

**Property Description:** A two bed mid-terraced house in the ever-popular area of Etterby, which is situated to the north of the River Eden, a short distance from Carlisle City Centre. There is a bus route close by and there are local amenities within waking distance. The property has new carpeting and decor throughout and briefly comprises: Living Room with feature fire grate, Kitchen, Dining Area with tiled floor, bathroom. To the first floor is a double bedroom and a single bedroom. Outside there is a large rear garden shared with next door which has a low maintenance gravel covering. There is a residents parking scheme on Garden Street. Gas central heating. Double glazing. Council Tax Band A, EPC rating C.

# Energy performance certificate (EPC) 6, Garden Street Edentown CARLISLE CA3 9LP Property type Mid-terrace house Total floor area Total floor area Energy rating Valid until: 26 October 2026 Certificate number: 8693-8054-8829-3307-5063 Mid-terrace house

# Rules on letting this property

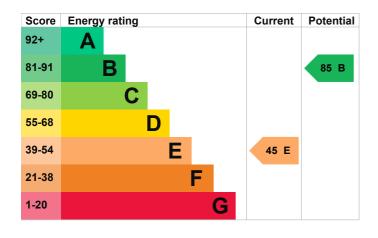

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

# **Energy rating and score**

This property's energy rating is E. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

# Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, no insulation	Very poor
Roof	Flat, no insulation (assumed)	Very poor
Window	Single glazed	Very poor
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Average
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, smokeless fuel	N/A

#### Primary energy use

The primary energy use for this property per year is 440 kilowatt hours per square metre (kWh/m2).

#### **Additional information**

Additional information about this property:

· Cavity fill is recommended

# How this affects your energy bills

An average household would need to spend £1,249 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £676 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2016** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### **Heating this property**

Estimated energy needed in this property is:

- 12,786 kWh per year for heating
- 2,017 kWh per year for hot water

# Impact on the environment

This property's environmental impact rating is F. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

# This property produces 6.4 tonnes of CO2 This property's potential 1.7 tonnes of CO2 production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

#### **Carbon emissions**

An average household produces

6 tonnes of CO2

# Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Increase loft insulation to 270 mm	£100 - £350	£195
2. Cavity wall insulation	£500 - £1,500	£58
3. Internal or external wall insulation	£4,000 - £14,000	£77
4. Floor insulation (solid floor)	£4,000 - £6,000	£36
5. Draught proofing	£80 - £120	£24
6. Condensing boiler	£2,200 - £3,000	£148
7. Flue gas heat recovery	£400 - £900	£23
8. Solar water heating	£4,000 - £6,000	£25
9. Replace single glazed windows with low-E double glazed windows	£3,300 - £6,500	£91
10. Solar photovoltaic panels	£5,000 - £8,000	£258
