General Remarks

A modern three bedroom detached property situated within a small development of properties on the fringes of the village of Tetchill near Ellesmere. The property was constructed in 2019 utilising a passive standard timber frame and passive slab foundation, making it extremely energy efficient and includes the remainder of the 10 year ICW warranty.

The living accommodation includes a large open plan kitchen/dining room and bi-folding doors lead off both this room and the living room to the extensive gardens. On the first floor there are three bedrooms (master en-suite) and a family bathroom. The gardens of the property are south-westerly facing and a most notable feature of the property. There is ample off road parking to the front, while the loft space has also been extensively boarded to provide a useful storage space. Early inspection is highly recommended.

The gardens also include three apple trees and an ornamental cherry tree. Bordering the lawns are flowering beds, mature hedges and timber fencing. At the rear is a bin storage area connected by a path leading around the property. The gardens retain their privacy and are south-westerly facing, so benefit from full sun for the majority of the day.

Energy Efficiency & Heating: The property was constructed in 2019 using a passive standard timber frame and passive slab foundation. This created a highly insulated thermal envelope with high performance and recycled insulation which has exceptional sustainability. This type of building eliminates draughts and cold spots to provide a comfortable and quiet living space.

The superior air tightness of the property requires a MVHR System (Brink Sky 300 and Brink Renovent 180) which provides filtered air at a constant temperature. The filtered air is beneficial for allergy and asthma sufferers and provides extremely comfortable living conditions. The

system reduces ventilation heat loss by up to 90%, while the running costs are significantly reduced due to the exceptionally air tight building envelope and insulation.

The use of triple glazed high performance flush casement uPVC windows also helps reduce energy loss by around 70% compared to a conventional window. The external doors have similar properties and are secured by design. A Worcester LPG Combi boiler provides the small amount of heating that the property requires.

Services: We are informed that the property is connected to mains electricity, water and drainage supplies. The property is warmed by an LPG boiler with private underground gas storage tank.
