Shaws Kensington

We have invested in the latest innovative software and telephone systems and we are able to contact all of our potential purchasers immediately a property comes to the market. We pride ourselves on providing prompt feedback to clients and discussing all comments, whether positive or negative in order that, where necessary, we can agree and adjust your specific marketing plan quickly and efficiently in order to maximise the potential of your property.

Our internet coverage is so huge that properties listed with us are reaching hundreds of potential buyers, who visit our carefully selected choice of websites, every minute of every day.

We also maintain a distinctive advertising profile and combining this with our experienced personnel, our large constantly updated database, our for sale boards and our prime office location ensures we explore every opportunity to achieve a sale at the best possible price and within the timescale that suits you.

Testimonial 1

My rental experience with Shaws Kensington has been wonderful! Shout out to Axel, Zlatina and the team for always being responsive and helpful. Their properties are well-curated and the service was satisfactory. Highly recommended.

Testimonial 2

I've been renting out my flat in Barons Court through Shaws for over ten years, and they've been exceptional every step of the way. From seamless tenant management to handling all aspects of property care, the team at Shaws has consistently exceeded my expectations.

Testimonial 3

Can only recommend. We've been renting a property managed by Shaws for over 3 years, and the service has been excellent since Elodie took over. She's very responsive and resolute. We've been renting in London for about 10 years and this agency has been the best by far. All their contractors are professional and friendly; their general maintenance contractor knows the property very well and is brilliant. So pleased with the service, thanks so much!

Testimonial 4

Brilliant and transparent throughout with the flat purchase. Renelle was highly diligent and attentive to make sure everything went smoothly. A big thanks to Olivia for introducing us to the property in the first place and also to Solomon for showing us around and answering any questions. Very happy overall!

Flood Risk

Surface Water - Flood Risk

This map shows the chance of flooding where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.25%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.25%) in any one year.

Chance of flooding to the following depths at this property:

Flood Risk

Surface Water - Climate Change

This map shows the future chance of flooding **between 2040 and 2060** where rainwater has nowhere to drain. This kind of flooding can occur far from rivers or seas. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Chance of flooding to the following depths at this property:

Shaws
KENSINGTON

The map shows a residential area with several streets: Gunterstone Road, Gladdon Road, and Talgarth Road. A blue outline highlights a specific property labeled 'Barons Keep'. A location pin is placed on this property. Surrounding streets include Lily Close, Gladdon Road, and Talgarth Road. The map also shows various property numbers and landmarks like James Lee Nursery School and The W14 Kensington.

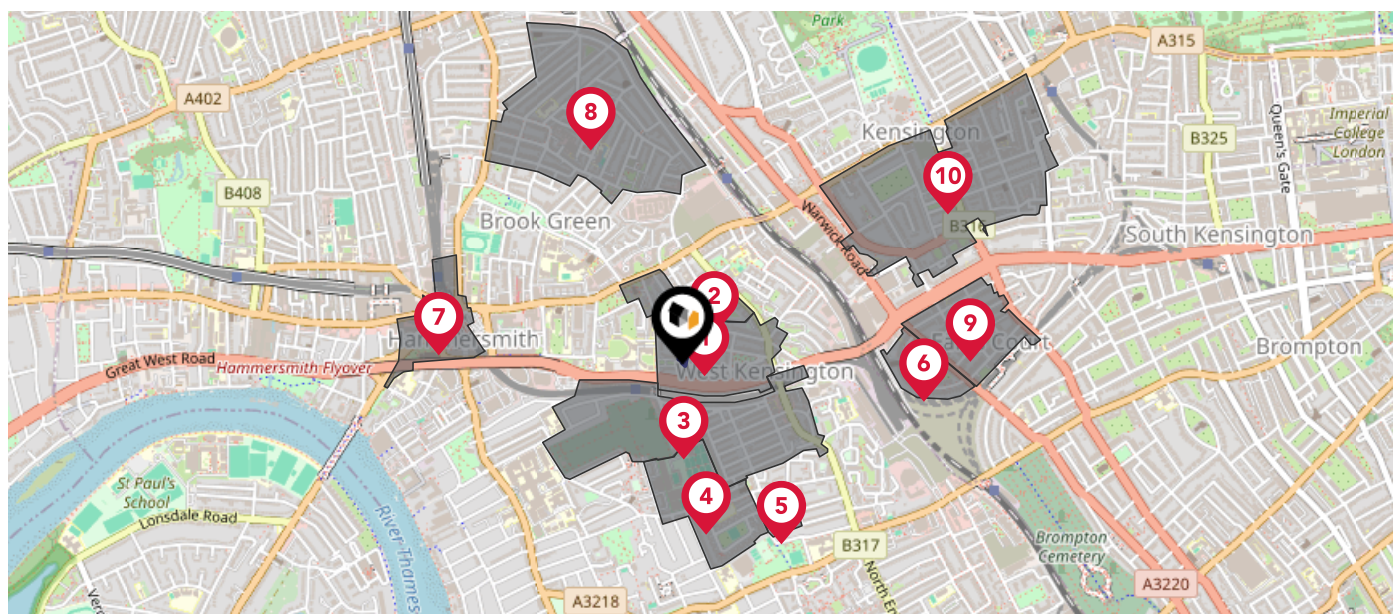

A horizontal line with three vertical tick marks. Above the first tick mark is the word "Low", above the second is "Medium", and above the third is "High".

Maps

Coal Mining

This map displays nearby coal mine entrances and their classifications.

Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

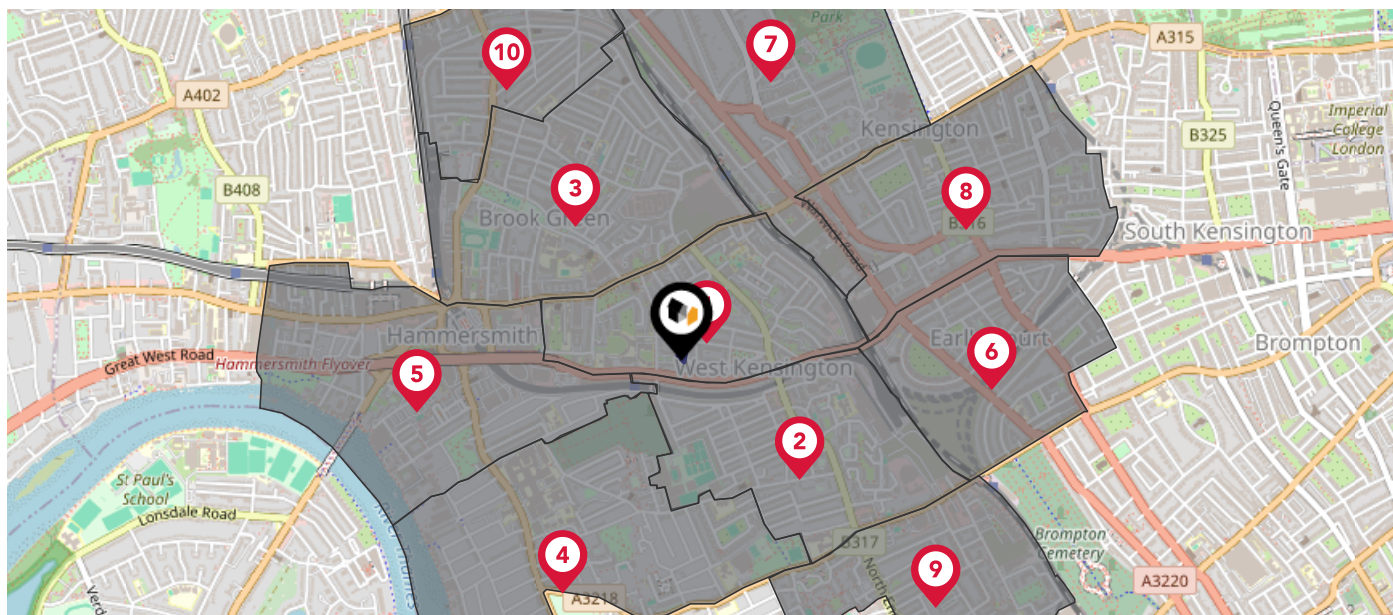

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

Maps

Council Wards

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

Environment

Radon Gas

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

Local Area Road Noise

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB
