

CITU

Ställ

Updated October 2024

Ställ

Serene and uncompromising: Established within a wall of trees on the periphery of the city centre Ställ encapsulates the benefit of finding better ways to live within our cities. A city shouldn't just be a place you come to work - it should be where you want to make your home.

Go with the flow

Lining the edge of the Leeds/Liverpool canal – a wetland home to local herons, swans and ducks – and flanked by abundant plant life, guarantees a peaceful outlook enveloped by greenness. A 20-minute cycle along the water's rippling edge takes you direct to Leeds City Centre, swerving commuter traffic entirely.

Maximising on eco-friendly living practices, free on-site bike storage is plentiful, all households with two or more bedrooms will have optional access to a car parking space, all spaces are EV car charging enabled. This means infrastructure is in place to allow installation of the exact type of charger needed for resident's electric car. Residents can use the governments OLEV Grant to help cover the cost of this.

The Location

This is urban living, but not as you know it. Ställ's location puts it in a league of its own.

With the canal path on your doorstep, it's easy to forget you're in the middle of the metropolis, but you'll always be in close proximity to all that Leeds has to offer.

Food & drink

Raynville Superstore Bottleshop - 4 minutes

Kirkstall Bridge Inn - 6 minutes

Melodie 71 - 12 minutes

Shopping

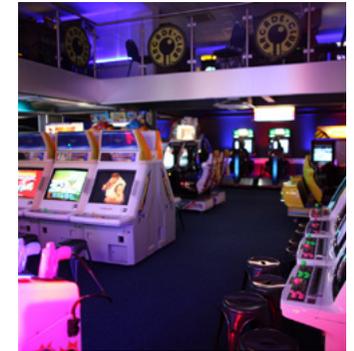

Kirkstall Bridge Retail Park - 8 minute

Morrisons - 10 minutes

Headingley Stadium - 30 minutes

Cardigan Fields - 31 minutes

Approximate timings, by foot

Sustainability

Bold & innovative, we don't just talk about being sustainable – we live and breathe it

On average, buyers of new homes save over £2,000 on household bills per property each year*. Our new build Citu homes are designed with beauty in mind and are built to tackle the biggest challenge of our generation - climate change. Whilst we consider carbon emissions during each step of the journey, the efficiencies in design and materials have a huge impact on the energy required to run your home.

Designed using passive house principles and use Mechanical Heat Recovery Ventilation (MVHR) units to regulate the internal airflow and temperature.

High levels of insulation, resulting in the energy required for heating is around 5 times lower than the average UK house.

Off-site renewable electricity as opposed to gas to significantly reduce carbon footprint.

Ställ houses a solar array which will be co-owned by all residents, to provide a source of clean, renewable energy.

Any timber used is from FSC certified forests which are sustainably managed so as many or more trees planted than are cut down.
