This is the actual EPC Certificate for these units

**FINAL 2 UNITS
REMAINING**

A net carbon zero building is a highly energy efficient building that produces on-site enough carbon-free renewable energy to meet the buildings operational annual energy consumption. The better the EPC rating, the lower the carbon emissions will be.

Thirkill Park will offer the first speculative development of net carbon zero industrial and business units in the beautiful spa town of Harrogate

The green surroundings and community feel, offer an inspiring working environment for today's business. Offering the pleasure of working in well-designed and efficient buildings is matched by the ease of access by road or rail.
