Sustainable Living

As an established residential developer, sustainability is the greatest challenge facing our industry today and at Lagan Homes we recognise that everything we do has an impact on both people and the environment.

We take pride in fulfilling our duty to operate as a responsible business and aim to continuously reduce our environmental impact, which is reflected in the way we design and build our homes leading to a reduction in our carbon footprint every year.

Increasingly, we employ green construction methods by reducing, recycling and re-using waste, to optimise resources and minimise disruption. Our building materials are responsibly sourced and we aim to ensure that our homes and communities are built in a way that is respectful of the plants and wildlife in the surrounding area.

Our new homes are designed with energy efficiency as a key consideration, using the latest technologies, methods and materials to help cut down carbon emissions. Our developments can include solar PV panels, EV charging points, high EPC ratings and work from home spaces. Other energy saving features include:

-  Air source heat pumps
-  Good levels of insulation
-  Quality construction on-site
-  Energy efficient appliances
-  Low energy lighting
-  Save £1,980 on energy bills*

In turn these measures help to improve the quality of life for our customers by significantly reducing the cost it takes to run a new home in one of our newly created communities.

Every effort is made to combine the character of our exteriors with that of their locations. When buying a new-build home with Lagan Homes you can be certain that alongside the thoughtful design and high-quality specification, your home has been created to maximise energy efficiency. 100% of all our homes built in 2024 were rated EPC B or above, and by buying a new build home this will help reduce carbon emissions by more than 3.51 tonnes a year. On average this could mean as a new home owner you could save £1,980 on energy bills a year compared to an older house, keeping you warm in winter and saving you money for the more enjoyable things in life.

*Energy figures quoted are based on a yearly average taken from the Home Builders Federation Energy Report "Watt a Save - Energy efficient new homes" updated November 2024. Photographs show typical show home interiors from previous developments.
