COMPLETION DATE OF PROPERTY QUESTIONNAIRE:	12.08.20

PROPERTY QUESTIONNAIRE

Information to be given to prospective buyer(s)

1.	Length of ownership				
	How long have you owned the property? 7 years				
2.	Council Tax				
	Which Council Tax band is your property in?				
	A B C D E F G H				
3.	Parking				
	What are the arrangements for parking at your property?				
	(Please indicate all that apply)				
	Garage				
	Allocated parking space				
	 Driveway√ 				
	Shared parking				
	On street				
	Resident permit				
	Metered parking				
	Other (please specify):				
4.	Conservation Area				
	Is your property in a designated Conservation Area (i.e. an area of special architectural or historic interest, the character or appearance of which it is desirable to preserve or enhance)?	No			
5.	Listed Buildings				
	Is your property a Listed Building, or contained within one (i.e. a building recognised and approved as being of special architectural or historical interest)?	No			
6.	Alterations / additions / extensions				
a.	 (i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)? 	No			
	If you have answered yes, please describe the changes which you have made:				
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?				

	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent can arrange to obtain them.	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property?	No
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	
	(ii) Did this work involve any changes to the window or door openings?	
	(iii) Please describe the changes made to the windows, doors, or patio doors (with approximate dates when the work was completed):	
	Please give any guarantees which you received for this work to your solicitor or estate agent.	
7.	Central heating	
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property – the main living room, the bedroom(s), the hall and the bathroom).	Yes
	If you have answered yes/partial – what kind of central heating is there? Air source heat pump	
	(Examples: gas-fired, solid fuel, electric storage heating, gas warm air.)	
	If you have answered yes, please answer the 3 questions below:	
b.	When was your central heating system or partial central heating system installed? 2013	
C.	Do you have a maintenance contract for the central heating system?	No
	If you have answered yes, please give details of the company with which you have a maintenance agreement:	
d.	When was your maintenance agreement last renewed? (Please provide the month and year).	N/A
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	Yes
9.	Issues that may have affected your property	
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it? If you have answered yes, is the damage the subject of any outstanding insurance claim?	No

b.	. Are you aware of the existence of asbestos in your property?			
	If you have answered yes, please give details:			No
10.	Services			
a.	Please tick which service details of the supplier:	es are connected	to your property and give	
	Services	Connected	Supplier	
	Gas / liquid petroleum gas			
	Water mains / private water supply	✓	Scottish Water	
	Electricity	✓	SSE	
	Mains drainage			
	Telephone	✓	ВТ	
	Cable TV / satellite	✓	Sky	
	Broadband	✓	Sky	
b.	Is there a septic tank sys	tem at your prope	erty?	Yes
	If you have answered yes	s, please answer t	he two guestions below:	
C.	If you have answered yes, please answer the two questions below: Do you have appropriate consents for the discharge from your septic tank?			Yes
d.	Do you have a maintenar	nce contract for yo	our septic tank?	No
	If you have answered yes which you have a mainte		tails of the company with	
11.	Responsibilities for Share	ed or Common Ai	reas	
a.	Are you aware of any resampthing used jointly, sure road, boundary, or garden lf you have answered ye	ich as the repair on area?	of a shared drive, private	Yes
b.	Is there a responsibility the roof, common stairw	ell or other comm		N/A
C.	Has there been any major roof during the time you		cement of any part of the property?	No

d. Do you have the right to walk over any of your neighbours' property	
- for example to put out your rubbish bin or to maintain your boundaries?	No
If you have answered yes, please give details:	
e. As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	No
If you have answered yes, please give details:	
f. As far as you are aware, is there a Public Right of Way across any part of your property? (A Public Right of Way is a way over which the public has a right to pass, whether or not the land is privately-owned.)	No
If you have answered yes, please give details:	
12. Charges associated with your property	
a. Is there a factor or property manager for your property?	No
If you have answered yes, please provide the name and address and give details of any deposit held and approximate charges:	
b. Is there a common buildings insurance policy?	No
If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	
c. Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, e.g. to a Residents' Association, or maintenance or stair fund.	N/A
13. Specialist Works	
a. As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	No
If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were	
done before you bought the property	
b. As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	No

c.	If you have answered yes to 1 guarantees relating to this wo	` '	r (b), d	o you have	any		N/A
	If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate.						
	Guarantees are held by:						
14.	Guarantees						
a.	Are there any guarantees or w		1				
(i)	Electrical work	No	Yes	Don't Know	With title de		Lost
(ii)	Roofing	No	Yes	Don't Know	With title de	eds	Lost
(iii)	Central heating	No	Yes	Don't know	With title de	eds	Lost
(iv)	NHBC	No	Yes	Don't know	With title de	eds	Lost
(v)	Damp course	No	Yes	Don't know	With title de	eds	Lost
(vi)	Any other work or installations? (e.g: cavity wall insulation, underpinning, indemnity policy)	No	Yes	Don't know	With title de	eds	Lost
b.	If you have answered 'yes' or or installations to which the g				e give details	of t	he work
c.	Are there any outstanding claims under any of the guarantees listed above?				No		
	If you have answered yes, ple	ase gi	ve deta	ails:			
15.	Boundaries				<u>.</u>		
	So far as you are aware, has any boundary of your property been moved in the last 10 years?					No	
	If you have answered yes, ple	ase gi	ve deta	ails:			
16.	Notices that affect your prope	rtv					
10.	In the past 3 years have you e		ceived	a notice:			
a.	advising that the owner of a n planning application?				as made a		Yes
b.	that affects your property in s	ome o	ther w	ay?			No
C.	that requires you to do any maimprovements to your proper		ance, r	repairs or			No

If you have answered yes to any of a-c above, please give the notices to your solicitor or estate agent, including any notices which arrive at any time before the date of entry of the purchase of your property.

Declaration by the seller(s)/or other authorised body or person(s):

Date of Inspection	12 th August 2020

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without the need to move any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right are taken facing the front of the property.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

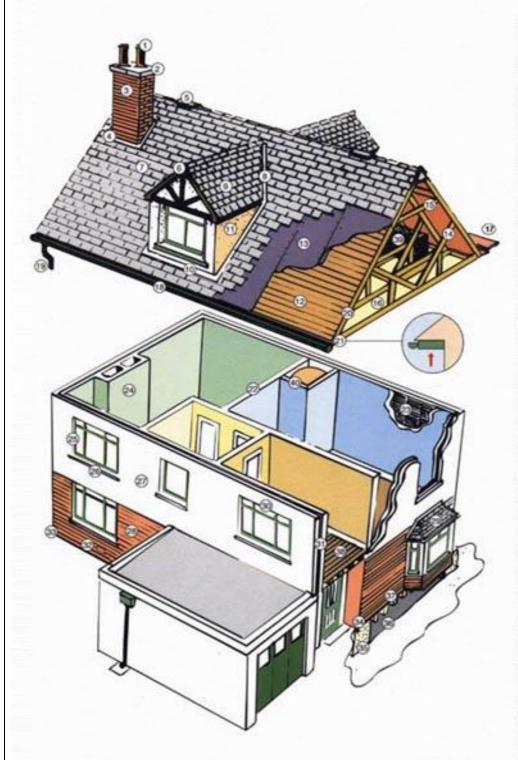

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc were not inspected or reported on.

Description	A detached dwelling house
Accommodation	Lower ground floor: entrance hall, studio/bedroom (with en suite toilet), boot room and a cloak cupboard Mid floor: landing, 3 bedrooms (1 with en suite) and a bathroom Upper ground floor: open plan living, kitchen and dining area
Gross internal floor area (m²)	160 sq m
Neighbourhood and location	The property is located in the rural area of Glenancross amidst properties of a similar type. Glenancross is set between the villages of Morar and Arisaig on the West Coast of Scotland. There are reasonable facilities available within the village of Mallaig which is 4 miles away. All essential services, amenities and transport links are available within the regional centre town of Fort William, which is 40 miles from the subjects.
Age	Built 2013
Weather	Dry and sunny. The preceding weather was similar.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate None. There is a stainless steel flue from the stove.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3 m ladder externally
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3 m ladder within the property
	If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so The roof is pitched and finished in a timber boarding. It was reported to us by the seller that there is a metal roof sheeting below the timber boarding.
	There is no roof space to the house. The ceiling to the top storey follows the profile of the roof.
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate The rainwater gutters are internal to the roof and hidden behind the wallhead. We assume downpipes are internal.
Main walls	Visually inspected with the aid of binoculars where appropriate
	Foundations and concealed parts were not exposed or inspected External walls are in timber frame construction externally clad in a timber board. The lower ground floor walls are in insitu concrete.
	Internal surfaces are lined in plasterboard.

Windows, external doors and	Internal and external doors were opened and closed where keys were available
joinery	Random windows were opened and closed where possible
	Doors and windows were not forced open
	Windows, pass and patio doors are in aluminium frame with sealed double glazed panels. The windows are factory paint finished. The main entrance door is over
	clad in timber. There is a glazed protective barrier to the patio door at the
	kitchen/dining area.
	There are no fascia, soffits or barge boards.
External decorations	Visually inspected The woodwork is painted.
Conservatories/porches	Visually inspected None
	Circulation areas visually inspected
Communal areas	Access to the property is over a short length of shared private drive.
Garages and permanent	Visually inspected There is a detached store adjacent to the entrance to the plot. The roof is pitched
outbuildings	and clad in timber boarding. The walls are in timber frame with timber boarding.
	The floor is in suspended timber.
Outside areas and boundaries	Visually inspected
and	Access to the property is over a drive finished in recycled tar scalpings.
	The property sits in a reasonable sized plot best described as irregular in shape.
	The gardens generally slope from the front down to the rear. Surfaces are in a mix
	of natural or cut grass. There is a timber decking to the front. There are young
	trees and bushes generally along the extremities to the garden.
	Boundaries are in post and wire fencing.
Ceilings	Visually inspected from floor level
	Plasterboard lined throughout.
Internal walls	Visually inspected from floor level
Internal walls	Visually inspected from floor level Using a moisture meter, walls were randomly tested for dampness where considered appropriate
Internal walls	Visually inspected from floor level
Internal walls Floors including sub floors	Visually inspected from floor level Using a moisture meter, walls were randomly tested for dampness where considered appropriate Timber frame with plasterboard linings. Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted

Kitchen fittings comprise of a contemporary range of proprietary base and wall units with a gloss finished door, proprietary worktop with inset sink, integral hob, oven housing and electrical fittings. Visually inspected No testing of the flues or fittings were carried out There is a recessed raised stove to the living room. This was not lit at the time of inspection. The hearth is in concrete.

Electricity.	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever
Electricity	were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on Mains electricity supply. The meters and fuse boards are located within the boot room. Electrical fittings are modern throughout.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on None
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation
mungs	No tests whatsoever were carried out to the system or appliances Mains water supply. Plumbing supplies where viewed are in copper, wastes are in plastic.
	Bathroom fittings are modern and comprise of a good quality range of ceramic wcs, ceramic wash hand basins, an acrylic bath and a walk in shower. There are thermostatic mixer valves. Wall surfaces within the bathrooms and en suite are tiled.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected
	No tests whatsoever were carried out to the system or appliances Central heating is provided by an air source heat pump which heats underfloor pipework throughout the property.
	Hot water is heated and stored in a direct fed stainless steel cylinder.
Drainage	Drainage covers etc were not lifted Neither drains nor drainage systems were tested Drainage connects to a private treatment system located to the side of the property.
Fire, smoke and burglar	Visually inspected
alarms	No tests whatsoever were carried out to the system or appliances There are no fire or burglar alarms. There is a fully integrated heat and smoke detector system.
Any additional limits to	For flats/maisonettes
inspection	Only the subject flat and internal communal areas giving access to the flat were inspected
	If the roof space or underbuilding/basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation
	The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance
	We have not carried out an inspection for Japanese Knotweed or other invasive plant species and unless otherwise stated for the purpose of this report we have assumes that there is no Japenese Knotweed or other invasive plant species within the boundaries of the proeprty or in neighbouring properties, the identification of Japenese Knotweed or other invasive plant species should be made by a Specialst Contractor. None

Notes No evidence of any significant disrepair. Windows, external doors and joinery Repair category 1	
Windows, external doors and joinery Repair category 1	
Repair category 1	
Notes No evidence of any significant disrepair.	
External decorations	
Repair category 1	
Notes The paint finish to the woodwork has weathered typically on the more expose elevation. It is common to allow wood in this situation to weather naturally. The matter of personal taste.	
Conservatories/porches	
Repair category Not applicable	
Notes	

Communal areas	
Repair category	1
Notes	No evidence of any significant disrepair.
Garages and perman	nent outbuildings
Repair category	1
Notes	No evidence of any significant disrepair.
Outside areas and be	oundaries
Repair category	1
Notes	No significant matters obvious during our inspection that requires highlighting.
Ceilings	
Repair category	2
Notes	No evidence of any significant disrepair. A patch repair has been carried out to the ceiling within the en suite following a plumbing defect to the kitchen above. Surfaces have yet to be made good.
	There are a couple of small isolated stains to the ceiling at the rear lower entrance and soffit to the window in the lower ground floor bedroom and en suite. These surfaces were dry at the time of inspection. Although not appearing significant the situation should be monitored.
Internal walls	
Repair category	1
Notes	No evidence of any significant disrepair.
Floors including sub	o-floors
Repair category	1
Notes	No evidence of any significant disrepair having regard to the limits of our inspection.
Internal ioinery and I	kitchen fittings
Repair category	1
Notes	No evidence of any significant disrepair. A couple of the sliding doors catch slightly which is causing the paint finish to wear.
Chimney breasts and	
Repair category	1
Notes	No evidence of any significant disrepair. There is slight smoke staining to the wall surface above the stove. This can suggest blow backs from the fire. The concrete/screed forming the hearth is cracked.
Internal decorations	
Repair category	2
Notes	It would appear the house was decorated on a DIY basis. Some localised redecoration is required. This will become more obvious once the house is cleared of all household goods, wall hangings, furniture, etc. The finish to some timber surfaces has been stained in places presumably due to plant pots.
Cellars	
Repair category	Not applicable
Notes	

Electricity	
Repair category	1
Notes	Modern installation. It is however good practise to check electrical installations on a 5 year cycle or upon an exchange of ownership.
Gas	
Repair category	Not applicable
Notes	
Water, plumbing and ba	throom fittings
Repair category	1
Notes	No evidence of any significant disrepair. A couple of wall tiles are cracked at the bath to the en suite.
Heating and hot water	
Repair category	1
Notes	It is good practice to service central heating systems in accordance with manufacturers recommendations.
Drainage	
Repair category	1
Notes	It is good practice to service private drainage treatment systems on a regular basis.
	We were unable to hear the motor running to the private treatment system. We were informed by the seller that this was probably because it had not been switched back on following a recent service. It should be ensured the treatment unit is working in accordance with manufacturers instructions.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres: For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

Which floor(s) is the living accommodation on?	Upper ground floor
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes X No
5. Is there a toilet on the same level as the living room and kitchen?	Yes No X
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

It is assumed that the subjects are held on an absolute ownership basis [formerly feudal]. This should be confirmed by your solicitor.

In addition to the standard searches and enquiries to be carried out by your solicitor we would recommend that the following matters are confirmed:

- 1. Statutory consent would have been required for the construction of the property. It should be ensured that all planning consents, building warrants and completion certificates are in place.
- 2. We understand that the construction of the property was supervised by an architect. The full details should be confirmed.
- 3. Access to the property is over a length of shared access road. The full details should be confirmed.
- 4. The service record for the private drainage system should be provided.

Property market activity has been impacted due to the current response to Covid-19. This has resulted in an unprecedented set of circumstances on which to make a valuation judgement. The advice is therefore reported on the basis of "material valuation uncertainty" as per the RICS Red Book Global definition. Consequently, less certainty can be attached to the valuation than would otherwise be the case. It is recommended that the valuation of this property is kept under frequent review as more market evidence becomes available.

Estimated reinstatement cost for insurance purposes

It is recommended that the subjects be insured for a sum of not less than £450,000 [four hundred & fifty thousand pounds]

This figure is the estimate of the cost of rebuilding the property and bears no direct relationship to the current market value.

Valuation and market comments

£460,000 [four hundred and sixty thousand pounds]

We expect interest in this individually architect designed house to be high, particularly from buyers in the holiday/second home market.

Date of report	18 August 2020

Terms and Conditions

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report is transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seiler, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

¹ Which shall be in accordance with the current RIGS Valuation Standards (The Red Book) and RIGS Rules of Conduct.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller:
- any person(s) noting an interest in purchasing the Property from the Seller:
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser: and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.5 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.6 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.7 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.8 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;

Taigh Dubh Na Mara, Glenancross, Morar, Mallaig, PH40 4PD

Ref: 462/20/68

- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008:
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- + the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

Taigh Dubh Na Mara, Glenancross, Morar, Mallaig, PH40 4PD Ref: 462/20/68

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems
 to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed
 now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- * There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

GENERAL CONDITION - A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.							
The property is in a good condition throughout.

supervised by a Access is over a Drainage conne Property market a circumstances or uncertainty" as po otherwise be the	Statutory consent would have been required for the construction of the property. We believe the construction was supervised by an architect. The full details should be confirmed. Access is over a shared length of drive. Drainage connects to a private treatment unit. Property market activity has been impacted due to the current response to Covid-19. This has resulted in an unprecedented set of circumstances on which to make a valuation judgement. The advice is therefore reported on the basis of "material valuation uncertainty" as per the RICS Red Book Global definition. Consequently, less certainty can be attached to the valuation than would otherwise be the case. It is recommended that the valuation of this property is kept under frequent review as more market evidence becomes available.

Energy Performance Certificate (EPC)

Dwellings

Scotland

Taigh Dubh Na Mara, Glenancross, Morar, Inverness-shire, PH40 4PD

Dwelling type:Detached houseDate of assessment:12 August 2020Date of certificate:27 August 2020

Total floor area: 160 m²

Primary Energy Indicator: 141 kWh/m²/year

Reference number: 9820-1048-1238-7720-1224 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

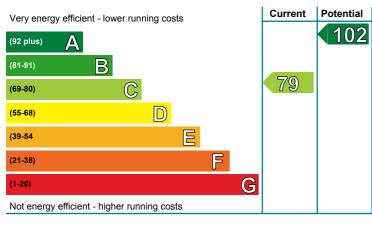

Main heating and fuel: Air source heat pump, underfloor, electric

You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£4,125	See your recommendations
Over 3 years you could save*	£378	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

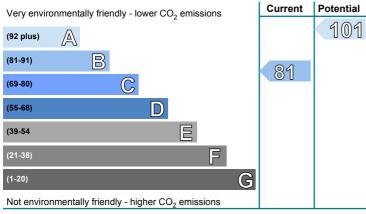

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band C (79)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band B (81)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Solar water heating	£4,000 - £6,000	£375.00
2 Solar photovoltaic (PV) panels	£3,500 - £5,500	£852.00
3 Wind turbine	£15,000 - £25,000	£2007.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Timber frame, as built, insulated (assumed)	****	****
Roof	Pitched, insulated Roof room(s), insulated (assumed)	**** ****	**** ****
Floor	Solid, insulated (assumed)	_	<u> </u>
Windows	Fully double glazed	★★★★ ☆	★★★ ☆
Main heating	Air source heat pump, underfloor, electric	****	****
Main heating controls	Programmer and room thermostat	***	***
Secondary heating	Room heaters, wood logs	_	_
Hot water	From main system	***	***
Lighting	Low energy lighting in all fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 24 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 3.8 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 3.0 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£2,748 over 3 years	£2,748 over 3 years	
Hot water	£1,065 over 3 years	£687 over 3 years	You could
Lighting	£312 over 3 years	£312 over 3 years	save £378
Totals	£4,125	£3,747	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

December ded massives	Indicative cost	Typical saving	Rating after improvement		
Recommended measures	Indicative cost	per year	Energy	Environment	
1 Solar water heating	£4,000 - £6,000	£125	B 82	B 83	
2 Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£284	B 88	B 89	
3 Wind turbine	£15,000 - £25,000	£669	A 102	A 101	

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

2 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

3 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present:

- Biomass secondary heating
- Air source heat pump

Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	18,278	N/A	N/A	N/A
Water heating (kWh per year)	2,339			

About this document

Phone number:

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. John Strachan

Assessor membership number: EES/009418

Company name/trading name: Samuel and Partners

Address: 20 High Street Fort William

PH33 6AT 01397 702686

Email address: john@samuelandpartners.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
