

Property Description: A two bedroom mid-terrace house situated at the Fusehill Street end of Close Street. The location within short walking distance of the University of Cumbria Fusehill Street Campus. Local amenities close by include a variety of shops. Carlisle City Centre is only a few minutes walk away and there are regular bus services close by.

The property briefly comprises: living room, kitchen / diner and utility room to the ground floor, 2 bedrooms and bathroom to the first floor. Outside there is a shared rear yard with private shed and pedestrian access. Residents parking scheme. Gas central heating and double glazing.

Energy performance certificate (EPC)

38, Close Street
CARLISLE
CA1 2HB

Energy rating

D

Valid until:

8 April 2028

Certificate number:

8358-7324-5050-6711-2906

Property type

Mid-terrace house

Total floor area

68 square metres

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is D. It has the potential to be B.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D
the average energy score is 60

Score	Energy rating	Current	Potential
92+	A		
81-91	B		87 B
69-80	C		
55-68	D	64 D	
39-54	E		
21-38	F		
1-20	G		

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Pitched, 200 mm loft insulation	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, TRVs and bypass	Average
Hot water	From main system	Good
Lighting	No low energy lighting	Very poor
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, mains gas	N/A

Primary energy use

The primary energy use for this property per year is 282 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend **£765 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £260 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2018** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 7,524 kWh per year for heating
 - 1,974 kWh per year for hot water
-

Impact on the environment

This property's environmental impact rating is D. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

An average household produces 6 tonnes of CO₂

This property produces 3.4 tonnes of CO₂

This property's potential production 1.2 tonnes of CO₂

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Internal or external wall insulation	£4,000 - £14,000	£122
2. Low energy lighting	£35	£41
3. Heating controls (room thermostat)	£350 - £450	£23
4. Condensing boiler	£2,200 - £3,000	£43
5. Solar water heating	£4,000 - £6,000	£30
6. Solar photovoltaic panels	£5,000 - £8,000	£271

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Christopher Nuttall
Telephone	01524 220013
Email	energy@etsos.co.uk

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/002621
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

About this assessment

Assessor's declaration	No related party
Date of assessment	9 April 2018
Date of certificate	9 April 2018
Type of assessment	RdSAP
