Dwellings

FLAT 2/1 6 FYFFE PLACE, RUSSELL STREET, JOHNSTONE, PA5 8BZ

**Dwelling type:** Top-floor flat  
**Date of assessment:** 23 April 2024  
**Date of certificate:** 23 April 2024  
**Total floor area:** 41 m<sup>2</sup>  
**Primary Energy Indicator:** 519 kWh/m<sup>2</sup>/year

**Reference number:** 0190-2807-2240-2224-7501  
**Type of assessment:** RdSAP, existing dwelling  
**Approved Organisation:** Elmhurst  
**Main heating and fuel:** Boiler and radiators, mains gas

## You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years\*

£4,428

See your recommendations report for more information

Over 3 years you could save\*

£1,497

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

Very energy efficient - lower running costs

| Current | Potential |
|---------|-----------|
| 51      | 66        |

## Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (51)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Not energy efficient - higher running costs

Very environmentally friendly - lower CO<sub>2</sub> emissions

| Current | Potential |
|---------|-----------|
| 46      | 65        |

## Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (46)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Not environmentally friendly - higher CO<sub>2</sub> emissions

## Top actions you can take to save money and make your home more efficient

| Recommended measures                   | Indicative cost  | Typical savings over 3 years |
|--|------------------|------------------------------|
| 1 Internal or external wall insulation | £4,000 - £14,000 | £1002.00                     |
| 2 Low energy lighting                  | £10              | £63.00                       |
| 3 Condensing boiler                    | £2,200 - £3,000  | £318.00                      |

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit [greenerscotland.org](http://greenerscotland.org) or contact Home Energy Scotland on 0808 808 2282.

**THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

| Element               | Description   | Energy Efficiency | Environmental |
|-----------------------|---|-------------------|---------------|
| Walls                 | Sandstone or limestone, as built, no insulation (assumed) | ★☆☆☆☆             | ★☆☆☆☆         |
|                       | Solid brick, as built, no insulation (assumed)            | ★★☆☆☆             | ★★☆☆☆         |
| Roof                  | Pitched, no insulation (assumed)                          | ★☆☆☆☆             | ★☆☆☆☆         |
| Floor                 | (another dwelling below)                                  | —                 | —             |
| Windows               | Partial double glazing                                    | ★★☆☆☆             | ★★☆☆☆         |
| Main heating          | Boiler and radiators, mains gas                           | ★★★★☆             | ★★★★☆         |
| Main heating controls | Programmer and room thermostat                            | ★★★★☆             | ★★★★☆         |
| Secondary heating     | None  | —                 | —             |
| Hot water             | From main system  | ★★★★☆             | ★★★★☆         |
| Lighting              | Low energy lighting in 60% of fixed outlets               | ★★★★☆             | ★★★★☆         |

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 92 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 3.7 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.4 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

## Estimated energy costs for this home

|               | Current energy costs | Potential energy costs | Potential future savings  |
|---------------|----------------------|------------------------|---|
| Heating       | £3,714 over 3 years  | £2,337 over 3 years    |  |
| Hot water     | £459 over 3 years    | £414 over 3 years      |   |
| Lighting      | £255 over 3 years    | £180 over 3 years      |   |
| <b>Totals</b> | <b>£4,428</b>        | <b>£2,931</b>          |   |

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

## Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

| Recommended measures   | Indicative cost  | Typical saving per year | Rating after improvement  |   |
|--|------------------|-------------------------|---|---|
|  |                  |                         | Energy  | Environment   |
| 1 Internal or external wall insulation                           | £4,000 - £14,000 | £334                    |  |  |
| 2 Low energy lighting for all fixed outlets                      | £10              | £21                     |  |  |
| 3 Replace boiler with new condensing boiler                      | £2,200 - £3,000  | £106                    |  |  |
| 4 Replace single glazed windows with low-E double glazed windows | £3,300 - £6,500  | £36                     |  |  |

### Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- Micro CHP

## Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to [www.greenerscotland.org](http://www.greenerscotland.org).

## About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

### 2 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (<http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting>).

### 3 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

### 4 Double glazed windows

Double glazing is the term given to a system where two panes of glass are made up into a sealed unit. Replacing existing single-glazed windows with double-glazed windows will improve comfort in the home by reducing draughts and cold spots near windows. Double-glazed windows may also reduce noise, improve security and combat problems with condensation. Building regulations apply to this work and planning permission may also be required, so it is best to check with your local authority on what standards need to be met. A building warrant is not required if the windows comply with the current requirements.

## Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

## Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit <https://energysavingtrust.org.uk/energy-at-home> for more information.

| Heat demand                  | Existing dwelling | Impact of loft insulation | Impact of cavity wall insulation | Impact of solid wall insulation |
|------------------------------|-------------------|---------------------------|----------------------------------|---------------------------------|
| Space heating (kWh per year) | 11,539            | (3,702)                   | N/A                              | (4,208)                         |
| Water heating (kWh per year) | 1,557             |                           |                                  |                                 |

## Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

## About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst ([www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk)), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) and entering the report reference number (RRN) printed at the top of this page.

|                             |  |
|-----------------------------|--|
| Assessor's name:            | Mr. David Cree   |
| Assessor membership number: | EES/009360   |
| Company name/trading name:  | D M Hall Chartered Surveyors LLP                             |
| Address:                    | 3 Centura Court<br>Hillington Park<br>Glasgow<br>G52 4PR     |
| Phone number:               | 0131 477 6000  |
| Email address:              | <a href="mailto:dmhall@dmhall.co.uk">dmhall@dmhall.co.uk</a> |
| Related party disclosure:   | No related party   |

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

## Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk), with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at [www.gov.scot/epc](http://www.gov.scot/epc).

## Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit [greener-scotland.org](https://www.greener-scotland.org) or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

## PART 1 - GENERAL

### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property<sup>1</sup>.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Seller's Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

<sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Codes of Conduct.

# Terms and Conditions

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

## 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

## 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

## 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.<sup>2</sup>

## 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless

---

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

# Terms and Conditions

they assign the same to any other party in writing.

## 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

## 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the Surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an invoice equivalent to 80% of the agreed fee.

## 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

## 1.1 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;

# Terms and Conditions

- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## PART 2 - DESCRIPTION OF THE REPORT

### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

## 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the Report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3 Category 1: No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein*

# Terms and Conditions

*the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" *is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

## 1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

|  |  |
|--|--|
| <b>Description</b>                               | Purpose built second floor left hand flat contained within a three storey terraced block, comprising six units.  |
| <b>Accommodation</b>                             | ON ONE FLOOR: Entrance Hallway, Sitting Room, Kitchen area, Bathroom, and Bedroom.   |
| <b>Gross internal floor area (m<sup>2</sup>)</b> | 41   |
| <b>Neighbourhood and location</b>                | Established residential/commercial locality of mixed age, style and condition properties. There are commercial premises located within close proximity, including an adjoining building.<br><br>There are some water courses located within the nearby area.<br><br>Glasgow Airport is located within the local area.  |
| <b>Age</b>                                       | 125 years approx.  |
| <b>Weather</b>                                   | Dry and sunny following a mixed period.  |
| <b>Chimney stacks</b>                            | <b>Visually inspected with the aid of binoculars where appropriate.</b><br><br>Pointed stonework, where seen.  |
| <b>Roofing including roof space</b>              | <b>Sloping roofs were visually inspected with the aid of binoculars where appropriate.</b><br><br><b>Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.</b><br><br><b>If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.</b><br><br>Pitched and tiled. |

# Single Survey

|  |   |
|--|---|
| <b>Water, plumbing, bathroom fittings</b>  | The bathroom is fitted with a bath unit, wash hand basin and wc.  |
| <b>Heating and hot water</b>               | <p><b>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>Gas fired boiler with a supply of radiators.</p>   |
| <b>Drainage</b>                            | <p><b>Drainage covers etc were not lifted.</b></p> <p><b>Neither drains nor drainage systems were tested.</b></p> <p>Assumed connected to the mains sewage system.</p>  |
| <b>Fire, smoke and burglar alarms</b>      | <p><b>Visually inspected.</b></p> <p><b>No tests whatsoever were carried out to the system or appliances.</b></p> <p>There is a smoke alarm.</p> <p>The comments below should be fully appreciated, prior to purchase.</p> <p>Legislation by the Scottish Government, which took effect from February 2022, requires all residential properties to have a system of inter-linked smoke alarms and heat detectors. Carbon monoxide detectors are also required where appropriate. Purchasers should appraise themselves of the requirements of this legislation, and engage with appropriately accredited contractors to ensure compliance.</p>  |
| <b>Any additional limits to inspection</b> | <p><b>For flats / maisonettes</b></p> <p><b>Only the subject flat and internal communal areas giving access to the flat were inspected.</b></p> <p><b>If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.</b></p> <p><b>The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.</b></p> <p>When inspected the subjects were occupied, heavily furnished, and floors were covered. Floor coverings restricted my inspection of flooring. No inspection of any sub floor area was possible, as my inspection was of an upper floor flat. No suitable access was available within the communal roof space area, based on limitations, including due to the height of the access hatch. My inspection of most apartments was restricted due to heavy furnishings therein. My inspection of most storage cupboards was restricted due to heavy stored items therein. Only a restricted view of the chimney was possible. Only a restricted distant view of the</p> |

## Any additional limits to inspection

front and rear roof surfaces was possible due to the nature of the site. No access was obvious within any locked store in the communal hallway. My inspection of boundaries was restricted due to ground divisions.

Parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.

I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purposes of the valuation I have assumed that there is no Japanese Knotweed or other invasive plants within the boundaries of the property or in neighbouring properties.

The report does not include an asbestos inspection. However asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported within the limitations of the inspection and you have concerns you should engage a qualified asbestos surveyor. Any such materials should not be drilled or disturbed without prior advice from a licensed specialist.

Random testing for dampness was undertaken internally with the use of a moisture meter where accessible and considered appropriate.

In accordance with Health and Safety guidelines I have not disturbed insulation, furniture or personal effects (particularly in cupboards). Floor coverings have not been moved.

Concealed areas beneath and around bath/shower trays were not visible. Water spillage in these areas can often be discovered unexpectedly with resultant damage to concealed parts of the fabric.

The inspection is not a fire or life safety risk assessment and should not be relied on as a risk assessment inspection. Further advice should be sought if a specific risk assessment of the property and building that it forms part of is required.

Where repairs are required at height compliance with Health and Safety legislation often requires the use of scaffolding which can significantly impact on the cost of repair. Pricing repairs is out with the remit of this report but it would be prudent to consider costs and budgeting before offering. The various trades can advise further.

Windows units have been replaced in the past. Random windows and doors are opened but not all and inspections can be restricted by window blinds, curtains, ornaments etc. Handles, locks and opening mechanisms can deteriorate through usage and repair or replacement can be anticipated on an ad hoc basis. No assurances can be provided that all window fittings are functional.

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

# Single Survey

## 2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

|  Structural movement |   |
|---|---|
| Repair category   | 1   |
| Notes   | The property has been affected by previous movement but within the limitations of the inspection there was no evidence to suggest that this is ongoing. |

|  Dampness, rot and infestation |   |
|--|---|
| Repair category  | 2   |
| Notes  | Where seen/tested, there were some isolated moisture readings/staining evident to internal areas. Moisture readings/staining can be indicative of concealed/associated issues. This should be fully appreciated. See also comments made within the Roofing and Chimney/Chimney Breast sections. |

|  Chimney stacks |   |
|--|---|
| Repair category  | 2   |
| Notes  | Where my limited inspection was possible, there was weathering/deterioration evident. |

|  Roofing including roof space |  |
|--|--|
| Repair category  | 2  |
| Notes  | <p>Where my inspection was possible, there was weathering, wear and tear ageing evident to roofing. The roof skylight is weathered/dated.</p> <p>Concrete tiles are typically guaranteed for 30 years but have a reasonable life expectation around 50/60 years according to the BRE. Life expectancy will often depend on weathering and damage from the prevailing weather. A reputable roofing contractor can advise on life expectancy and repair/replacement costs.</p> |

## Rainwater fittings

|                        |   |
|------------------------|---|
| <b>Repair category</b> | 2   |
| <b>Notes</b>           | <p>There is weathering, ageing and some localised deterioration evident.</p> <p>Older style fittings will require a higher degree of maintenance, and eventual renewal.</p> |

## Main walls

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>There are some weathered and localised deteriorated sections evident to external wall finishes.</p> <p>There are some localised areas of damp staining. Damp staining can lead to associated defects.</p> |

## Windows, external doors and joinery

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>The timber frame sitting room window unit was found to be noticeably dated/weathered showing various signs of deterioration. Furthermore, there is weathering, wear and tear and ageing evident to the uPVC bedroom window unit.</p> <p>Older style timber frame and uPVC windows will require a higher degree of maintenance, and likely renewal within the short to medium terms. Reputable contractors should advise as necessary.</p> |

## External decorations

|                        |   |
|------------------------|---|
| <b>Repair category</b> | 1   |
| <b>Notes</b>           | <p>There is some weathering evident. See also associated comments made within this section of the report.</p> |

## Conservatories/porches

|                        |       |
|------------------------|-------|
| <b>Repair category</b> | -     |
| <b>Notes</b>           | None. |

## Communal areas

|                        |   |
|------------------------|---|
| <b>Repair category</b> | 2   |
| <b>Notes</b>           | <p>There are some areas of wear and tear, ageing and deterioration to finishes within</p> |

## Communal areas

|                        |   |
|------------------------|---|
| <b>Repair category</b> | 2   |
| <b>Notes</b>           | <p>the communal hallway/stairwell, including some localised areas of dampness/damp staining. Dampness/damp staining can be indicative of, and can lead to, concealed/associated defects. This should be fully appreciated.</p> <p>There are weathered, dated and some deteriorated/decayed sections evident to communal window and door units.</p> <p>There are currently no handrails to the majority of the staircase area.</p> |

## Garages and permanent outbuildings

|                        |       |
|------------------------|-------|
| <b>Repair category</b> | -     |
| <b>Notes</b>           | None. |

## Outside areas and boundaries

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>Where seen, there are some weathered, off square and deteriorated/damaged sections evident to boundaries, and some paving.</p> <p>There are mature trees located within close proximity. Trees can cause damage to buildings and services if not properly monitored and maintained.</p> |

## Ceilings

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>There is some wear and tear and localised deterioration evident to ceiling finishes.</p> <p>There are some textured style ceiling finishes. Older style textured finishes can contain asbestos based or similar materials. This should be fully appreciated, as a precaution. (See also comments within the Limitations section).</p> |

## Internal walls

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>There are areas of wear and tear/ageing evident to wall plaster/decor, where seen/tested.</p> <p>See also Dampness Section.</p> |

## Floors including sub-floors

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>There is some loose/uneven flooring, as well as ageing/worn sections to floor coverings.</p> <p>It is not unusual to discover areas of past water spillage when floor coverings are removed in kitchen and bathroom compartments, revealing the need for further repair and maintenance work.</p> |

## Internal joinery and kitchen fittings

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>There is wear and tear/ageing evident to internal joinery, where seen/tested, including the older style kitchen fittings.</p> <p>The glazing to the service hatch within the kitchen apartment appears to be of an untoughened nature. This should be fully appreciated from a health and safety viewpoint.</p> |

## Chimney breasts and fireplaces

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 2  |
| <b>Notes</b>           | <p>When fireplaces are removed, chimney breasts can be ventilated to prevent condensation/dampness occurring to disused flues. Specialist advice should be sought prior to any future re-use of former fireplace/flue areas.</p> <p>At present, some localised moisture staining was evident to apparent former fireplace areas. (See associated comments made within the Dampness section).</p> |

## Internal decorations

|                        |  |
|------------------------|--|
| <b>Repair category</b> | 1  |
| <b>Notes</b>           | No significant defects evident. However, see associated comments made within this section of the report. |

## Cellars

|                        |       |
|------------------------|-------|
| <b>Repair category</b> | -     |
| <b>Notes</b>           | None. |

|  Electricity |   |
|---|---|
| <b>Repair category</b>  | 2   |
| <b>Notes</b>  | <p>There are some mixed age/quality aspects evident to the apparatus, where my limited inspection was possible. Furthermore, the extractor fan within the bathroom does not appear to be functioning at present, and there was no lighting available within this central bathroom apartment at my inspection. On this basis, a qualified electrician should be employed within the short term to carry out an inspection and thereafter implement/recommend all necessary upgrading/remedial works.</p> <p>It is recommended that all electrical installations be checked every five years or on change of ownership to keep up to date with frequent changes in Safety Regulations. Further advice will be available from a qualified NICEIC/ SELECT registered Contractor. It should be appreciated that only recently constructed or rewired properties will have installations which fully comply with IET regulations.</p> |

|  Gas |  |
|---|--|
| <b>Repair category</b>  | 2  |
| <b>Notes</b>  | <p>At the time/limits of my inspection, there was no obvious view of the gas meter. I have therefore assumed that a fully functioning and satisfactory meter is available. Nonetheless, this should be clarified, as a precaution.</p> <p>Trade bodies governing gas installations currently advise that gas appliances should be tested prior to change in occupancy and thereafter at least once a year by a Gas Safe registered contractor. It is assumed that gas appliances comply with relevant regulations.</p> |

|  Water, plumbing and bathroom fittings |  |
|---|--|
| <b>Repair category</b>  | 2  |
| <b>Notes</b>  | <p>The bathroom fittings are of an older style and quality showing signs of ageing/deterioration, including some worn mastic sealant/tile pointing at the bath unit, and some areas of loose/uneven flooring. Defective mastic sealant/tile pointing can lead to concealed issues, and loose/uneven flooring can be indicative of associated issues. This should be fully appreciated.</p> |

|  Heating and hot water |  |
|---|--|
| <b>Repair category</b>  | 2  |
| <b>Notes</b>  | <p>The visible heating apparatus, including boiler and most radiators, are of an older design. Furthermore, there are some localised moisture readings evident to plasterwork within the boiler storage cupboard. A qualified heating contractor should provide further advice with regards to all necessary upgrading/remedial works.</p> <p>Informed opinion suggests that boilers have a life expectancy between 10 and 20 years depending on the quality of the boiler and whether or not regular maintenance has been carried out. Future repair or replacement should be</p> |

## Heating and hot water

|                        |   |
|------------------------|---|
| <b>Repair category</b> | 2   |
| <b>Notes</b>           | <p>anticipated.</p> <p>It is assumed that the heating and hot water systems have been properly serviced and maintained on a regular basis and installed in accordance with the relevant regulations.</p> <p>It is assumed that the central heating system has been properly installed and maintained to meet with all relevant regulations, particularly in respect of flue and ventilation requirements.</p> <p>Boilers and central heating systems should be tested and serviced by a Gas Safe registered contractor on an annual basis to ensure their safe and efficient operation.</p> |

## Drainage

|                        |                                 |
|------------------------|---------------------------------|
| <b>Repair category</b> | 1                               |
| <b>Notes</b>           | No significant defects evident. |

# Single Survey

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

|                                       |   |
|---------------------------------------|---|
| Structural movement                   | 1 |
| Dampness, rot and infestation         | 2 |
| Chimney stacks                        | 2 |
| Roofing including roof space          | 2 |
| Rainwater fittings                    | 2 |
| Main walls                            | 2 |
| Windows, external doors and joinery   | 2 |
| External decorations                  | 1 |
| Conservatories/porches                | - |
| Communal areas                        | 2 |
| Garages and permanent outbuildings    | - |
| Outside areas and boundaries          | 2 |
| Ceilings                              | 2 |
| Internal walls                        | 2 |
| Floors including sub-floors           | 2 |
| Internal joinery and kitchen fittings | 2 |
| Chimney breasts and fireplaces        | 2 |
| Internal decorations                  | 1 |
| Cellars                               | - |
| Electricity                           | 2 |
| Gas                                   | 2 |
| Water, plumbing and bathroom fittings | 2 |
| Heating and hot water                 | 2 |
| Drainage                              | 1 |

## Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

## Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

## Category 1

No immediate action or repair is needed.

### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

## 3. Accessibility information

### Guidance notes on accessibility information

*Three steps or fewer to a main entrance door of the property:*

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

*Unrestricted parking within 25 metres:*

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

|   |   |  |
|---|---|--|
| <b>1. Which floor(s) is the living accommodation on?</b>                                      | Second                                  |  |
| <b>2. Are there three steps or fewer to a main entrance door of the property?</b>             | Yes <input type="checkbox"/>            | No <input checked="" type="checkbox"/> |
| <b>3. Is there a lift to the main entrance door of the property?</b>                          | Yes <input type="checkbox"/>            | No <input checked="" type="checkbox"/> |
| <b>4. Are all door openings greater than 750mm?</b>   | Yes <input type="checkbox"/>            | No <input checked="" type="checkbox"/> |

| <b>6. Is there a toilet on the same level as a bedroom?</b>                                   | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/>            |
| <b>7. Are all rooms on the same level with no internal steps or stairs?</b>                   | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/>            |
| <b>8. Is there unrestricted parking within 25 metres of an entrance door to the building?</b> | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/>            |

## 4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

I have assumed that the subject building is currently factored. Nonetheless, this should be clarified legally, prior to purchase.

Alterations have taken place within the past including the formation of the central bathroom and galley style kitchen apartments. I have therefore assumed that all required Local Authority and associated documentation was obtained and complied with for past alterations, where applicable. This should be confirmed legally.

The subject property is currently tenanted and I have therefore assumed that this on a short term private residential tenancy basis only, and that vacant possession will be readily available. This should be confirmed.

I have assumed that replacement window units were installed to a guaranteed standard and in compliance with regulations in force at the time. This should be confirmed.

Glasgow Airport is located within the local area. Further information in relation to associated flight paths should be clarified. A degree of noise disturbance may therefore be encountered.

There are some water courses located within the nearby area. I am unaware of any adverse associated issues in this regard and have therefore assumed that buildings insurance has been/will be obtained under normal terms. This can be clarified.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Liabilities regarding communal repair issues/responsibilities should be fully confirmed legally, prior to purchase, as should any/all other outstanding issues, if applicable.

### Estimated reinstatement cost for insurance purposes

£185,000 (ONE HUNDRED AND EIGHTY FIVE THOUSAND POUNDS).

It should be noted this sum is an estimate calculated by using a rate per square metre based on information provided by Building Cost Information Service (BCIS).

### Valuation and market comments

£40,000 (FORTY THOUSAND POUNDS).

Has the property been extended / converted / altered?  Yes  No

If Yes provide details in General Remarks.

## Roads

Made up road  Unmade road  Partly completed new road  Pedestrian access only  Adopted  Unadopted

# Mortgage Valuation Report

## General Remarks

When inspected the subjects were occupied, heavily furnished, and floors were covered.

Generally the subjects were found to be in a fair only condition requiring upgrading/maintenance attention. We have endeavoured to reflect all relevant factors. No obvious significant defects, which would have an adverse impact upon value or security, were in evidence with regards to limitations.

Alterations have taken place within the past including the formation of the central bathroom and galley style kitchen apartments. We have therefore assumed that all required Local Authority and associated documentation was obtained and complied with for past alterations, where applicable. This should be confirmed legally.

The subject property is currently tenanted and we have therefore assumed that this on a short term private residential tenancy basis only, and that vacant possession will be readily available.

Glasgow Airport is located within the local area.

We have assumed that buildings insurance has been/will be obtained under normal terms. This can be clarified.

## Essential Repairs

None significant apparent, based on limitations, which would have an adverse impact upon value or security.

Estimated cost of essential repairs £  Retention recommended?  Yes  No Amount £

# Mortgage Valuation Report

## Comment on Mortgageability

We would confirm, in our opinion, that the subjects form suitable mortgage security at the stated level of value. Mortgage lending institutions will have their own individual lending criteria's, however. This should be appreciated.

## Valuations

## Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

## Information to be given to prospective buyer(s)

|    |   |  |
|----|---|--|
| 1. | <b>Length of ownership</b>  |  |
|    | How long have you owned the property?   | 12 years                                   |
| 2. | <b>Council tax</b>  |  |
|    | Which Council Tax band is your property in? (Please circle)   |  |
|    | Ⓐ    B    C    D    E    F    G    H  |  |
| 3. | <b>Parking</b>  |  |
|    | What are the arrangements for parking at your property?<br>(Please tick all that apply)   |  |
|    | <ul style="list-style-type: none"><li>• Garage <input type="checkbox"/></li><li>• Allocated parking space <input type="checkbox"/></li><li>• Driveway <input type="checkbox"/></li><li>• Shared parking <input type="checkbox"/></li><li>• On street <input checked="" type="checkbox"/></li><li>• Resident permit <input type="checkbox"/></li><li>• Metered parking <input type="checkbox"/></li><li>• Other (please specify): <input type="text"/></li></ul> |  |
| 4. | <b>Conservation area</b>  |  |
|    | Is your property in a designated Conservation Area (i.e. an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?   | <del>Yes / No /</del><br><b>Don't know</b> |

# Property Questionnaire

|           |  |                 |
|-----------|--|-----------------|
| <b>5.</b> | <b>Listed buildings</b>  |                 |
|           | Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?  | <b>Yes / No</b> |
| <b>6.</b> | <b>Alterations/additions/extensions</b>  |                 |
| <b>a.</b> | <p>(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?</p> <p><u>If you have answered yes</u>, please describe below the changes which you have made:</p>  | <b>Yes / No</b> |
|           | <p>(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?</p> <p><u>If you have answered yes</u>, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.</p> <p>If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:</p> | <b>Yes / No</b> |
| <b>b.</b> | <p>Have you had replacement windows, doors, patio doors or double glazing installed in your property?</p> <p><u>If you have answered yes</u>, please answer the three questions below:</p>   | <b>Yes / No</b> |
|           | (i) Were the replacements the same shape and type as the ones you replaced?  | <b>Yes / No</b> |
|           | (ii) Did this work involve any changes to the window or door openings?   | <b>Yes / No</b> |
|           | <p>(iii) Please describe the changes made to the windows, doors or patio doors (with approximate dates when the work was completed):</p> <p>Please give any guarantees which you received for this work to your solicitor or estate agent.</p>   |                 |
|           |  |                 |
