Energy performance certificate (EPC)

11 HEADLAND PARK ROAD PRESTON PAIGNTON TQ3 2EN Energy rating

Valid until: 1 November 2030

Certificate number:

2222-1924-5229-2452-2222

Property type Semi-detached house

Total floor area 189 square metres

Rules on letting this property

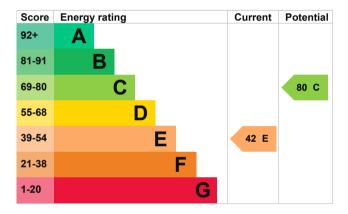

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for landlords on the regulations and exemptions</u> (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is E. It has the potential to be C.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, 75 mm loft insulation	Average
Window	Some double glazing	Very poor
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, no room thermostat	Very poor
Hot water	From main system, no cylinder thermostat	Poor
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	Room heaters, mains gas	N/A

Primary energy use

The primary energy use for this property per year is 384 kilowatt hours per square metre (kWh/m2).

How this affects your energy bills

An average household would need to spend £2,498 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could **save £1,398 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2020** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 30,642 kWh per year for heating
- 3,501 kWh per year for hot water

This property's environmental impact rating is F. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces

6 tonnes of CO2

This property produces 13.0 tonnes of CO2

This property's potential 4.1 tonnes of CO2 production

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Increase loft insulation to 270 mm	£100 - £350	£82
2. Cavity wall insulation	£500 - £1,500	£306
3. Floor insulation (suspended floor)	£800 - £1,200	£157
4. Draught proofing	£80 - £120	£121
5. Heating controls (room thermostat and TRVs)	£350 - £450	£205

Step	Typical installation cost	Typical yearly saving
6. Condensing boiler	£2,200 - £3,000	£422
7. Replace single glazed windows with low-E double glazed windows	£3,300 - £6,500	£104
8. Solar photovoltaic panels	£3,500 - £5,500	£370

Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.
