

An architectural rendering of a modern urban development. In the foreground, a calm body of water reflects the sky and the buildings. A gravel path runs along the water's edge, where two people are walking. The middle ground features a row of contemporary houses with light-colored facades and dark roofs. Behind them are taller, multi-story apartment buildings with dark facades and balconies. The background shows a blue sky with scattered white clouds.

Climate Innovation District

South Bank, Leeds

The Climate Innovation District

Sitting on the fringe of the city centre, what was once an industrial landscape is evolving into a home for residents with a sustainable urban lifestyle. With all the convenience of modern city living and access to nature and water ways, the Climate Innovation District is a space where residents can thrive in day to day life.

Built with sustainable materials and innovative technologies, our homes redefine urban living. With riverside parks, communal gardens, and pedestrian-friendly streets, prioritising your well-being and connectivity. Conveniently located with access to public transport and local amenities, the district offers the perfect blend of urban convenience and natural beauty.

Located a short walk from Leeds city centre, the Climate Innovation District offers access by foot to Leeds' urban amenities and cultural experiences. Immediately on your doorstep a neighbourhood of independent cafès and outdoor sports makes it easy to tailor your weekends for enjoyment. From paddle boarding to hot yoga, wild swimming to riverside running, croissants to home roasted coffee – everything is located within 5 minutes of your front door. If your idea of city living is soaking in the best dance, art and theatre in the north of England then enjoy a short stroll up the River Aire and immerse yourself in the diverse culture and arts of the thriving city centre.

Amenity

This is city centre living, but not as you know it. The Climate Innovation District's location puts it in a league of its own. With the riverside on your doorstep, it's easy to forget you're in the middle of the metropolis, but you'll always be in close proximity to all that Leeds has to offer.

We're pleased to work alongside independent brewery Pig Love Brewing to create a riverside bar and food venue for residents to get together and enjoy the warmer months of the year along the bank of the river.

We recently installed a basketball court which is as much an art installation as it is a chance to shoot a few hoops and have some fun.

Just around the corner from CID is Leeds Dock where you'll find an award-winning bakery, brand new co-working space and bar, as well as outdoor swimming and paddle boarding all year round.

Food and drink

Piglove By The River – Just on the doorstep

Department – 4 minutes

North Star Coffee – 6 minutes

Nova Bakehouse – 6 minutes

Canary Bar – 7 minutes

Home Restaurant – 12 minutes

Sustainability

Bold & innovative, we don't just talk about being sustainable – we live and breathe it

On average, buyers of new homes save over £2,000 on household bills per property each year*. Our new build Citu homes are designed with beauty in mind and are built to tackle the biggest challenge of our generation - climate change. Whilst we consider carbon emissions during each step of the journey, the efficiencies in design and materials have a huge impact on the energy required to run your home.

Designed using passive house principles and use Mechanical Heat Recovery Ventilation (MVHR) units to regulate the internal airflow and temperature.

High levels of insulation, resulting in the energy required for heating is around 5 times lower than the average UK house.

Off-site renewable electricity as opposed to gas to significantly reduce carbon footprint.

CID houses a solar array which will be co-owned by all residents, to provide a source of clean, renewable energy.

Air source heat pumps which use renewable energy to heat the homes.

Built in our state of the art, on-site manufacturing facility.

All timber used is from FSC certified forests which are sustainably managed so as many or more trees planted than are cut down.

EPC rating B.
