General Remarks

A modern four bedroom detached property situated within a small development of properties on the fringes of the village of Tetchill near Ellesmere. The property was constructed in 2021 utilising a passive standard timber frame and passive slab foundation, making it extremely energy efficient and includes the remainder of the 10 year ICW warranty.

Notable features of the living accommodation include a large open plan kitchen/dining/living room with bi-folding doors leading to a detached oak framed garden room which opens into the gardens. There is an additional reception room on the ground floor currently used as a bar while on the first floor there are four generous bedrooms (master en-suite) and a family bathroom.

The south facing gardens have also been subject to an extensive scheme of improvement during the owners tenure and include numerous outdoor entertaining spaces as can be seen within the photography. Finally, the property also includes solar panels mounted to the rear of the garage with 15 kW of battery storage and EV point, which alongside the property's construction makes it exceptional in terms of its running costs. Internal inspection is essential in the agent's opinion.

Location: The development is located in the picturesque village of Tetchill, approximately 1 mile from the market town of Ellesmere in the heart of what is known as 'Shropshire's Lake District'. Ellesmere itself is a thriving market town with a comprehensive range of shops and amenities and idyllic surroundings for recreational use. Excellent Primary and Secondary schools along with the renowned Ellesmere College. Easily accessible to the larger towns of Oswestry, Shrewsbury along with the cities of Wrexham and Chester. Good road links from the A5 to the motorway network. Nearby Gobowen has a main line train station with links to Birmingham and beyond.

A paved pathway leads to the front door and around to a gate accessing the rear garden. The rear garden has an oak framed gazebo/hot tub area with adjoining patios and lawns beyond, together with vegetable beds, soft fruit bushes and apple trees. The whole is enclosed by a hedge and fences to the boundaries affording privacy, with a shed to the side elevation.

Tenure: We are informed that the property is freehold subject to vacant possession upon completion.

Energy Efficiency and Heating: The property was constructed in 2021 using a passive standard timber frame and passive slab foundation. This created a highly insulated thermal envelope with high performance and recycled insulation which has exceptional sustainability. This type of building eliminates draughts and cold spots to provide a comfortable and quiet living space. The superior air tightness of the property requires a MVHR System (Brink Flair 325) which provides filtered air at a constant temperature.

The filtered air is beneficial for allergy and asthma sufferers and provides extremely comfortable living conditions. The system reduces ventilation heat loss by up to 90%, while the running costs are significantly reduced due to the exceptionally air tight building envelope and insulation. The use of triple glazed high performance flush casement uPVC windows also helps reduce energy loss by around 70% compared to a conventional window. The external doors have similar properties and are secured by design. A Worcester LPG Combi boiler provides the small amount of heating that the property requires.
