SHERATON KITCHEN - BRITISH SHAKER

The advantages of a Sheraton Kitchen

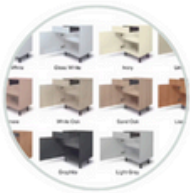

Doors

We offer 19 door styles that can be painted in a choice of 22 colours. As well as 80 wrapped options in our modern slab or classic shaker style doors.

Features

Our kitchens feature solid back panels, no visible screws or fixings, fully edged on all external sides and fixed door buffers.

Cabinets

All our cabinets come in a choice of 11 colours, all with soft closing hinges and adjustable shelving.

Easy Installation

Our rigid cabinets are drilled to your individual order. All fully constructed in our factory for easy installation.

Rigid Kitchens

Made to the highest standards of British Manufacturing, our kitchens are pressed under controlled conditions ensuring perfectly square and rigid cabinets.

Guarantee

We offer 20 year guarantee on all cabinets, hinges & drawer boxes. 15 years on doors & ranged accessories.

WORKTOP

QUARTZ

Highly Stain Resistant: As a non-porous stone, quartz worktops are extremely stain resistant. Whereas spillages during food preparations can often seep into the cracks of granite and marble stone, this does not happen with quartz worktops.

Minimal Maintenance: Unlike some other natural stones such as marble. Cleaning is a breeze and all that is needed to keep your worktops looking as good as new is a simple wipe down with warm water and a micro fibre cloth. This makes them an ideal material for high traffic areas of the home such as the kitchen.

Hard wearing and durable: Quartz worktops are highly resistant to chipping and scratching. However, whilst natural stones such as granite also share these qualities, quartz worktops carry the added benefit of flexibility, making them easier to work with when it comes to installation and edging options.
