

TOTAL FLOOR AREA: 42.01 sq m (450 sq ft) (approx.)
 This energy efficiency rating is based on the current (2020) energy efficiency of the property. It is not a guarantee of the energy efficiency of the property in the future. The energy efficiency of the property may change over time due to changes in the property or the way it is used. The energy efficiency of the property may also change due to changes in the energy prices. The energy efficiency of the property may also change due to changes in the government policy. The energy efficiency of the property may also change due to changes in the technology. The energy efficiency of the property may also change due to changes in the market. The energy efficiency of the property may also change due to changes in the environment. The energy efficiency of the property may also change due to changes in the society. The energy efficiency of the property may also change due to changes in the economy. The energy efficiency of the property may also change due to changes in the culture. The energy efficiency of the property may also change due to changes in the politics. The energy efficiency of the property may also change due to changes in the religion. The energy efficiency of the property may also change due to changes in the philosophy. The energy efficiency of the property may also change due to changes in the science. The energy efficiency of the property may also change due to changes in the art. The energy efficiency of the property may also change due to changes in the literature. The energy efficiency of the property may also change due to changes in the music. The energy efficiency of the property may also change due to changes in the film. The energy efficiency of the property may also change due to changes in the television. The energy efficiency of the property may also change due to changes in the internet. The energy efficiency of the property may also change due to changes in the mobile phone. The energy efficiency of the property may also change due to changes in the car. The energy efficiency of the property may also change due to changes in the house. The energy efficiency of the property may also change due to changes in the garden. The energy efficiency of the property may also change due to changes in the pool. The energy efficiency of the property may also change due to changes in the garage. The energy efficiency of the property may also change due to changes in the driveway. The energy efficiency of the property may also change due to changes in the road. The energy efficiency of the property may also change due to changes in the street. The energy efficiency of the property may also change due to changes in the town. The energy efficiency of the property may also change due to changes in the village. The energy efficiency of the property may also change due to changes in the city. The energy efficiency of the property may also change due to changes in the country. The energy efficiency of the property may also change due to changes in the world. The energy efficiency of the property may also change due to changes in the universe. The energy efficiency of the property may also change due to changes in the everything.
