Clean air flow system, MVHR

Mechanical ventilation with heat recovery. Benefits include:

- Improves indoor air quality
- Recovers up to 95% of the heat of the extracted air
- Can off-set heating costs and reduce fuel bills

An MVHR system is usually the preferred method in airtight homes as it extracts moist stale air and supplies fresh warmed filtered air into the home while recovering up to 95% of the heat of the extracted air.

MVHR systems improve indoor air quality throughout the home and can help reduce symptoms for asthma and allergy sufferers. The ventilation unit filters the incoming air to remove pollutants and insects and provides constant cleaned, warmed, fresh filtered air throughout the home.
