EXCELLENCE AS STANDARD

An inspiring place to call home

A Hayfield home is anything but ordinary. We use different suppliers, different materials, and different fittings to create a home that looks and feels original and is full of personality. It's what we call the Hayfield Difference.

Hayfield Heights has been designed to blend seamlessly with its surroundings and offer a range of brand-new homes with an unrivalled specification and the gold standard of energy efficiency.

The exceptional range of 50 two, four and five-bedroom homes will take pride of place in the charming village of Gotherington, and each home will be EPC A-rated and boast our premium specification, as standard.

Committed to sustainable living

As a responsible housebuilder, we are committed to crafting premium, zero carbon ready family homes. Every detail has been carefully considered to create homes that achieve the gold standard of efficiency, meaning residents can live a more sustainable lifestyle without compromising on luxury.

CARBON EMISSIONS

To have the best chance of avoiding a 2°C rise in global temperatures, the average global carbon footprint per year needs to drop to under 2 tonnes by 2050. We introduced our Zero Carbon Ready specification in 2021 – four years in advance of the 2025 Future Homes Standard legislation.

The average EPC A-rated at Hayfield Heights emits just 0.4 tonnes of carbon per year, which is 90% less carbon emissions compared to a typical existing home and 59% less emissions than the average new build home.
