HOME REPORT

THORNHALL

FORRES IV36 2TL

ENERGY PERFORMANCE CERTIFICATE

Energy Performance Certificate (EPC)

Dwellings

Scotland

THORNHALL, FORRES, IV36 2TL

Dwelling type: Detached house Date of assessment: 11 May 2018 Date of certificate: 18 May 2018 **Total floor area:** 223 m²

Primary Energy Indicator: 152 kWh/m²/year

Reference number: 9595-1003-3205-3378-9904 Type of assessment: RdSAP, existing dwelling

Approved Organisation: **Elmhurst**

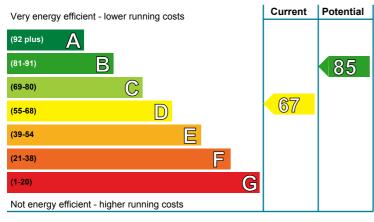

Main heating and fuel: Boiler and radiators, oil

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£4,662	See your recommendations
Over 3 years you could save*	£852	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

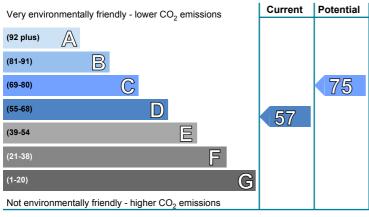

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is band D (67). The average rating for EPCs in Scotland is band D (61).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO₂) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is band D (57). The average rating for EPCs in Scotland is band D (59).

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Floor insulation (suspended floor)	£800 - £1,200	£447.00	Ø
2 Low energy lighting	£105	£207.00	
3 Condensing boiler	£2,200 - £3,000	£201.00	Ø

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

The Green Deal may allow you to make your home warmer and cheaper to run at no up-front capital cost. See your recommendations report for more details.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE **DWELLING AND NOT BE REMOVED UNLESS IT IS** REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Timber frame, as built, partial insulation (assumed)	***	***
	Timber frame, as built, insulated (assumed)	★★★★ ☆	★★★ ☆
Roof	Pitched, 270 mm loft insulation	****	★★★ ☆
Floor	Suspended, no insulation (assumed)	_	_
Windows	Fully double glazed	***	***
Main heating	Boiler and radiators, oil	***	***
Main heating controls	Programmer, room thermostat and TRVs	****	★★★ ☆
Secondary heating Room heaters, dual fuel (mineral and wood)		_	_
Hot water	From main system, plus solar	****	★★★ ☆
Lighting	Low energy lighting in 22% of fixed outlets	***	***

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 42 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 9.4 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 3.7 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,825 over 3 years	£3,282 over 3 years	
Hot water	£282 over 3 years	£216 over 3 years	You could
Lighting	£555 over 3 years	£312 over 3 years	save £852
Total	s £4,662	£3,810	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

December ded masses		Indicative cost	Typical saving	Rating after improvement		Green
Re	commended measures	indicative cost	per year	Energy	Environment	Deal
1	Floor insulation (suspended floor)	£800 - £1,200	£149	C 72	D 63	
2	Low energy lighting for all fixed outlets	£105	£69	C 73	D 63	
3	Replace boiler with new condensing boiler	£2,200 - £3,000	£67	C 75	D 66	
4	Wind turbine	£15,000 - £25,000	£576	B 85	C 75	©

Measures which have a green deal tick are likely to be eligible for Green Deal finance plans based on indicative costs. Subsidy also may be available for some measures, such as solid wall insulation. Additional support may also be available for certain households in receipt of means tested benefits. Measures which have an orange tick may need additional finance. To find out how you could use Green Deal finance to improve your property, visit www.greenerscotland.org or contact the Home Energy Scotland hotline on 0808 808 2282.

Choosing the right improvement package

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting).

3 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

4 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present:

- Solar water heating
- Solar photovoltaics

Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	27,091	N/A	N/A	N/A
Water heating (kWh per year)	3,350			

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Michael McDonald

Assessor membership number: EES/009379

Company name/trading name: D M Hall Chartered Surveyors LLP

Address: 27 High Street

Elgin

IV30 1EE Phone number: 01343 548501

Email address: enquiries@dmhall.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Opportunity to benefit from a Green Deal on this property

Under a Green Deal, the cost of the improvements is repaid over time via a credit agreement. Repayments are made through a charge added to the electricity bill for the property.

To see which improvements are recommended for this property, please turn to page 3. You can choose which improvements you want to install and ask for a quote from an authorised Green Deal provider. They will organise installation by an authorised Green Deal installer. If you move home, the responsibility for paying the Green Deal charge under the credit agreement passes to the new electricity bill payer.

For householders in receipt of income-related benefits, additional help may be available.

To find out more, visit www.greenerscotland.org or call 0808 808 2282.

Authorised home energy assessment

Finance at no upfront cost

Choose from authorised installers May be paid from savings in energy bills

Repayments stay with the electricity bill payer

SINGLE SURVEY

survey report on:

· · · · · · · · · · · · · · · · · · ·	
Property address	THORNHALL DYKE FORRES IV36 3TL
Customer	Mrs Brigid Aitken
Customer address	Thornhall Dyke Forres IV36 3TL
Prepared by	DM Hall LLP
Date of inspection	11th May 2018

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report ² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Detached two storey house with detached chalet within the grounds.
Accommodation	Ground floor: entrance vestibule and hall, master bedroom with ensuite shower room, second bedroom with ensuite shower room, two further bedrooms, family bathroom, snug, bedroom with access door to garage. First floor: open plan lounge/dining area, dining kitchen, rear vestibule, wc/utility area, additional lounge. Chalet: porch, open plan lounge/kitchen, three bedrooms, shower room, bathroom.
Gross internal floor area (m²)	Main house 224 sq.m approximately. Chalet 52 sq.m approximately.
Neighbourhood and location	The property is located within an attractive rural area a short distance from the village of dyke where there is a primary school. A wide range of local transport, shopping, educational and social facilities are available in the nearby town of Forres. The property enjoys an open outlook over surrounding agricultural land. There is a wooded area to the side.
Age	Constructed around 1975.
Weather	Overcast but dry.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate. There is a brick chimney stack externally pointed. Flashings at the base of the chimney are formed in cement. This is fitted with a clay pot. There is a flue for the multi fuel stove on the chalet.

Roofing including roof space

Sloping roofs were visually inspected with the aid of binoculars where appropriate.

Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.

Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.

If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.

The main roof is pitched and clad in concrete interlocking tiles. The ridge is formed in tile. There is a lead valley between the extension and main house. There are solar thermal panels and photovoltaic panels fitted to the front roof pitch.

There are flat roof sections over a dormer window to the front and over the porch. These areas are clad in mineral felt.

Access to the roof space was obtained via a ceiling hatch in the upper vestibule off the kitchen. The roof is of timber frame construction with fibreboard insulation board. There is undertile felt. Glasswool insulation has been laid between and across the ceiling joists.

Access to the roof space over the extension was obtained via a ceiling hatch in the inner hall. Again this roof is of timber framed construction with fibreboard insulation board. Insulation has been laid between and across the ceiling joists.

The chalet roof is pitched and clad in concrete interlocking tiles. The roof space of the chalet was sealed shut and no access was available. The owner has advised that this is insulated to the same level as the main house.

Rainwater fittings

Visually inspected with the aid of binoculars where appropriate.

The gutters are of a pvc half round design with pvc round downpipes.

Guttering on the chalet is also of a pvc half round design with pvc round downpipes.

Main walls

Visually inspected with the aid of binoculars where appropriate.

Foundations and concealed parts were not exposed or inspected.

The main house is of cavity construction with a timber framed load bearing inner leaf and a roughcasted concrete block outer leaf around the majority of the ground floor. Small parts of the lower walls and all of the upper walls are clad in timber weatherboarding. The weatherboarding has a painted finish.

The rear extension is of timber framed construction with a roughcasted concrete blockwork outer leaf.

The chalet is of timber framed construction externally timber clad with a pvc frontage.

Windows, external doors and joinery

Internal and external doors were opened and closed where keys were available.

Random windows were opened and closed where possible.

Doors and windows were not forced open.

Windows are partly of a triple glazed pvc framed type, partly of a pvc double glazed type and partly of a double glazed timber casement type.

Much of the external walls are clad in timber weatherboarding. Soffits and fascia boards are clad in timber/upvc materials. There are hardwood double glazed bi-fold doors over the porch. The rear upper door is of a timber framed and panel type with double glazed inset. There are double glazed upvc French windows leading from the dining area to the balcony. There is a timber door between the garage and house. There are double glazed upvc French windows leading from the snug to the garden. There is a timber balcony area across much of the front of the house which wraps around the side. This is on timber stilts with a timber handrail. There are timber access steps to the side which lead to the front and rear gardens.

The entrance doors to the cottage are of a timber framed and paneled type with double glazed inset and timber framed and paneled type with single glazed inset. There is a timber/single glazed door between the porch and chalet.

Soffits and fascia boards on the chalet are formed in pvc. The chalet is clad in timber externally with a pvc frontage.

External decorations

Visually inspected.

External timbers are painted.

Conservatories / porches

Visually inspected.

There is a timber/Perspex porch partly clad in pvc on the chalet. There is an entrance porch on the main house with a flat roof part clad in mineral felt with perspex section. There are double glazed bi-fold doors.

Communal areas	N/a
Garages and permanent outbuildings	Visually inspected.
	There is a double integral garage with electric roller door with access door to the main house. This is lined in plasterboard and currently has floor coverings and storage wardrobes. There is a wash hand basin within the wardrobes. There is an electric heater within the garage. The garage is currently used as a studio but could be easily used as a garage should any purchaser require.
	There is a timber/onduline single garage at the rear of the main house. This has a canopy and deck area. There is a timber/onduline garage adjoining the chalet with storage area adjoining.
Outside areas and boundaries	Visually inspected.
	We have been advised by the owner that the entire site extends to approximately 0.9 of an acre. Boundaries are generally defined by post and panel and post and wire fencing. There is a paviour surfaced driveway to the main house and parking area to the front and side.
	The chalet has its own gravel drive and parking area. There is a dividing fence between the chalet garden and main house garden with access gate.
	There are timber retaining walls in the rear garden.
Ceilings	Visually inspected from floor level.
	Ceilings are lined in plasterboard. There are pvc lined ceilings in each of the ensuite shower rooms, main bathroom and one of the bedrooms. There are textured papered finishes to ceilings.
	Ceilings within the chalet are formed in plasterboard.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal walls are of timber stud construction with plasterboard finishes.
	The walls within the chalet are also of timber stud construction with plasterboard finishes.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the

Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.

The main floors are of suspended timber construction overlaid with chipboard. At the time of my inspection all floors were covered.

Access was obtained to the sub floor area via a small hatch in one of the ground floor bedroom wardrobes. The sub floor area was not entered. An inspection of the area was undertaken from the hatch only. Dwarf walls are formed in concrete block. The solum is formed in concrete.

Flooring within the chalet is of solid concrete construction.

Internal joinery and kitchen fittings

Built-in cupboards were looked into but no stored items were moved.

Kitchen units were visually inspected excluding appliances.

Internal doors are partly of a timber flush ply type and timber framed and paneled effect type. There are a number of glazed doors. Skirtings and door facings are formed in timber. The stairs are formed in timber with a timber balustrade. There is a leaded glazed panel between the shower room and main bedroom. There is a re-enforced glazed door at the rear hall.

The kitchen consists of a range of free standing storage units and work surfaces of timber and stainless steel construction with a stainless steel double sink unit and drainer.

The doors within the chalet are of a framed and paneled effect type. Skirtings and door facings are formed in timber.

The chalet kitchen contains fitted floor and wall mounted units with a stainless steel sink unit and drainer.

Chimney breasts and fireplaces

Visually inspected.

No testing of the flues or fittings was carried out.

There is a chimney breast in the main lounge with multi fuel stove fitted. There is a multi fuel stove fitted in the chalet.

Internal decorations

Visually inspected.

Internal walls are painted or papered throughout.

Walls are lined in paper and painted throughout the chalet.

Cellars

There are no cellars.

Electricity

Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.

Mains supply. Visible wiring is of pvc coated cabling with 13 amp sockets. The consumer unit and electricity meter are located in the hall cupboard. There are photovoltaic panels fitted to the front roof pitch. The invertor and meter for the solar panels are also located in the hall cupboard. There are external lights on a timber and one on a sensor.

The chalet has its own electricity supply and meter. The electricity meter and consumer unit are wall mounted in the hall.

Gas

No mains gas supply.

Water, plumbing, bathroom fittings

Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.

No tests whatsoever were carried out to the system or appliances.

Mains supply. Visible pipework is formed in copper and pvc materials.

The main bathroom contains a white suite containing spa bath, low level wc, urinal, wash hand basin. There is a mixer shower over the bath.

The main ensuite shower room contains a white suite comprising low level wc, wash hand basin and multi jet steam shower cubicle with mixer shower.

The second ensuite shower room contains a white suite comprising low level wc, wash hand basin and shower cubicle with electric shower over.

The shower room within the chalet contains a white suite comprising low level wc, wash hand basin and shower cubicle with electric shower over.

The bathroom in the chalet contains a white suite comprising low level wc, wash hand basin and bath with mixer shower over.

The first floor toilet within the main house contains a white low level wc and Belfast style basin.

Heating and hot water

Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.

No tests whatsoever were carried out to the system or appliances.

There is a Grant Engineering oil fired 70-90 central heating boiler located externally to the rear. This supplies steel panel radiators which are fitted with thermostatic valves. This system also

supplies domestic hot water. This is controlled by a programmer in the kitchen and a wall thermostat in the ground floor hall. There are solar thermal panels fitted to the front roof pitch which assist in the production of hot water. There are two pre-insulated hot water tanks in the first floor wc cupboard with electric immersion heaters fitted.

There is an electric convector heater in one of the ground floor shower rooms. There are electric underfloor heating tiles in the shower room and bathroom.

There are a range of electric convector heaters in the chalet. There is electric underfloor heating in the bathroom of the chalet. There is a hot water tank with electric immersion heater in the chalet which provides hot water. This was not inspected.

Drainage

Drainage covers etc. were not lifted.

Neither drains nor drainage systems were tested.

The seller has advised that drainage is to a septic tank. This serves both properties. The system has not been inspected and condition, legal and environmental issues have not been investigated. For the purposes of this report we have assumed these to be satisfactory.

Fire, smoke and burglar alarms

Visually inspected.

No tests whatsoever were carried out to the system or appliances.

There is a smoke detector fitted to the ceiling in the lounge of the main house. There is a smoke detector fitted to the ceiling in the hall of the chalet.

Any additional limits to inspection

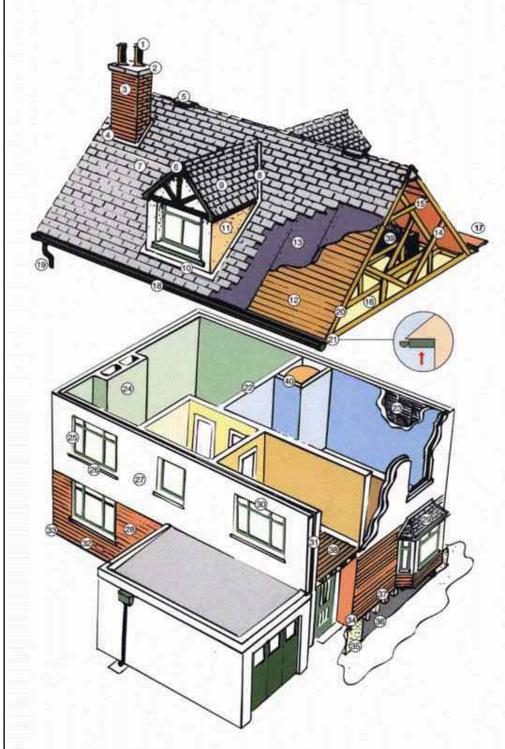

The property was fully furnished, occupied and all floors were covered. My visual inspection of the roof areas was restricted by the storage of personal effects and insulation materials.

I have not disturbed insulation in accordance with Health and Safety guidelines and furniture, personal effects (particularly in cupboards) and floor coverings have not been moved.

No access available to sub floor timbers due to the lack of any known hatch.

I have not carried out an inspection for Japanese Knotweed and unless otherwise stated, for the purpose of this report have assumed there is no Japanese Knotweed within the boundaries of the property or in neighbouring properties.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	There is no evidence of any serious or ongoing structural movement in either the main house or chalet.

Dampness, rot and infestation	
Repair category	1
Notes	There is no evidence of any dampness, rot or infestation in either the main house or chalet.

Chimney stacks	
Repair category	1
Notes	No reportable defects.

Roofing including roof space	
Repair category	1
Notes	There is heavy moss growth on the rear roof pitch of the main house and chalet. There is some loose verge facing on the main house. There is some sagging to insulation boards within the main roof space. Concrete tiles are typically guaranteed for 30 years but have a reasonable life expectation around 50 to 60 years according to the BRE. Life expectancy will often depend on weathering and damage from the prevailing weather. The flat roof areas are clad in materials with a limited life. Although there is no indication of rain penetration, experience shows that leaks can manifest themselves unpredictably and without warning.

Rainwater fittings	
Repair category	1
Notes	There is a loose downpipe to the rear on the main house.

Main walls	
Repair category	1
Notes	The majority of walls on the main house are clad in timber weatherboarding. Timbers will require regular repainting to prevent deterioration and maintain an attractive appearance.

Windows, external doors and joinery	
Repair category	1
Notes	There are sagging fascia boards on the chalet.
	Seals on the porch window of the chalet have failed resulting in condensation build up between the panes.
	Seals on the lounge double glazed window unit have failed resulting in condensation build up between the panes.

External decorations	
Repair category	1
Notes	Timbers will require regular repainting to prevent deterioration and maintain an attractive appearance.

Conservatories/porches	
Repair category	1
Notes	No reportable defects.

Communal areas	
Repair category	-

Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	first floor	
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No	
3. Is there a lift to the main entrance door of the property?	Yes No X	
4. Are all door openings greater than 750mm?	Yes No X	
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No	
6. Is there a toilet on the same level as a bedroom?	Yes X No	
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X	
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No	

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The owner has advised that the chalet within the grounds is held on the same Title as the main property. There is a single septic tank which serves both properties although the chalet has its own electricity and water supply.

There are photovoltaic panels fitted to the front roof pitch. These will be subject to a feed-in tariff and the owner can provide more details in this respect.

The property has been extended to the rear. The report assumes all necessary Local Authority and other Consents have been obtained for the alterations and the appropriate documentation including Building Warrants and Completion Certificates issued. If any works did not require consent then it has been assumed that they meet the standards required by the Building Regulations or are exempt.

Estimated reinstatement cost for insurance purposes

£420,000 (FOUR HUNDRED AND TWENTY THOUSAND POUNDS).

Valuation and market comments

£430,000 (FOUR HUNDRED AND THIRTY THOUSAND POUNDS).

Mortgage Valuation Report

General Remarks
Other accommodation: snug/bedroom 5.
Chalet within grounds: entrance porch, lounge, kitchen, three bedrooms, shower room, bathroom with wc.
Construction: Walls: timber framed/timber and block clad.
The chalet is of timber framed construction, timber clad externally with a pvc frontage. The chalet roof is pitched and tiled.
Generally the property was found to be in acceptable condition commensurate with age and type. At the time of our inspection the subjects were occupied and generally furnished. We have not carried out an underfloor inspection.
The owner has advised that drainage is to a septic tank which serves both the main house and chalet. The system has not been inspected and condition, legal and environmental issues have not been investigated. For the purposes of the valuation, all are assumed to be satisfactory.
Essential Repairs
None apparent.
Estimated cost of essential repairs £ Retention recommended? Yes X No Amount £

Mortgage Valuation Report

Comment on Mortgageability

The property will form a suitable security for mortgage purpose lenders who will not be willing to accept the property as a suital inclusion of a separate chalet within the grounds.

4.	Conservation Area	
	Is your property in a designated Conservation Area (i.e. an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance)?	Yes (No) Don't know
5.	Listed Buildings	
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	Yes(No)
6.	Alterations / additions / extensions	
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	Yes/No
	If you have answered yes, please describe the changes which you have made:	
	Relocation of upstains toilet Removed of Internal Starraise enlarging upstain Citchen of dependences Comments of upstains Comments of upstains Coor onto a neurly formed Coorony + external stains	

	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	Yes.
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent can arrange to obtain them.	•S
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	Yes/No
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	Yes/No
	(ii) Did this work involve any changes to the window or door openings?	Yes/No
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed): One downstairs window enlarged to the windows and the complete windows are completed windows.	8000 a
	Please give any guarantees which you received for this work to your solicitor or estate agent.	

7	Central heating	
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property – the main living room, the bedroom(s), the hall and the bathroom). If you have answered yes/partial – what kind of central heating is there?	Yes/No/ Partial
	(Examples: gas-fired, solid fuel, electric storage heating, gas warm air.)	
	If you have answered yes, please answer the 3 questions below:	
b.	When was your central heating system or partial central heating system installed?	
c.	Do you have a maintenance contract for the central heating system?	YesNo
	If you have answered yes, please give details of the company with which you have a maintenance agreement:	
d.	When was your maintenance agreement last renewed? (Please provide the month and year).	

	Energy Performance Certificate					
	Does your propert Certificate which is le		Energy Performance ars old?	Yes/No
