- Ample Parking. Garage space stpp
- 3.6 Acres of garden curtilage & pasture
- Timeless & tranquil position
- No upward chain. Freehold

Guide Price £325,000

SITUATION & AMENITIES

Berry Wood Barn enjoys a simply beautiful rural location on high ground with the most wonderful view down in to the valley below. The position is timeless and tranquil yet not isolated as there are other dwellings dotted about the immediate area. The site is also not far from the edge of Exmoor National Park and at the same time within easy access of the villages of Brayford and Bratton Fleming. A more comprehensive range of everyday shopping is available in Barnstaple and South Molton. There is an excellent range of recreational facilities in the area, being near the boundary of the park, whether it is walking, riding or many other attractions. There is also access to the famous beaches and coast of North Devon, together with many equestrian and sporting opportunities throughout the area. At Tiverton, Tiverton Parkway offers a fast rail link to London Paddington in just over 2 hours as well as access to Junction 27 of the M5 Motorway.

DESCRIPTION

This charming barn presents elevations of stone beneath a corrugated tin roof. The ground floor benefits from two openings and original cobbled floor. There is a timber floor between the ground and first floor. Planning permission was granted on 18/08/22 under North Devon Council Planning Reference 75505 for conversion of the existing building in to a unrestricted residential dwelling. The proposed property would be two storey and incorporate on the ground floor open plan living room/kitchen with staircase rising to first floor where there would be three bedrooms, one en suite and family bathroom. Latest documentation relating to the application can be viewed on the North Devon Planning Website using the aforementioned planning reference for access. Externally the barn benefits from gated access off the lane, a sweeping drive leads to a large concrete hardstanding giving access to a large amount of parking.

SERVICES

Two private boreholes have been sunk and private drainage to be installed by the vendor. Electricity to be installed by purchaser, please discuss options with selling agent.

DIRECTIONS

If approaching from the A361 North Devon Link Road, follow the A399 in a northerly direction towards Ilfracombe, passing above the village of Brayford and following the main road to the Four Cross Way junction. Turn right at this junction, signed Challacombe and take the next turn right signposted Fullaford. Follow this road for about 1 mile into the bottom of the valley, cross the stream and the gated access to the barn can be seen on the right hand side as you climb the hill.

BACKGROUND

Berry Wood Barn was purchased by the existing owners in early 2023, however since purchasing their plans have changed - hence the reason it has returned to the market. The following is an update of what has been undertaken by them since the barn was purchased.

WATER SUPPLY

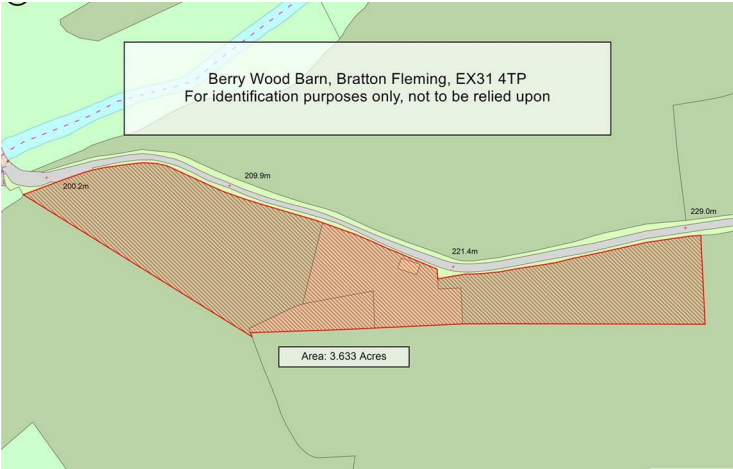

- 1. Drilled two boreholes to deliver adequate drinking water supply - complete and in place
- 2. Installed borehole pumps, supplied by Lamare Services Ltd Water Engineers & Specialist off mains drinking water plant installers -complete and in place
- Lamare Services obtained the water quality test and have provided the specification and a quote for the installation of an appropriate water treatment plant, with buffer tanks etc to provide an adequate supply for the house.
- 3. Following discussion with Lamare, the vendors' intention was to install the water treatment plant within a standard 20' dark green shipping container, to be located close to the hedgerow to the East of the barn.

POWER SUPPLY

There are two options:
A - Connection to mains supply. The vendors obtained a quote for this from SSE.
B - Installing a off-grid solution. This was their preferred option as it aligns with the desire to be independent of mains services, and once installed would provide the power needs of the property 'free'. This was researched carefully and the quote and details of the provider they had selected Off-grid engineering, who offered an excellent solution for their needs (not necessarily the cheapest but which included capacity sufficient for electric car charging). Their intention was to install the solar array backing onto the hedge/bank to the East of the barn (uphill, above the barn) with the battery storage and system management housed in the same shipping container as the water treatment plant, and a small integrated back-up generator adjacent to support the lowest light Winter days. Both Off-grid engineering and Lamare engineers confirmed that it is standard practice to include both water and electrical services in the same container, as there is adequate space to do so.

WASTE WATER/FOUL WATER TREATMENT

- 1. A septic tank meets the requirements of the location. Details of the system proposed can be made available.
- 2. The septic tank must be located a minimum of 50m from the water borehole, so the proposed location was in the field below the barn - approximately 70m to the West of the lower borehole, approximately 20m from the road boundary (to allow access for annual emptying from the road in the event that access via the field is limited by adverse weather conditions). Drainage channels from tank water would run across the field to the South of the tank.
- 3. Rainwater soakaway to manage the roof run-off would be in the form of a soakaway crate, located 10m from the South-West corner of the barn. Work on this in progress, as part of the commencement of works to the site. Anticipated that these two elements will be completed prior to the sale of the property, and should thus secure the planning permission in perpetuity according to the vendors.

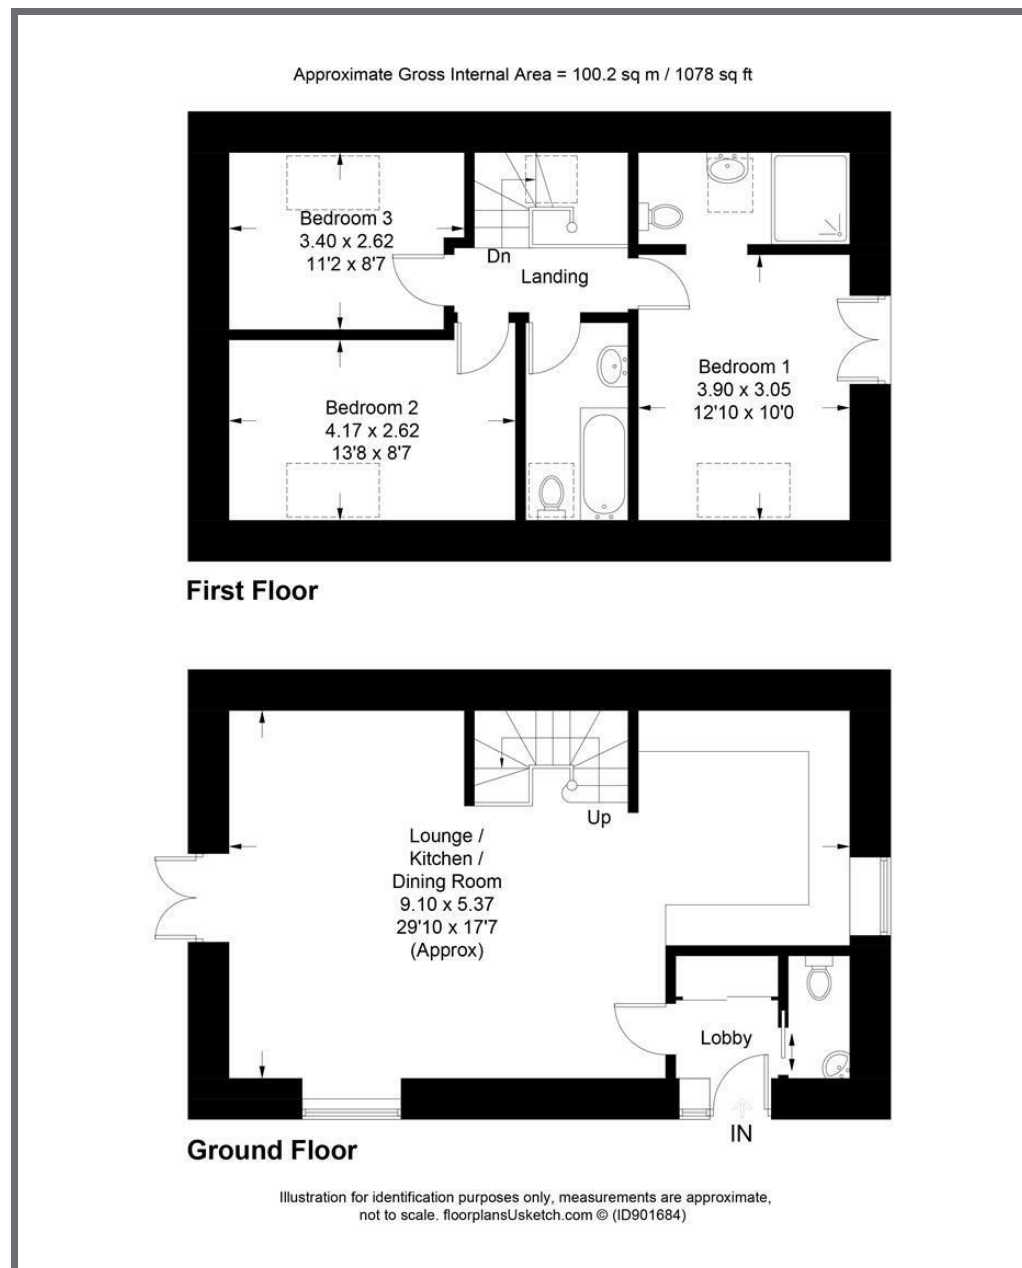

IMPORTANT: Stags gives notice that: 1. These particulars are a general guide to the description of the property and are not to be relied upon for any purpose. 2. These particulars do not constitute part of an offer or contract. 3. We have not carried out a structural survey and the services, appliances and fittings have not been tested or assessed. Purchasers must satisfy themselves. 4. All photographs, measurements, floorplans and distances referred to are given as a guide only. 5. It should not be assumed that the property has all necessary planning, building regulation or other consents. 6. Whilst we have tried to describe the property as accurately as possible, if there is anything you have particular concerns over or sensitivities to, or would like further information about, please ask prior to arranging a viewing.
