing 160 Edingburgh Avenue at 8am and rail times are based on leaving Slough station at 8am on a weekday.
