Features

Highly-efficient Insulation

We use highly-efficient insulation which reduces heat escaping, so your home will be super cosy and cost less to keep warm.

Argon Filled Double Glazing

Argon-filled double-glazing allows the heat from the sun in whilst minimising heat loss, this means you could enjoy lower energy bills.

Smart Thermostat

We will install a smart thermostat that learns the temperatures that you like when you're home & then programmes itself. It automatically turns down the heating when you're away to help save energy & lower your bills.

Improved Ventilation

This energy-efficient ventilation solution uses small fans which are fitted in bathrooms & kitchens. They ensure good indoor air quality as they extract the stale air out of the room to maximize comfort.

Waste Water Heat Recovery System

This technology recovers the heat that would normally be lost down the shower drain. The outgoing waste warm water pre-heats the cold mains water coming into the home, reducing the energy required to heat your water.
