Book shared facilities

Studio space

Select gym session from wall
mounted panel. Cleaning services
dispatched on utilisation

Fault reporting/management

Raise issues in CAFM system/
directly to operator. Generate alerts
and notifications for operator
team members

24/7 access

Multifactor authentication requiring
out of hours visitors to verify
themselves

Car park entrance

ANPR Cameras. Traffic light
indicate it's safe to enter.
Intercom available

Controlled parking

Showing messages on
digital signage.

Current Proposed Smart Technology Specification

Meeting invitation

Easy to understand communication to visitors. Smart pass code, host contact details, Wi-Fi Instructions

Smart pass

Seamless visitor experience. Welcome visitors by name

Wi-Fi access

A Wi-Fi access code is automatically generated for all guests

Wayfinding

Help guests orientate within the building. Signpost people towards amenity space and events

Data analysis

Data analysed as reports. Cloud tools allow comparisons in portfolio

Capacity Management

Ensure compliance with building and fire regulations. Trigger event based cleaning activities

Environmental sensing

Understanding of air quality. Alert sent to Operator if falls below KPI. Create reports to demonstrate air quality

Loading access

Couriers contractor-like access, limited to loading bay area. Notifications of courier deliveries

Command & Control

Flexible command and control interface. Remote access to dashboards and control interface

WiredScore Enabled

WiredScore certification recognizes and promotes best-in-class digitally connected buildings

Sustainability

19 Cornwall has been designed to the highest standards of environmental design.

The design strongly focuses on reducing energy consumption. The building is designed to be net zero carbon in operation aligned with a 'Paris-proof' science-based trajectory to limit temperature increases to 1.5 degree by 2050. Predicted energy use is 65% lower than a typical building regulations compliant office building.

The embodied carbon impact of the design has been carefully considered. A responsible approach has been taken to the building specification, reducing the quantities of materials and finishes used, using low carbon materials where possible and using recycled materials or materials with high recycled content. This results in the embodied carbon impact of the building being around 75% lower than a typical new build office.

Net Zero Carbon
in operation

Base Building Energy will achieve
the UKGBC Energy Performance
2025-2030 Interim Target

Delivering excellent

Achieving 'A' rating

4000 sq ft of PV panels

Targeting WELL Silver

A woman with long dark hair, wearing a bright yellow suit and a brown handbag, stands on a concrete path next to a canal. The canal is lined with a brick wall and lush greenery. Several boats are docked along the canal, including a blue boat in the foreground. The scene is brightly lit, suggesting a sunny day. The word "Location" is overlaid in large white text across the center of the image.
