Things to know:

- Unfortunately, the local authority does not tell us the council tax banding. They will confirm this with you directly after you take ownership.
- Utilities will be connected and up and running. We'll let you know the suppliers either on completion day or shortly before. You'll need to let them know your meter readings shortly after you complete the purchase.
- The Openreach line will be connected at the house. Your chosen phone/broadband supplier will arrange the connection at the other end directly with Openreach.
- Your new home may not show up on postcode searches right away. Don't worry, it will usually appear soon after you move in. This process is handled between the developer, Royal Mail and the local authority.
- Bins will either be provided by the developer or local authority. You may need to order and pay for them. Your sales negotiator will be able to give you more information on this nearer the time you take ownership.
- The property will go through a three stage snagging process by our qualified team. As with all new properties there may be defects that arise through a defect period and you will be given details of how to report these once you move in.
- Spaces for white goods usually accommodate the standard sized fridge/freezer and washing machine and are a minimum width of approximately 600mm. However we would recommend buyers measure the spaces prior to ordering any new appliances.

Please note, this list is not exhaustive and will sometimes vary from site to site. If you have questions about a specific site or plot, please speak to your sales negotiator.

Happy Days.
