The buildings are well laid out for management, feeding and mucking out. All livestock buildings are supplied with water from a private well. Linking the buildings are concrete yards and tracks. To the front of the yard is a large open stoned yard currently utilised for the storage of straw. There is also an earth bank silage pit.

In addition to the cattle buildings there is a large grain/fodder store that benefits from being 20ft to the eaves and has concrete partitions (building 4). There is also a workshop and useful machinery storage buildings.

## THE LAND AT SALLINS

This is a ringfenced farm set in approximately **316.07 acres (127.91 hectares)** including some areas of woodland. There is a wide range of land types, from productive arable land to permanent pasture. The land has benefitted from much improvement and investment to include drainage works and soil management. There are well kept fences with mature trees and hedgerows. The fields benefit from a natural water supply and planted shelterbelts, ideally suited for livestock shelter. They have good access with the rear land being accessed off council maintained roads. The owners benefit from Commoners' rights on the Long Mynd.

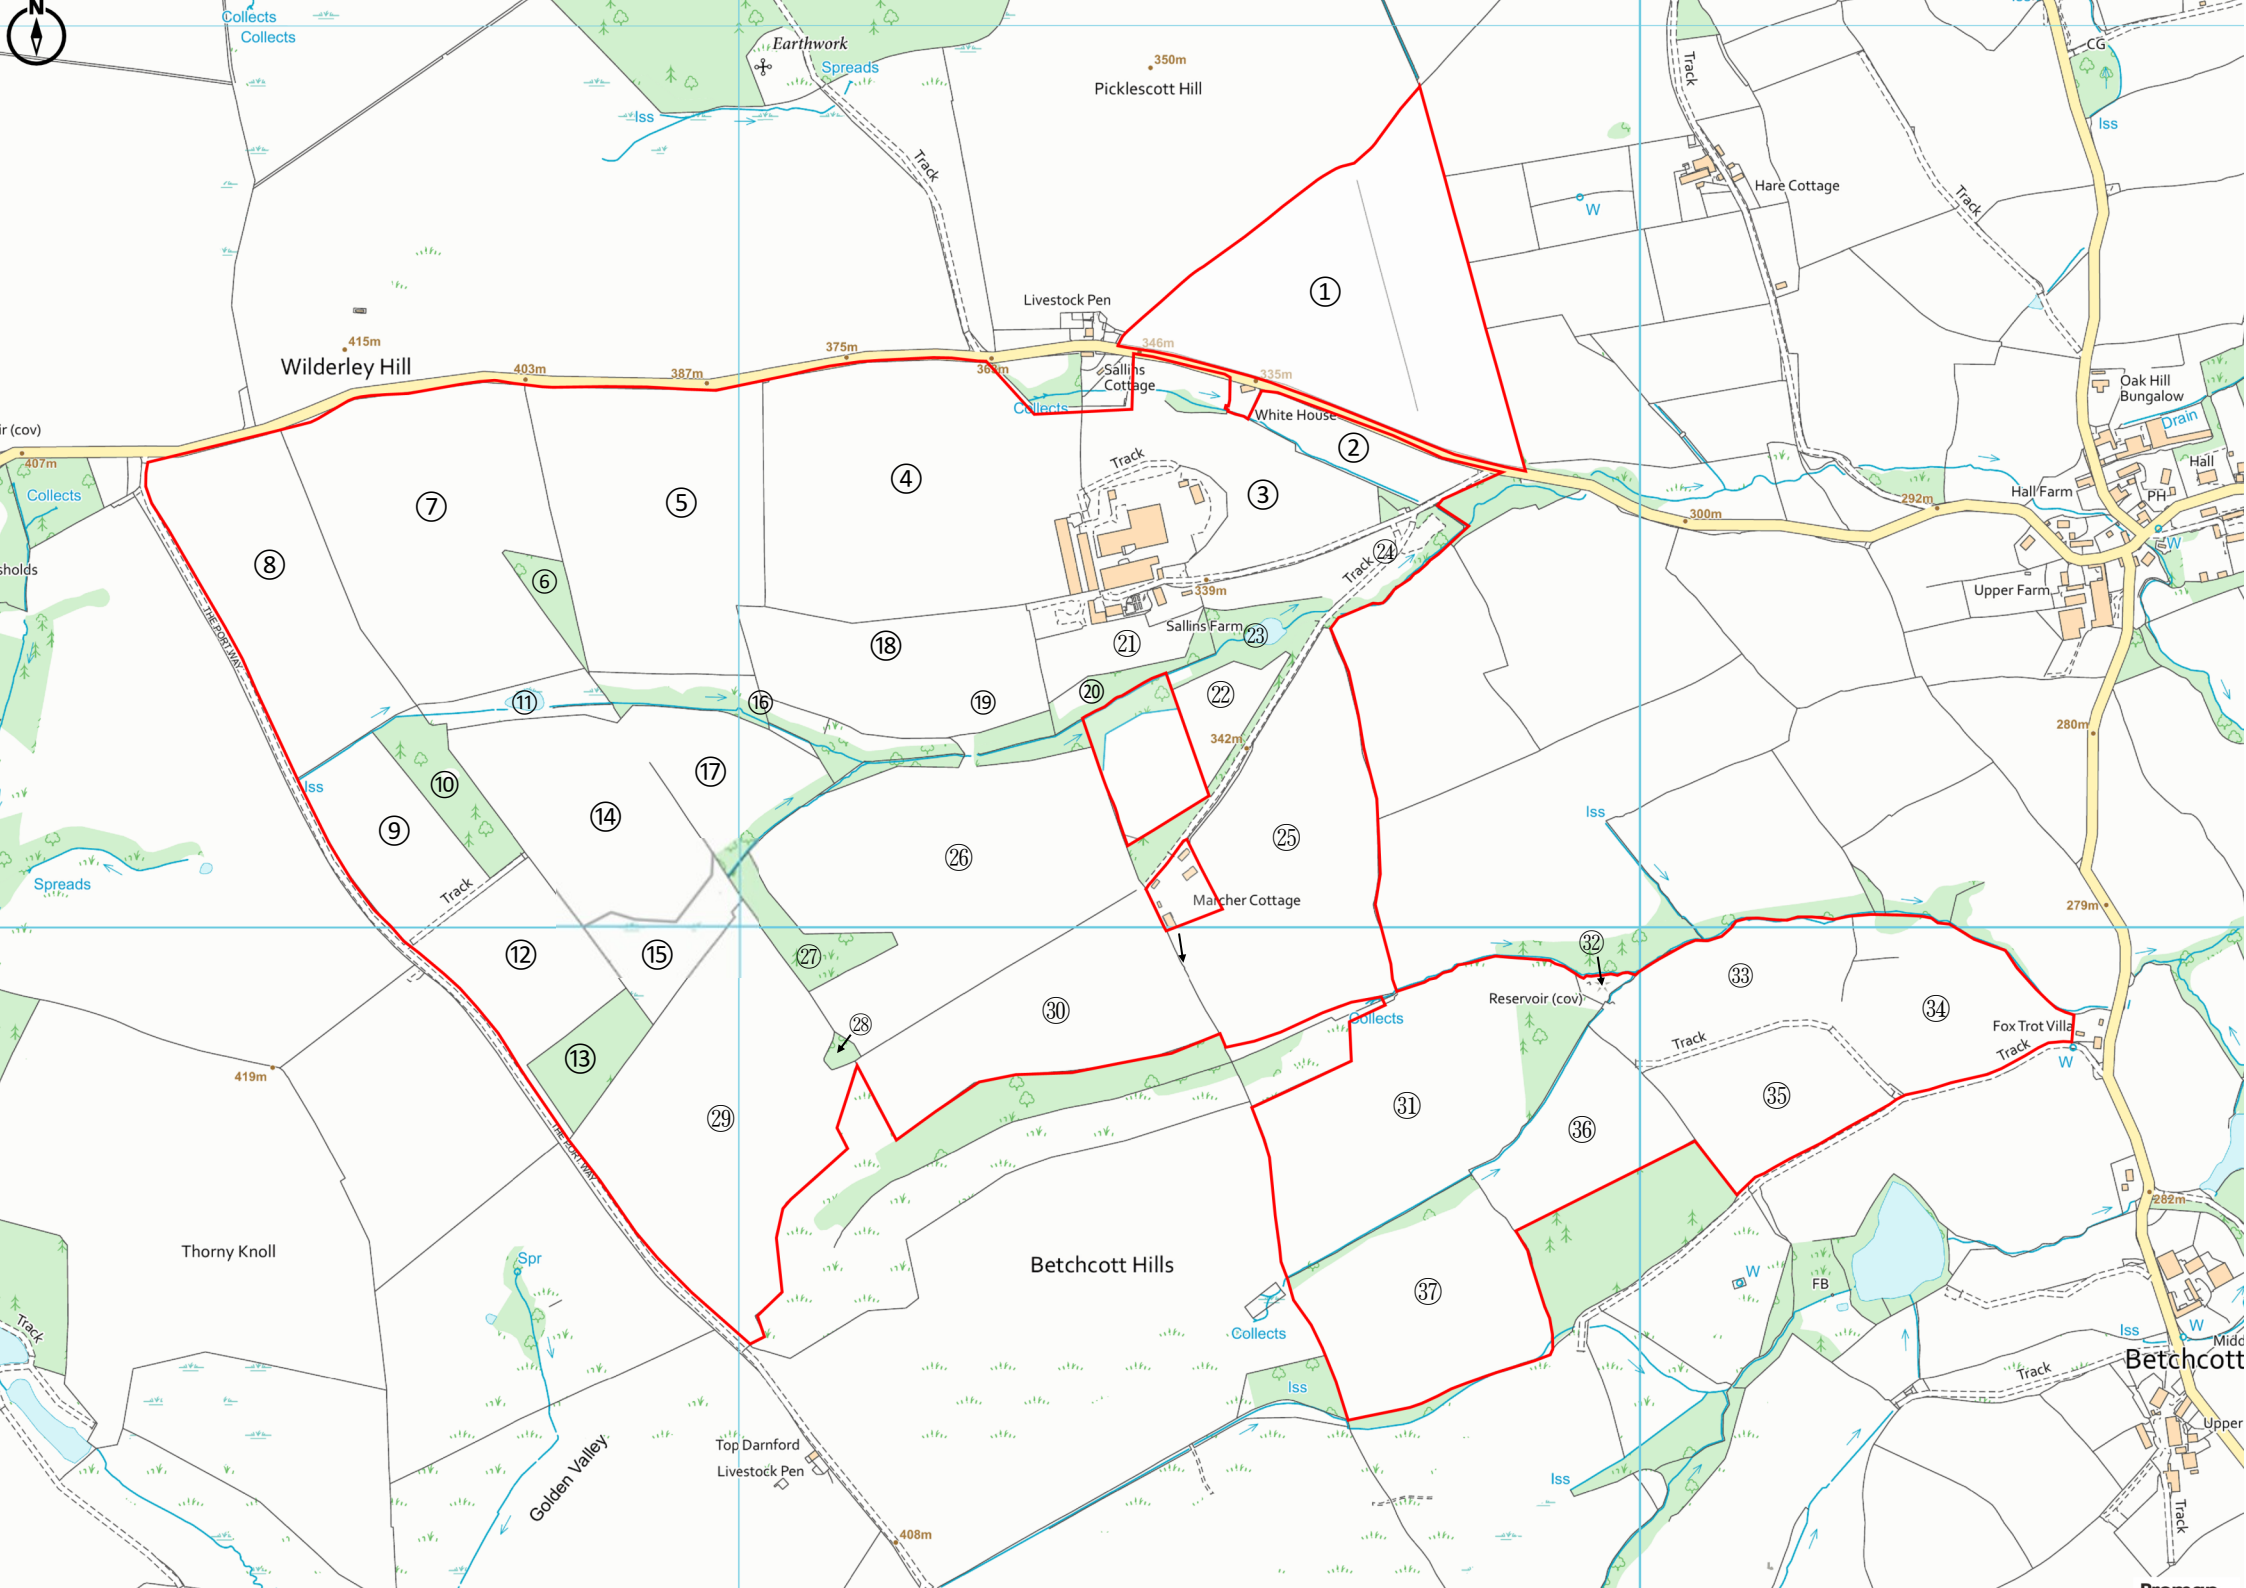

There is also sporting potential with many small spinneys sporadically planted on the farm that would make great locations for release pens and drives. Along with this there is some excellent undulating terrain that could produce some challenging shooting.
