The Florence Fields development is constructed on a sloping site and therefore there will be changes in levels between the homes, the road and driveways. As a result, all homes will comply with the access requirements of the Building Regulations, consisting of paths with gradual ramps and in some locations, shallow steps. Entrance and garden paths have been omitted from the plan for clarity. Changes in level and sloping gardens are to be expected throughout the development. As changes in level exist between the gardens, privacy fencing is provided, where possible to the standard height of 1.8m. On the lower garden, this may result in taller boundary treatments. Fencing against boundaries with established neighbours, will be constructed as close to the existing boundary treatment(s) as possible. The Sales Consultants can assist with any questions you may have in relation to boundaries.
