Mine Entry

- ✕ Adit
- ✕ Gutter Pit
- ✕ Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

This map displays nearby official conservation areas. Every local authority in England has at least one conservation area. Most are designated by the Council as the local planning authority, though Historic England and the Secretary of State also have the power to create them.

Nearby Conservation Areas

-  Rusthall Conservation Area

-  Speldhurst Conservation Area
-  Langton Green Conservation Area
-  Tunbridge Wells Conservation Area
-  Groombridge Conservation Area
-  Fordcombe
-  Groombridge Conservation Area
-  Southborough Conservation Area

The UK is divided into wards that are used for local elections to elect local government councillors. Sometimes these are known as 'electoral divisions'. Population counts can vary substantially between wards, but the national average is about 5,500

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

5		75.0+ dB	
4		70.0-74.9 dB	
3		65.0-69.9 dB	
2		60.0-64.9 dB	
1		55.0-59.9 dB	

Flood Risk

Rivers & Seas - Flood Risk

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

- High Risk** - an area which has a chance of flooding of greater than 1 in 30 (3.3%) in any one year.
- Medium Risk** - an area which has a chance of flooding of greater than 1 in 100 (1.0%) in any one year.
- Low Risk** - an area which has a chance of flooding of greater than 1 in 1000 (0.1%) in any one year.
- Very Low Risk** - an area in which the risk is below 1 in 1000 (0.1%) in any one year.

Chance of flooding to the following depths at this property:

Flood Risk

Rivers & Seas - Climate Change

This map shows the future chance of flooding from rivers and / or the sea **between 2036 and 2069**, taking into account flood defences and their condition. The government climate change models cannot predict exactly when the chance of flooding will go up. It could happen at any time during the time period.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

Local Area

Masts & Pylons

Key:

-  Power Pylons
-  Communication Masts

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m³).

This data indicates the level of noise according to the strategic noise mapping of road sources within areas with a population of at least 100,000 people (agglomerations) and along major traffic routes. This indicates a 24 hour annual average noise level with separate weightings for the evening and night periods.

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

- 75.0+ dB
- 70.0-74.9 dB
- 65.0-69.9 dB
- 60.0-64.9 dB
- 55.0-59.9 dB

Martin & Co Tunbridge Wells

Here at Martin & Co Tunbridge Wells, we're proud to have been providing specialist advice and guidance across all areas of the residential property market to the communities of Tunbridge Wells, Southborough, Rusthall, Langton Green, Crowborough, and Pembury since 2009.

Franchisee David Rogers brings over thirty years' experience within the industry, encompassing everything from estate agency and property management, to new build development, and is a member of the Association of Residential Lettings Agency (ARLA) and the National Association of Estate Agents (NAEA).

Testimonial 1

We dealt with David from Martin and Co, when we were buying our family home during this pandemic. Despite David representing the seller and not us, we were impressed with David's efficiency, politeness and understanding of people. I feel with David's help, the purchase went much smoother and the process was much quicker than we expected. David is very professional and prompt in dealing with any query you have.

Testimonial 2

Happy to vouch for Martin & Co as both Sales and Lettings. Managed the renting of my property very well. David and the rest of his team were always available and quick to respond. Would definitely highly recommend. Personalized property portal for managing the rental very efficient. Same applies to sales.

Testimonial 3

We had a fantastic experience with Martin & Co in Tunbridge Wells. We were impressed by their reasonable rates, quick responses and the efforts which they went to in marketing our property – the 360 degree photo tour which they created was fantastic. A huge bonus for us is that Martin & Co don't try to sell financial products, which means that their only motivation is to sell the property to the best buyer. A big thank you to David for all your hard work.
